

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Eleva Global Bonds Opportunities Fund - Class R (EUR) acc.

(ISIN:LU2168543499) Eleva Global Bonds Opportunities Fund (the 'Fund') is a sub-fund of Eleva UCITS Fund (the 'Company')

Eleva Capital S.A.S. is the management company (the 'Management Company') to the Company.

Objectives and Investment Policy

- The Fund seeks to achieve a positive performance (net of fees) over the medium term by investing primarily in the international fixed income and currency markets. The Fund applies an absolute return approach and follows an active investment strategy.
- The Management Company will seek to achieve the investment objective through a combination of a global long/short duration positioning along with relative value strategies. The Fund will invest principally in bonds, currencies and other debt securities of private, public and semi-public issuers worldwide based, without any restrictions to respective sector exposures.
- The bonds and other debt securities, to which the Fund will be exposed, may be of a non-speculative ("Investment Grade") or a speculative ("High Yield" or "Non Rated") nature, and be of various geographical locations within the limits described below. They may have fixed or variable rates and include without limitation index-linked, subordinated, distressed, callable and covered debt securities. Subordinated debt securities may also be perpetual ("Hybrids" for non-financial issues).
- The minimum asset allocation in OECD bonds ("country of risk") and other debt securities will be 70% of the Fund's Net Asset Value.
- The Fund is actively managed which means that the Management Company is actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.
- The Fund may invest up to 30% of the asset in fixed income instruments issued by entities domiciled in non OECD countries, up to 30% of the portfolio in high yield and not rated bonds and may invest in listed and over-the-counter ("OTC") derivatives for the purposes of yield enhancement and hedging risks. Repurchase and reverse repurchase agreement transactions, total return swaps and other financial derivative instruments with similar characteristics may be used.
- Through the former FDIs, the Fund may be committed to leverage up to 1.000% of its Net Asset Value. This means that the Fund may have additional commitments seeking exposure, hedging or arbitrage to financial markets up to ten times its Net Asset Value, in absolute value. The 1.000% leverage upper limit could be approached with the use of short term maturity FDIs with a low duration exposure which therefore would require larger notionals to reach the same sensitivity as longer maturity FDIs. For example, for the same contribution to duration, a leverage five times larger will be required when investing in a two years maturity bond future compared with investing in a ten years maturity bond future.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 2 years.
- The Share Class does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of this Share Class.
- Investors may redeem their shares on a daily basis.

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile shown is not guaranteed and may change over time.
- As this Fund has less than five years performance data available, it is based on simulated volatility and is not a guide to the future risk and reward category of the Fund.
- The Fund is rated 4 because its simulated historical value has shown moderate volatility. However, due to the nature of its investments, it is exposed to the risks listed.

The following risks may not be fully captured by the risk and reward indicator:

- Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Derivative Risk:** Derivative values can rise and fall at a greater

rate than equities and debt instruments. Losses can be greater than the initial investment. This risk is minimised by holding a diverse selection of non-derivative instruments.

- Credit Risk:** The Fund could lose money if the issuer or guarantor of a fixed income security, or the counterparty to a derivatives contract, repurchase agreement or a loan of portfolio securities, is unable or unwilling to make timely principal and/or interest payments, or to otherwise honour its obligations. All securities are subject to varying degrees of credit risk, which may not always be wholly reflected in credit ratings. In addition, the Fund may purchase unrated securities, thus relying on the Management Company's credit analysis, possibly increasing or incurring other risks.
- Liquidity Risk:** It exists when particular investments are difficult to purchase or sell. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price. The Fund involves foreign securities, derivatives or securities with substantial market and/or credit risk, which tend to have the greatest exposure to liquidity risk.

A complete description of risk factors is set out in the prospectus of the Company in the 'Risk Factors Annex'.

Charges

<i>One-off charges taken before or after you invest</i>	
Entry charge	3.00%
Exit charge	None
<i>The percentage indicated is the maximum that can be taken out of your capital before it is invested or before the income from your investment is distributed to you</i>	
Ongoing charge	0.96%
<i>Charges taken by the fund under certain specific conditions</i>	
Performance fee	20.00% a year of any returns the Fund achieves above the High Water Mark for these fees.

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The **ongoing charges figure** is based on the expenses for the year ending December 2021.

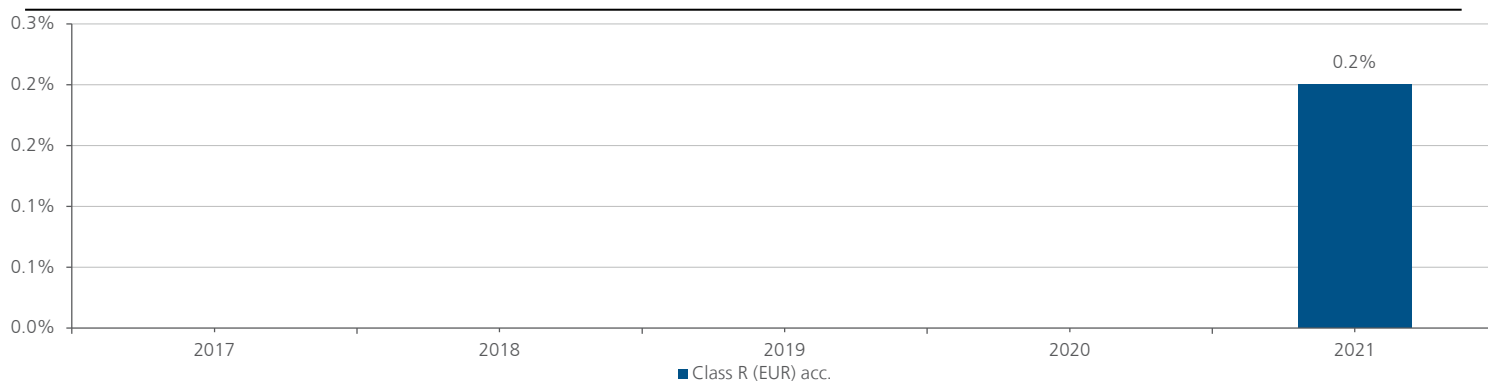

This figure may vary from year to year. It excludes:

- Performance Fees.
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another undertaking for collective investment.

In the last financial year ending December 2021, the performance fee amounted to 0.24%.

For more information on charges, please see the 'Fees and Expenses' section of the Prospectus.

Past Performance

- Please note that past performance is not a reliable indicator of future results.
- The past performance is calculated in Euro.
- The Fund performance does not track the benchmark performance.
- The impact of charges and fees on past performance has been included but entry charges are excluded.
- The Fund launched on 9 September 2020. This class became active on 14 September 2020.
