Management Report

ELEVA European Selection Fund

In 2024, the ELEVA European Selection Fund - Class I (EUR) acc. is up 12.25% vs. the STOXX Europe 600 index (Net Return), up 8.79%, an outperformance of 346 bps. Since inception, the Fund is up 123.81% vs. the index up 76.76%, an outperformance of 4,705 bps.

The 2024 outperformance comes from stock-picking, which entirely offset the slightly negative allocation effect over the year.

The allocation was positive in the consumer space and in energy, but negative in materials and health care.

The stock-picking was favorable in financials, health care and industrials, but was costly in consumer staples and technology.

Among contributors, we find **UCB** as top contributor in 2024, the company continues to show a promising product pipeline (Bimzelx, Rystiggo). Banks (**Natwest, UniCredit, Barclays, Intesa Sanpaolo, BBVA**) are also well represented in top contributors as their margins improve on the back of higher rates. **3i Group** still reaps the benefits of its holding, the discounter Action. The online sports betting specialist, **Flutter Entertainment**, is rewarded for its increased penetration of the US market.

Among detractors, we find companies which disappointed on their publications (**BNP Paribas, Jeronimo Martins**) and other large caps which were invested with a poor timing (**AstraZeneca, HSBC, Heineken**).

ELEVA Euroland Selection Fund

In 2024, the ELEVA Euroland Selection Fund - Class I (EUR) acc. is up 9.06% in line with the EURO STOXX Index (Net Return), up 9.26%. Since inception, the strategy is up 74.53% vs. the index up 57.77%, an outperformance of 1,676 bps.

Both the stock-picking and the allocation effects contributed positively to performance in 2024.

The allocation in consumer staples, health care and utilities was positive in terms of performance. In the other hand, materials, financials and communication services were negative sector contributors.

The stock-picking was positive enough in materials, health care and financials, to compensate for the negative stock-picking effect in the consumer space and in technology.

Among contributors, we find **UCB** as top contributor in 2024, the company continues to show a promising product pipeline (Bimzelx, Rystiggo). Banks (**UniCredit, Intesa Sanpaolo, BBVA**) are also well represented in top contributors as their margins improve on the back of higher rates. **CRH** has benefited from a revitalizing US market post election. More specifically, **Publicis** and **Schneider Electric** are well positioned to benefit from big trends, respectively from digitalization and electrification.

The figures stated in the report are historical and not necessarily indicative of future performance.

Eleva UCITS Fund
Société d'Investissement à Capital Variable

Management Report (continued)

ELEVA Euroland Selection Fund (continued)

Among detractors, we find companies which disappointed on their publications (**BNP Paribas, Jeronimo Martins**), French companies suffering from the local political environment (**Renault, Arkema**) and other companies which detracted relatively being absent from the selection (**Allianz, Safran**).

ELEVA Absolute Return Europe Fund

The ELEVA Absolute Return Europe Fund – Class R (EUR) acc. is up 8.50% in 2024. Since inception, the strategy is up 57.47%.

In 2024, the negative contribution of the short book was entirely offset by the very positive contribution of the long book.

The selection in the long book was positive in all sectors, except in consumer staples and real estate. Among top long contributors, we find **UCB** as top contributor in 2024, the company continues to show a promising product pipeline (Bimzelx, Rystiggo). Banks (**Natwest, UniCredit, Barclays, Intesa Sanpaolo**) are also well represented in top contributors as their margins improve on the back of higher rates. **3i Group** still reaps the benefits of its holding, the discounter **Action**. **SAP** is set to benefit from the digitalization trend.

Among detractors, we find companies which disappointed on their publications (**BNP Paribas, Jeronimo Martins**) and other large caps which were invested with a poor timing (**AstraZeneca, Heineken**).

The short book weighed in terms performance in a down market environment: the index overlay mechanically detracted. However, short stock-picking generated positive alpha, especially in the consumer space and in energy.

Exposure management was a very positive contributor in 2024. Net exposure was kept above average for most of 2024 (31.6% average net exposure in 2024) despite the lack of macro momentum.

ELEVA Leaders Small & Mid-Cap Europe Fund

2024 was another year of underperformance for small & mid caps. They are underperforming the larger-cap segment (STOXX Europe Small 200 NR up 4.32% vs. 8.79% for the STOXX Europe 600 NR).

In 2024, the ELEVA Leaders Small & Mid Cap Europe Fund - Class I (EUR) acc. is up 4.91% against the STOXX Europe Small 200 Index (Net Return), up 4.32%, an outperformance of 59 bps. Since inception, the strategy is up 68.27% vs. the index up 47.65%, an outperformance of 2,062 bps.

The relative performance is explained by selection while allocation was slightly negative mainly due to financials underweight. Best performing sectors (in absolute terms) in the fund were financials, energy and industrials while materials and healthcare were negative.

The figures stated in the report are historical and not necessarily indicative of future performance.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Management Report (continued)

ELEVA Leaders Small & Mid-Cap Europe Fund (continued)

Among contributors, **Euronext** is top contributor in 2024, refocusing on organic growth, which is welcomed by investors. Other top contributors include technology and industrials which published strong results like **SPIE, Esker (taken over), Halma and Arcadis**.

On the main detractors (**Amplifon, Befesa, Sartorius Stedim Biotech or Energias de Portugal Renovaveis**), all were sold at different timing in 2024 due to uncertainties on their outlook.

ELEVA Global Bonds Opportunities

In 2024, the directional book performed well thanks to a supportive credit market, especially the selection effect from hybrid bonds in the REITs sector. The credit exposure in cash bonds (HY and IG) contributed positively while the CDS protection to hedge the credit exposure slightly detracted.

The overall long duration positioning of the fund, which was kept throughout the year (mainly in the US, Germany and in the UK), detracted. On the other hand, the negative duration positioning on Japan, which was also kept throughout 2024, contributed positively.

The exposure to emerging markets detracted overall: the positive contribution of Poland and Romania was not enough to offset the negative contribution of Brazil and Mexico in local currencies.

The relative value strategies contributed positively thanks to steepening strategies, while spread strategies on France and swap strategies detracted.

The FX strategies detracted, mainly due to the long position EURUSD, the short on EURNOK and the short on EURJPY.

Since inception, ELEVA Global Bonds Opportunities – I EUR Acc. is up +4.31%. In 2024, ELEVA Global Bonds Opportunities – I EUR Acc. is up +5.10%.

ELEVA Euro Bonds Strategies

In 2024, the fund started 2024 neutral positioning in terms of relative duration, which increased as the year progressed. Overall, the overweight in terms of relative duration weighed on performance in December as yields rose.

In terms of asset allocation, the overweight exposure to credit was very positive in terms performance thanks to a supportive credit market, especially the selection effect from hybrid bonds in the REITs sector. The credit exposure in cash bonds (HY and IG) contributed positively while the CDS protection to hedge the credit exposure slightly detracted.

The slight overweight exposure on the European peripherals and emerging sovereign bonds contributed positively (Romania and Poland).

The figures stated in the report are historical and not necessarily indicative of future performance.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Management Report (continued)

ELEVA Euro Bonds Strategies (continued)

In terms of relative value strategies, the steepening strategies contributed very positively.

Since inception, ELEVA Euro Bonds Strategies – I EUR Acc. is down 0.73% versus its benchmark down 10.31%. In 2024, ELEVA Euro Bonds Strategies – I EUR Acc. is up 5.48%, outperforming the Bloomberg Euro Aggregate Index by +285 bps.

ELEVA Sustainable Impact Europe

In 2024, the ELEVA Sustainable Impact Europe Fund - Class I (EUR) acc. is up 0.59% vs. the STOXX Europe 600 index (Net Return), up 8.79%, an underperformance of 820 bps. Since inception, the fund is up 10.23% vs. the index up 41.25%, an underperformance of 3,102 bps.

Sector allocation is positive in 2024 with the most positive impact coming from the consumer space, energy and communication services, while financials, materials and health care detracted.

At company level, the top performers in 2024 were found in consumer discretionary (**RELX**), industrials (**SPIE, Schneider Electric, Saint-Gobain, Elis, Bureau Veritas**) and financial (**Munchener, Allianz, BAWAG**). On the other hand, the worst detractors were found in industrials (**Befesa, Alfen**), utilities (**EDP Renovaveis**) and technology (**STM, Infineon**).

At the end of 2024, the fund was made of 34 positions and had a 64% exposure to UN SDGs, meaning that if the fund was a company, it would have 64% of its revenue contributing to SDGs.

ELEVA European Multi Opportunities

In 2024, ELEVA European Multi Opportunities - Class I (EUR) acc. is up 10.44%.

Both the equity and the bond pockets are almost positive in terms of performance in 2024.

In the equity portfolio, all sector contributed positively except consumer staples. In 2024, the best contributors were found in technology (**SAP**), financials (**NatWest, Barclays, 3i Group, UniCredit, Intesa Sanpaolo**) and industrials (**Schneider Electric, Rolls-Royce**). On the other hand, the detractors were part of the consumer space (**Heineken, LVMH**), healthcare (**Novo Nordisk, AstraZeneca, Straumann**) and materials (**UPM, Rio Tinto**).

The fixed-income pocket contributed positively thanks to decreasing short-term rates and tightening credit spread. The allocation between sovereign and credit debt was kept stable throughout 2024 but the overall duration was raised as the year progressed. Steepening strategies contributed positively over the period.

The figures stated in the report are historical and not necessarily indicative of future performance.

Eleva UCITS Fund
Société d'Investissement à Capital Variable

Management Report (continued)

ELEVA Global Multi Opportunities

In 2024, the ELEVA Global Multi Opportunities Fund (I share class) is up 9.24%.

Both the equity and the fixed income pockets contributed positively to performance.

In the equity portfolio, technology, financials and healthcare contributed positively while consumer discretionary and energy detracted. In 2024, the best contributors were found in technology (**NVIDIA, Microsoft, TSMC, Coherent Corp**), healthcare (Galderma) and consumer discretionary (**Amazon**). On the other hand, the main detractor were **PDD** in technology, **Biomarin Pharmaceutical** in healthcare and put options on the **Nasdaq**.

The fixed income pocket was penalized core sovereign bonds while benefitting from the tightening of risk premiums in the credit pocket.

ELEVA Absolute Return Dynamic

The ELEVA Absolute Return Dynamic Fund – Class I (EUR) acc. is up 12.74% in 2024. Since inception, the strategy is up 12.67%.

In 2024, the negative contribution of the short book was entirely offset by the very positive contribution of the long book.

The selection in the long book was positive in all sectors, except in consumer staples and real estate. Among top long contributors, banks (**Natwest, UniCredit, Barclays, Intesa Sanpaolo**) are well represented in top contributors as their margins improve on the back of higher rates. **3i Group** still reaps the benefits of its holding, the discounter Action. **SAP** is set to benefit from the digitalization trend. UCB continues to show a promising product pipeline (Bimzelx, Rystiggo).

Among detractors, we find companies which disappointed on their publications (**BNP Paribas, Jeronimo Martins**) and other large caps which were invested with a poor timing (**AstraZeneca, Heineken**).

The short book weighed in terms performance in a down market environment: the index overlay mechanically detracted. However, single names generated negative alpha mainly due to poor stock-picking in financials.

Exposure management was a positive contributor in 2024. The average net exposure was 57.8% in the year (average expected circa 50%).

The figures stated in the report are historical and not necessarily indicative of future performance.

Eleva UCITS Fund

Management Report (continued)

ELEVA SRI European Selection

The ELEVA SRI European Selection Fund seeks to achieve superior long-term risk adjusted returns and capital growth by investing primarily in European equities and equity related securities.

The fund was launched on July 31, 2024.

ELEVA SRI Euroland Selection

The ELEVA SRI Euroland Selection Fund seeks to achieve superior long-term risk adjusted returns and capital growth by investing primarily in European equities and equity related securities denominated primarily in Euro.

The fund was launched on July 31, 2024.

The figures stated in the report are historical and not necessarily indicative of future performance.

To the Shareholders of
Eleva UCITS Fund

REPORT OF THE *RÉVISEUR D'ENTREPRISES AGRÉÉ*

Opinion

We have audited the financial statements of Eleva UCITS Fund (the “Fund”) and of each of its sub-funds, which comprise the statement of net assets and the statement of investments and other net assets as at December 31, 2024 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at December 31, 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (Law of July 23, 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the *réviseur d’entreprises agréé* for the Audit of the Financial Statements” section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the Financial Statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “*réviseur d'entreprises agréé*” for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *réviseur d'entreprises agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *réviseur d'entreprises agréé*. However, future events or conditions may cause the FUND to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, *Cabinet de révision agréé*

Ladislav De Crouy-Chanel, *Réviseur d'entreprises agréé*

**Eleva SRI European Selection Fund has been launched on 31 July 2024.

Eleva UCITS Fund
Société d'Investissement à Capital Variable

Schedule of Derivatives 31 December 2024

Investments in Derivative Contracts

The Fund may use financial derivative instruments (“FDIs”) involving Transferable Securities and Money Market Instruments for the purpose of efficient portfolio management (“EPM”) of its assets and for hedging purposes. The Fund may also use FDIs for investment purposes in accordance with ESMA Guidelines 2014/937 to meet the Fund’s investment objectives only if provided for in the Prospectus within the limits set forth by law, regulation and administrative practice.

When entering into FDIs, securities lending transactions, repurchase agreements or other techniques or instruments, each of the Fund and its counterparties may require delivery of collateral as security against its exposure thereunder. The Sub-Fund’s exposure, and therefore the collateral required to be posted, will typically be calculated on a daily mark-to-market basis. The level of collateral required by the Sub-Fund will be such that the risk exposure of each Sub-Fund to a single counterparty will not, unless otherwise permitted under the Law of 2010, exceed 5% of the relevant Sub-Fund’s net assets. The Fund may only receive cash collateral, including when entering into Over The Counter Derivatives. Such collateral is typically not subject to a haircut and will be valued at its face value.

Contracts for Differences

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024

1. General Information

Eleva UCITS Fund (the “Fund”) is an investment company organised as a Société Anonyme under the laws of the Grand Duchy of Luxembourg and qualifies as a Société d'Investissement à Capital Variable (SICAV). The Fund was incorporated in Luxembourg on 22 January 2015 for an unlimited period and is authorised under Part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment, as amended (the “Law of 2010”). The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities under Article 1, Paragraph 2, (a) and (b) of the Directive 2009/65/EC.

The Fund has appointed Eleva Capital S.A.S. (the “Management Company”) to serve as its designated Management Company in accordance with the Law of 2010. Pursuant to the Investment Management Agreement, Eleva Capital S.A.S. was appointed investment manager to the Fund. The Management Company has appointed, with the consent of the Fund, Eleva Capital S.A.S. as distributor of the Fund.

As at 31 December 2024, the Fund consisted of twelve Sub-Funds: Eleva European Selection Fund, Eleva Absolute Return Europe Fund, Eleva Euroland Selection Fund, Eleva Leaders Small & Mid-Cap Europe Fund, Eleva Sustainable Impact Europe Fund, Eleva Euro Bonds Strategies Fund, Eleva Global Bonds Opportunities Fund, Eleva European Multi Opportunities Fund, Eleva Global Multi Opportunities Fund, Eleva Absolute Return Dynamic Fund, Eleva SRI European Selection Fund and Eleva SRI Euroland Selection Fund.

The Sub-Funds offer a number of different Classes of Shares. Certain Classes are available to Retail Investors while other Classes may be available only to Institutional Investors. These Classes may be sub-divided into accumulation of income or distribution of income categories as further detailed in the Prospectus. Hedged Classes of a Sub-Fund will be hedged against the Reference Currency of that Sub-Fund, with the objective of minimizing currency risk exposure.

During the period the following Share Classes were launched and/or closed:

Fund Name	Share Class	Launch date
Eleva European Selection Fund	Class R (USD) acc. (unhedged)	launched 20 September 2023 and closed 21 March 2024

	Class R (EUR) acc.	2 August 2024

2. Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Fund.

a) Presentation of Financial Statements

The financial year of the Fund ends on 31 December in each year. The financial statements have been prepared in accordance with generally accepted accounting principles in Luxembourg, legal and regulatory requirements applicable in Luxembourg and are presented in Euro.

b) Main Investment Valuation Principles

- The value of securities and/or financial derivative instruments which are quoted or dealt in on any stock exchange shall be based in respect of each security on the latest available dealing prices on the stock exchange which is normally the principal market for such security or the latest available quoted bid prices obtained by an independent pricing service;
- Where investments of the Fund are both listed on a stock exchange and dealt in by market makers outside the stock exchange on which the investments are listed, then the Board of Directors will determine the principal market for the investments in question and they will be valued at the latest available price in that market;
- Securities dealt in on another regulated market are valued in a manner as near as possible to that described in the first paragraph above;
- In the event that any of the securities held in the Fund's portfolio are not quoted or dealt in on a stock exchange or another regulated market, or for any of such securities, no price quotation is available, or if the price determined is not in the opinion of the Board of Directors representative of the fair market value of the relevant securities, the value of such securities shall be determined prudently and in good faith, based on the reasonably foreseeable sales or any other appropriate valuation principles;
- The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are valued in a reliable and verifiable manner on a daily basis and verified by the Central Administration Agent;

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

2. Significant Accounting Policies (continued)

b) Main Investment Valuation Principles (continued)

- Units or shares in underlying open-ended investment funds shall be valued at their last available net asset value reduced by any applicable charges;

- Liquid assets and Money Market Instruments are valued at their market price, at their nominal value plus accrued interest or on an amortised cost basis in accordance with the European Securities and Markets Authority's guidelines on a common definition of European money market funds. If the Fund considers that an amortisation method can be used to assess the value of a Money Market Instrument, it will ensure that this will not result in a material discrepancy between the value of the Money Market Instrument and the value calculated according to the amortisation method;

- In the event that the above mentioned calculation methods are inappropriate or misleading, the Board of Directors may adjust the value of any investment or permit some other method of valuation to be used for the assets of the Fund if it considers that the circumstances justify that such adjustment or other method of valuation should be adopted to reflect more fairly the value of such investments.

Realised gains/(losses) on investments sold are included in the Statement of Operations and Changes in Net Assets under "Net realised gain/(loss) on Investments".

c) Forward Foreign Exchange Contracts

Forward foreign exchange contracts represent obligations to purchase or sell foreign currency on a specified future date at a price fixed at the time the contracts are entered into. The values of the forward foreign exchange contracts are adjusted daily based on the applicable exchange rate of the underlying currency. Changes in the value of these contracts are recorded as unrealised appreciation or depreciation until the contract settlement date. When the forward contract is closed, the Sub-Fund records a realised gain or loss equal to the difference between the value at the time the contract was opened and the value at the time it was closed.

The unrealised appreciation/(depreciation) on forward foreign exchange contracts is disclosed in the Statement of Net Assets under "unrealised appreciation/(depreciation) on forward foreign exchange contracts". Realised gain/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on Forward foreign exchange contracts" and "Net change in unrealised appreciation/(depreciation) on Forward foreign exchange contracts".

d) Contracts for Differences

Contracts for differences are valued based on the closing market price of the underlying security converted into the base currency of the contract for differences, less any financing charges attributable to each contract which are booked separately. On entering a contract for differences, the Fund may be required to pledge an amount of cash and/or other assets to the broker which is equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margins' are made or received by the Fund periodically, depending on the fluctuations in the value of the underlying security. Realised gains or losses at the closure of the contract are equal to the difference between the value of the contract for differences at the time it was opened (including any financial changes) and the value at the time it was closed. Dividends (net of withholding taxes) attributable to open contracts for differences are deemed to be dividends receivable or payable, depending on whether the Fund held short or long position in shares with contracts for differences, at the end of the period.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

2. Significant Accounting Policies (continued)

d) Contracts for Differences (continued)

The result of these revaluations on 31 December 2024 is shown in the Statement of Net Assets under 'Unrealised appreciation/(depreciation) on contracts for differences'. The reset day is as of the 15 calendar day of each month, or in the event that is not a business day, the next applicable business day.

The unrealised appreciation/(depreciation) on contracts for differences is disclosed in the Statement of Net Assets under "Unrealised appreciation on Contracts for differences". Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain on Contracts for differences" and "Net change in unrealised appreciation on Contracts for differences".

The dividend income/expenses resulting from contracts for differences are disclosed in the Statement of Operations and Changes in Net Assets under "Dividend income on contracts for differences" or "Dividend expenses on contracts for differences"

e) Foreign Currency

The books and records of the Sub-Funds are denominated in EUR. Although Shares of the different Classes within Sub-Funds may be denominated in different currencies, the Sub-Funds may invest the assets related to a Class in securities denominated in a wide range of other currencies. The Net Asset Value of the relevant Class of the relevant Sub-Funds as expressed in its Reference Currency will be impacted by the variations between the rate of the Reference Currency and the rate of the currencies in which the Sub-Funds' investments are denominated.

The following EUR exchange rates were used to translate the assets and liabilities at the year -end:

Currency	Rate
Australian Dollar (AUD)	1.6725
Brazilian Real (BRL)	6.3972
British Pound (GBP)	0.8268
Canadian Dollar (CAD)	1.4893
Danish Krone (DKK)	7.4573
Hungarian Forint (HUF)	411.3650
Japanese Yen (JPY)	162.7391
Mexican Peso (MXN)	21.5309
New Zealand Dollar (NZD)	1.8483
Norwegian Krone (NOK)	11.7605
Polish Zloty (PLN)	4.2772
South African Rand (ZAR)	19.5399

U.S. Dollar (USD)	1.0355

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

2. Significant Accounting Policies (continued)

f) Securities Lending

The Fund may enter into securities lending transactions in accordance with the provisions of Circular 08/356, Circular 14/592 and ESMA Guidelines 2014/937.

The Fund will ensure that it is able at any time to recall any security that has been lent out or terminate any securities lending agreement into which it has entered.

All revenues (less transaction costs) from securities lending transactions are accrued to the relevant Sub-Fund. All counterparties to securities lending transactions will meet the requirements of the Law of 2010 as to legal status, origin and minimum credit rating.

As at 31 December 2024, the Sub-Funds of the SICAV which are mentioned below were engaged in securities lending transactions. The value of the securities lent and the market value of the collateral received for each Sub-Fund is detailed in the following table:

Sub-Funds	Currency	Market value of securities lent	Market value of collateral received*	Securities lending income
Eleva European Selection Fund	EUR	170,466,001	179,506,019	931,045
Eleva Absolute Return Europe Fund	EUR	93,463,649	98,442,726	715,679
Eleva Euroland Selection Fund	EUR	6,795,499	7,195,627	227,533
Eleva European Multi Opportunities Fund	EUR	-	-	38

* High quality government bonds of any maturity are used as collateral.

The ratings of the collateral are presented in the Appendix.

Securities collateral received is typically valued on a daily mark-to-market basis in accordance with the Fund's valuation policy, subject to the application of a haircut in normal market conditions of approximately 5%.

Revenues from securities lending transactions are included in the caption "Interest income on securities lending" in the Statement of Operations and Changes in Net Assets.

g) Dividend Income and Expense

Dividend income on long positions and dividend expense on short positions are recognised in the Statement of Operations and Changes in Net Assets on the "ex-dividend" date.

h) Interest Income

Bank interest and interest income on bonds are accrued on a daily basis and includes the amortization of premiums and accretion of discounts.

i) Formation Expenses

The costs and expenses of the formation of the Fund were borne by the Eleva European Selection Fund and amortized over a period not exceeding five (5) years. The formation costs of any new Sub-Fund shall be borne by the relevant Sub-Fund and amortized over a period not exceeding five (5) years.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

2. Significant Accounting Policies (continued)

j) Cross Sub-Fund Investments

As at 31 December 2024, below Sub-Funds invested in cross Sub-Funds as per below. The total combined net assets of Eleva UCITS Fund at period-end, excluding the cross investment amounts to EUR 12,471,128,607.

Sub Fund Name	Investment	Investment value EUR
Eleva Absolute Return Europe Fund	Eleva Euro Bonds Strategies Fund	50,836,717
Eleva Absolute Return Europe Fund	Eleva Global Bonds Opportunities Fund	17,925,236
Eleva Absolute Return Europe Fund	Eleva European Multi Opportunities Fund	29,640,000
Eleva Absolute Return Europe Fund	Eleva Absolute Return Dynamic Fund	34,830,723
Eleva Absolute Return Europe Fund	Eleva Global Multi Opportunities Fund	14,976,982
Eleva European Selection Fund	Eleva Sustainable Impact Europe Fund	17,460,815
Eleva European Selection Fund	Eleva SRI Euroland Selection Fund	29,984,293
Eleva European Selection Fund	Eleva SRI Euroland Selection Fund	70,237,012
Eleva Euroland Selection Fund	Eleva SRI Euroland Selection Fund	10,149,800
Eleva European Multi Opportunities Fund	Eleva Leaders Small & Mid-Cap Europe Fund	1,057,969

k) Cash and Cash Equivalents

Cash and other liquid assets are valued at their face value with interest accrued, where applicable.

l) Transaction Costs

Transaction costs are the costs incurred in the acquisition, issue, disposal or transfer of financial assets and liabilities. Transaction costs include fees and commissions paid to brokers and dealers, levies by regulatory agencies and securities exchanges, depositary transaction costs and transfer taxes and duties.

Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

These costs are included with the cost of investments purchased and deducted from the proceeds received on sales of investments.

The total transaction costs paid by the Sub-funds during the period are as follows:

Sub-Funds	Currency	Broker costs	Transaction related costs (Bank commission)	Total
Eleva European Selection Fund	EUR	23,433,566	-	23,433,566
Eleva Absolute Return Europe Fund	EUR	12,674,983	-	12,674,983
Eleva Euroland Selection Fund	EUR	4,595,991	-	4,595,991

Eleva Global Bonds Opportunities Fund	EUR	4,835	-	4,835
Eleva European Multi Opportunities Fund	EUR	83,258	-	83,258
Eleva Global Multi Opportunities Fund	EUR	86,105	-	86,105
Eleva Absolute Return Dynamic Fund	EUR	146,797	-	146,797
Eleva SRI Euroland Selection Fund*	EUR	172,807	-	172,807
Eleva SRI European Selection Fund**	EUR	123,072	-	123,072

*Eleva SRI Euroland Selection Fund has been launched on 31 July 2024.

**Eleva SRI European Selection Fund has been launched on 31 July 2024.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

2. Significant Accounting Policies (continued)

m) Options

Outstanding options traded on a regulated market are valued based on the intraday price or the last available market price of the instruments.

OTC options are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty.

The market value of options is included in the statement of net assets under the headings "Unrealised appreciation/(depreciation) on Options". There are any open option contracts as at period end.

The realised gains/(losses) and change in unrealised appreciation/(depreciation) on options are disclosed in the statement of operations and changes in net assets respectively under the headings "Net realised gain/(loss) on Options" and "Net change in unrealised appreciation/(depreciation) on Options".

n) Futures Contracts

Upon entering into a futures contract, the Fund is required to deposit with the broker, cash or securities in an amount equal to a certain percentage of the contract amount which is referred to as the initial margin account. Subsequent payments, referred to as variation margin, are made or received by each sub-fund periodically and are based on changes in the market value of open futures contracts.

The unrealised appreciation/(depreciation) on futures contracts is disclosed in the statement of net assets under "Unrealised appreciation/(depreciation) on Futures contracts". Changes in the market value of open futures contracts are recorded as unrealised appreciation/(depreciation) in the statement of operations and changes in net assets under "Change in unrealised appreciation/(depreciation) on Futures". Realised gains or losses, representing the difference between the value of the contract at the time it was opened and the value at the time it was closed, are reported at the closing or expiration of futures contracts in the statement of operations and changes in net assets under "Net realised gain/(loss) on Futures contracts". Securities deposited as initial margin account are designated in the Portfolio of investments and other Net Assets and cash deposited is recorded in the statement of net assets in "Cash and cash equivalents". A receivable and/or a payable to brokers for the daily variation margin is also recorded in the statement of net assets under caption Cash and cash equivalents.

o) Credit Default Swaps

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party (the protection buyer) pays the other (the protection seller) a fixed periodic coupon for the specified life of the agreement in return for a payment contingent on a credit event related to the underlying reference obligation.

If a credit event occurs, the protection seller would be obliged to make a payment, which may be either: (i) a net cash settlement equal to the notional amount of the swap less the auction value of the reference obligation or (ii) the notional amount of the swap in exchange for the delivery of the reference obligation. Selling protection effectively adds leverage to a Fund's portfolio up to the notional amount of swap agreements.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

2. Significant Accounting Policies (continued)

o) Credit Default Swaps

Credit default swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under “Unrealised appreciation/(depreciation) on Swaps”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading “Net realised gain/(loss) on Swaps” and “Net change in unrealised appreciation/(depreciation) on Swaps”.

3. Tax Status

Under current law and practice, the Fund is not liable for any Luxembourg tax on profits or income. The Fund is liable in Luxembourg for an annual subscription tax (“taxe d’abonnement”) which is payable quarterly on the basis of the value of the net assets of the Fund at the end of the relevant calendar quarter. The rates of the subscription tax are 0.05% per annum of the Net Asset Value of each Class which is available to Retail Investors and 0.01% per annum of the Net Asset Value of each Class which is available to Institutional Investors.

Pursuant to article 175(a) of the Law of 17 December 2010, the net assets invested in UCI already subject to the “taxe d’abonnement” are exempt from this tax.

No corporate tax is payable in Luxembourg on realised or unrealised capital appreciation of the assets of the Fund.

Dividends and interest received by the Fund on its investments are in many cases subject to irrecoverable withholding taxes at source.

4. Dividends

In respect of the Accumulation Classes, under normal circumstances, the Sub-Funds do not intend to declare and make distributions with respect to the net investment income and realised capital gains of each Accumulation Class. Accordingly, the Net Asset Value per Share of these Accumulation Classes will reflect any net investment income or capital gains.

It is intended that the Board of Directors will make distributions to the holders of Class A1 (EUR) dis., Class A1 (GBP) dis. (unhedged), Class A1 (USD) dis. (hedged), Class I (EUR) dis., Class I2 (EUR) dis., Class R (EUR) dis., Class H1 (EUR) dis., Class J1 (GBP) dis. and Class J2 (GBP) dis. It is expected that net income (net of expenses and reserves) actually received by the Sub-Fund attributable to the relevant Class that is deemed by the Investment Manager in its sole discretion, to be distributable income, will be distributed to the relevant Class’ Shareholders. No distribution may be made which would result in the net assets of the Sub-Fund falling below the minimum provided for by Luxembourg law.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

4. Dividends (continued)

Shareholders in Distribution Classes shall have the discretion to elect that any distribution payable or declared shall be reinvested in the appropriate Sub-Fund instead of being paid in cash. Distributions re-invested shall be treated in the same way as a subscription for Shares in the appropriate Sub-Fund.

Any distributions unclaimed after five years from the end of the relevant Financial Year will lapse and revert to the relevant Sub-Fund as a whole. No interest will be payable by the relevant Sub-Fund on distributions declared and held for the benefit of the relevant Shareholder until the date of payment or the date upon which such distributions are forfeited.

During the year ended 31 December 2024, the following Sub-Funds distributed the following dividends per share (in share class currencies):

5. Investment Management Fees

The Sub-Funds pay out of the assets of the Sub-Funds to the Investment Manager an investment management fee monthly in arrears at the rate per annum, as set out below, of the Net Asset Value of the relevant Class of the Sub-Funds. The investment management fees are calculated and paid in the base currency of the Sub-Funds.

The following table lists the Investment Management Fees paid by the Sub-Funds during the year ended 31 December 2024:

6. Performance Fees

a. Eleva European Selection Fund

The Management Company is entitled in respect of each Class to receive a performance fee calculated in relation to each period of 12 months beginning on 1 January and ending on 31 December (the “**Calculation Period**”).

A performance fee may only be levied at the end of the Calculation Period if the percentage evolution of the Net Asset Value per Share of the relevant Class is superior to the percentage evolution of the Relevant Benchmark for that Class (as set out in the table below) during the Performance Reference Period.

The performance fee for each Class is set out in the table below and shall be payable in respect of the amount by which the percentage increase or decrease in the Net Asset Value per Share is, respectively, more than or less than the percentage increase or decrease in value of the Relevant Benchmark for each Class during the Performance Reference Period.

Eleva European Selection Fund			
Class and Currency Denomination	Performance Fees Percentage	Actual Amount of Performance fees charge (Share Class currency)	Percentage of the performance fees charged on Share Class NAV

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

6. Performance Fees (continued)

b. Eleva Absolute Return Europe Fund

The Management Company is entitled in respect of each Class to receive a performance fee calculated in relation to each period of 12 months beginning on 1 January and ending on 31 December (the “**Calculation Period**”).

A performance fee may only be levied at the end of the Calculation Period where the Net Asset Value per Share of the relevant Class exceeds its High Water Mark. The “High Water Mark” model is more appropriate for calculating the performance fee of the Eleva Absolute Return Europe Fund than the “benchmark model” since Eleva Absolute Return Europe Fund is actively managed with no reference to a benchmark.

For a Performance Reference Period, the performance fee payable will be equal to a specified percentage (as detailed in the table below) of any “New Net Appreciation” of the relevant Class.

The High Water Mark is the greater of:

- a) the Net Asset Value per Share of the relevant Class as of the end of the most recent Performance Period at which a performance fee was paid by such Class (after reduction for the performance fee then paid); and
- b) if no performance fee has ever been paid, then the Net Asset Value per Share of the relevant Class upon first issue.

For the avoidance of doubt, a performance fee is only payable where the Net Asset Value per Share of the relevant Class exceeds its High Water Mark.

6. Performance Fees (continued)

g. Eleva Global Bonds Opportunities Fund

The Management Company is entitled in respect of each Class H Shares to receive a performance fee calculated in relation to each period of 12 months beginning on 1 January and ending on 31 December (the “**Calculation Period**”).

A performance fee may only be levied at the end of the Calculation Period where the Net Asset Value per Share of the relevant Class exceeds its High Water Mark. The “High Water Mark” model is more appropriate for calculating the performance fee of Eleva Global Bonds Opportunities Fund than the “benchmark model” since Eleva Global Bonds Opportunities Fund is actively managed with no reference to a benchmark.

The performance fee for each Class is set out in the table below and shall be payable in respect of the amount by which the percentage increase or decrease in the Net Asset Value per Share is, respectively, more than or less than the percentage increase or decrease in value of the Relevant Benchmark for each Class during the Performance Reference Period.

The High Water Mark is the greater of:

- a) the Net Asset Value per Share of the relevant Class as of the end of the most recent Performance Period at which a performance fee was paid by such Class (after reduction for the performance fee then paid); and
- b) if no performance fee has ever been paid, then the Net Asset Value per Share of the relevant Class upon first issue.

For the avoidance of doubt, a performance fee is only payable where the Net Asset Value per Share of the relevant Class exceeds its High Water Mark.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

6. Performance Fees (continued)

Specific Performance Fee for Class H Shares:

For Eleva European Selection Fund, Eleva Euroland Selection Fund, Eleva Leaders Small & Mid-Cap Europe Fund, Eleva Sustainable Impact Europe Fund and Eleva Euro Bonds Strategies Fund, the Investment Manager is entitled in respect of each Class H Shares to receive a performance fee calculated in relation to each Performance Period.

A performance fee may only be levied if the percentage evolution of the Net Asset Value per Share of the relevant Class is superior to the percentage evolution of the Relevant Benchmark for that Class during the period since the last performance fees were paid until the end of the Financial Period (the "Performance Period").

For the avoidance of doubt, the Performance Period will either be:

- a) the Financial Period if performance fees have been paid in the last Financial Period; or
- b) the period from the last performance fees payment (Net Asset Value per Share on the last Valuation Day of the preceding Performance Period at the end of which a performance fee was paid after deduction of accrued performance fees and distributions in respect of such period) until the end of the Financial Period.

For all Sub-Funds the performance fee is payable in arrears within 10 calendar days at the end of each Performance Period. The Net Asset Value per Share utilised in calculating the performance of a Class over a Performance Period will include accruals for investment management fees but not performance fees payable in respect of each Performance Period. In addition, appropriate adjustments will be made to take account of distributions made in respect of a Class for prior Performance Periods and the actual performance of the Net Asset Value per Share in a Performance Period will be adjusted to include any distributions made in respect of the Class for the Performance Period.

Shareholders should note that, as the performance fee is calculated at a Class level and not at an individual Shareholder level, Shareholders may be charged a performance fee even where the Net Asset Value of their Shares have remained the same or dropped in value.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

6. Performance Fees (continued)

Specific Performance Fee for Class H Shares:

In the event Shares of a Class are redeemed during a Performance Period, a performance fee will be payable equivalent to the performance fee accrued in calculating the Net Asset Value per Share at the time of redemption.

For Eleva European Selection Fund, Eleva Euroland Selection Fund, Eleva Leaders Small & Mid-Cap Europe Fund, Eleva Sustainable Impact Europe Fund, Eleva Global Bonds Opportunities Fund, Eleva Absolute Return Europe Fund (since November 2020) and Eleva Euro Bonds Strategies Fund the Performance Periods in respect of each Class comprise successive 12 monthly periods ending on 31 December in each calendar year. The first Performance Period in respect of a Class will commence on the first Dealing Day for Shares of a Class and will end on the date of termination of the Class.

The last Performance Period in respect of a Class will end on the date of termination of the Class. If the Investment Management Agreement is terminated before the end of a Performance Period, the performance fee in respect of the then current Performance Period will be calculated and paid to the Investment Manager as though the date of termination were the end of the relevant Performance Period.

7. Management Company Fees

The Fund will pay the Management Company a management company fee of 0.005% per Sub-Fund per period.

8. Director's Fees

The independent Directors of the Fund are entitled to receive Directors' fees. The Directors' fees for the year amounted to Euro 96,000. Conversely, the non-independent Director does not receive a fee for acting as a Director.

9. Depositary, Administration and Transfer Agent Fees

Depositary Fee

Under the Depositary Services Agreement, the Depositary receives annual safekeeping and servicing fees, according to the agreed schedule with the Fund in respect of each Sub-Fund, the rates for which vary according to the country of investment and, in some cases, according to the Class. The depositary fee is payable at the end of each month by the Fund in respect of each Sub-Fund and is accrued on each Valuation Day based on the previous Valuation Day's Net Asset Value and the number of transactions processed. The depositary fees paid by the Fund will not exceed 0.009% per annum of the Net Asset Value of each Sub-Fund with a minimum of EUR 160,000 per year for the Fund (excluding charges for cash flow monitoring, charges for investment restriction duties, safekeeping fees, transaction charges and any other out-of-pocket expenses). These fees may be raised or lowered from time to time to reflect current market practice if agreed between the Fund and the Depositary, in which case the Prospectus will be updated accordingly.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

9. Depositary, Administration and Transfer Agent Fees (continued)

Administrative Fee

Under the Administration Agreement, the Central Administration Agent receives annual administrative fees, according to the agreed schedule with the Fund in respect of each Sub-Fund, the rates for which vary according to the country of investment and, in some cases, according to Class. The administrative fee is payable at the end of each month by the Fund in respect of each Sub-Fund and is accrued on each Valuation Day based on the previous Valuation Day's Net Asset Value and the number of transactions processed during that month.

The administrative fee is calculated by the agreed schedule and shall, in principle, not exceed 0.025% per annum of the Net Asset Value of each Sub-Fund and remains subject to a minimum of EUR 192,000 per year for the Fund. These fees may be raised from time to time to reflect current market practice if agreed between the Fund and the Central Administration Agent, in which case the Prospectus will be updated accordingly. Further, additional transaction fees, share class surcharges, tax calculation charges and maintenance fees for transfer agency services will be levied by the Central Administration Agent.

The corporate secretarial service fees (including domiciliary service) paid by the Fund to the Domiciliary and Corporate Agent will be calculated on time-spent basis with an annual minimum fee of EUR 12,500.

Transfer Agent Fee

The transfer agent fee is payable by the Fund in respect of each Sub-fund and is accrued on each Valuation Day based on the previous Valuation Day's net Asset Value. The transfer agent fee includes Fund maintenance, Share Class maintenance, Shareholder service fees, transaction fees and out-of-pocket fees.

10. Statement of Changes in Portfolio Composition

The statement of the changes in the Schedule of Investments for the year ended 31 December 2024, can be obtained free of charge from the registered office of the Fund (see page 3 for the address).

11. Collateral related to over-the-counter ("OTC") Financial Derivative Instruments

As at 31 December 2024, the Fund has delivered collateral to Counterparties related to OTC financial derivative instruments.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

12. Swing pricing and dilution levy

In certain circumstances, subscriptions, redemptions, and conversions in a Sub-Fund may have a negative impact on the net asset value per Share. Where subscriptions, redemptions, and conversions in the Sub-Fund cause the Sub-Fund to buy and/or sell underlying investments, the value of these investments may be affected by bid/offer spreads, trading costs and related expenses. This investment activity may have a negative impact on the net asset value per Share called dilution. In order to protect existing or remaining investors from the potential effect of dilution, the Fund may apply an anti-dilution levy or a “swing pricing” methodology as part of its daily valuation policy for the following sub-funds: Eleva Euro Bonds Strategies Fund, Eleva Global Bonds Opportunities Fund, Eleva European Multi Opportunities Fund and Eleva Global Multi Opportunities.

The Board of Directors has chosen the partial swing approach. The Fund may apply a “swing pricing” methodology which adjusts the net asset value per Share to account for the aggregate costs of buying and/or selling underlying investments

The net asset value per Share will be adjusted by a certain percentage set by the Board of Directors from time to time for each Sub-Fund called the “swing factor” which represents the estimated bid-offer spread of the assets in which the Sub-Fund invests and estimated tax, trading costs, and related expenses that may be incurred by the Sub-Fund as a result of buying and/or selling underlying investments (called the Swing Factor). Generally, the Swing Factor will not exceed two percent (2%) of the net asset value per Share.

During the period the swing pricing mechanism was applied by the Fund. Swing price adjustments took place 1 time during the period under review at the following date:

- 2 May 2024

13. Significant Events during the Period

Since 13 January 2024, the Management Company new address is:
61 rue des Belles Feuilles
75116, Paris
France

As from 15 January 2024, Eleva Global Multi Opportunities Fund was transited from an article 6 SFDR classification to an article 8.

As from 15 January 2024, a 20% ratio of “sustainable investments” was added to the investment strategies of Eleva European Selection Fund, Eleva Euroland Selection Fund and Eleva Leaders Small & Mid-Cap Europe Fund.

Two new Sub-Funds have been launched with the French ISR Label (V3) :

- ELEVA SRI European Selection Fund on 31 July 2024 ; and
- ELEVA SRI Euroland Selection Fund on 31 July 2024.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Notes to the Financial Statements as at 31 December 2024 (continued)

13. Significant Events during the Period (continued)

Updated versions of the prospectus were dated January, March, July and September 2024.

There were no other significant events during the period that require adjustment to, or disclosure in, the financial statements.

14. Subsequent Events

Further to the notices sent to the shareholders on 23 December 2024, an updated version of the prospectus dated January 2025 has been issued. This new version i.a. encompasses the removal of the ISR Label as from 1 January 2025 regarding ELEVA European Selection Fund, ELEVA Euroland Selection Fund, ELEVA Leaders Small & Mid-Cap Europe Fund.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Appendix (Unaudited)

Appendix 1 – Securities Financing Transactions Regulation

Securities Financing Transaction Regulation (“SFTR”) introduces reporting requirements for securities lending transactions (“SFTs”) and total return swaps.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at 31 December 2024, three Sub-Funds held Securities Lending as types of instruments under the scope of the SFTs.

Global Data

The amount of assets across all SFTs as at 31 December 2024 is as follows:

Eleva European Selection Fund

Type of Asset	Amount*	% of NAV	% of lendable assets
Securities lending	170,466,001	2.60%	2.66%

Eleva Absolute Return Europe Fund

Type of Asset	Amount*	% of NAV	% of lendable assets
Securities lending	93,463,649	2.25%	2.38%

Eleva Euroland Selection Fund

Type of Asset	Amount*	% of NAV	% of lendable assets
Securities lending	6,795,499	0.58%	0.59%

* Market Value of securities on loan

Data on reuse of collateral

There was no collateral reuse during the year ended 31 December 2024.

Appendix 2 – Report on Remuneration (Unaudited)

Remuneration policies and practices – Management Company

The Management Company has established and applies a remuneration policy and practices that are consistent with, and promote, sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profile of the Fund, this Prospectus or the Articles of Incorporation nor impair compliance with the Management Company's obligation to act in the best interests of the Fund (the "Remuneration Policy").

The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Management Company, the Fund and the Shareholders and includes measures to avoid conflicts of interest.

The Remuneration Policy includes fixed and variable components of salaries and applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers, whose professional activities have a material impact on the risk profiles of the Management Company, the Fund or the Sub-Funds. Within the Management Company, these categories of staff represent 44 persons.

The fixed component of the remuneration represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component.

The variable component of the remuneration is based on qualitative and quantitative criteria which include but are not limited to the following ones:

- The individual and collective financial performance;
- Customer service;
- Risk management;
- Quality of the performed tasks;
- Compliance with the internal rules of ethics and regulations;
- Management of the workload and teamwork.

The variable remuneration component of the employee's compensation is not a guaranteed payment, neither in principle nor in amount, and cannot be considered as fixed or quasi-fixed remuneration, even if an employee receives the same amount for several years.

In order to determine the overall budget of the variable component for the salaries, account shall be taken of:

- The overall result of the Management Company;
- The need of the Management Company to meet its capital requirements to face regulatory obligations on the one hand, and to finance its projects on the other;
- Shareholders' expectations regarding the remuneration of their investment.

Eleva UCITS Fund

Société d'Investissement à Capital Variable

Appendix 2 – Report on Remuneration (Unaudited) (continued)

Remuneration policies and practices – Management Company (continued)

In particular, the Remuneration Policy seeks to ensure that:

- a) staff engaged in control functions are compensated in accordance with the achievement of the objectives linked to their functions, independently of the performance of the business areas that they control;
- b) the measurement of performance used to calculate variable remuneration components or pools of variable remuneration components includes a comprehensive adjustment mechanism to integrate all relevant types of current and future risks.

In the context of delegation, the Remuneration Policy seeks to ensure, as required by regulatory requirements that any delegate of the Management Company complies with the following criteria:

- a) the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the Shareholders in order to ensure that the assessment process is based on the longer-term performance of the Fund and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period;
- b) if at any point of time, the management of the Fund were to account for 50% or more of the total portfolio managed by the delegate, at least 50% of any variable remuneration component will have to consist of Shares, equivalent ownership interests, or share-linked instruments or equivalent non-cash instruments with equally effective incentives as any of the instruments referred to in this item b); and
- c) a substantial portion, and in any event at least 40% of the variable remuneration component, is deferred over a period which is appropriate in view of the holding period recommended to the Shareholders and is correctly aligned with the nature of the risks of the Fund.

The variable and fixed remuneration component of the salary will be determined by the partners of the Eleva group once a year in consideration of the overall result of the Management Company.

Also a remuneration committee has been created, which performs its duties in line with the directive 2014/91/EU (UCITS V) in order to evaluate the applicability of the Remuneration Policy and to formulate recommendations when necessary.

The following table shows the fixed and variable remuneration in 2023 for the Identified Staff, who are fully or partly involved in the activities of all the Sub-Funds managed by the Management Company. For the purposes of the disclosures below, where investment management activities have been formally delegated to another entity, the remuneration of the relevant identified staff of the delegate has been excluded, as it is not paid out by the Management Company or the Fund or the Sub-Funds.

Appendix 3 – Risk Disclosure

Summary of Risk Management Process in accordance with the provisions of CSSF Circular 11/512

Value at Risk:

For the Sub-Fund ELEVA Absolute Return Europe, ELEVA Global Bonds Opportunities, ELEVA Euro Bonds Strategies and ELEVA Absolute Return Dynamic, the Value at Risk (VaR) approach is used to monitor and measure the global exposure in accordance with the CSSF Circular 11/512.

Sub-Fund Name	Market Risk	Average Utilisation	Type of Model	Limit	Maximum usage of reg. limit	Minimum usage of reg. limit	Benchmark	Usage of reg. limit as at 30/12/2024	Confidence Interval	Holding period	Effective observation period	Max Leverage (sum of notional)
Eleva Absolute Return Europe Fund	Absolute VaR	5.01%	Historical 3 years	20%	7.02%	3.44%	N/A	3.62%	99%	20 days	251 days	80.64%
Eleva Global Bonds Opportunities Fund	Absolute VaR	3.02%	Monte Carlo	10%	4.96%	2.28%	N/A	3.13%	99%	20 days	242 days	596.53%
Eleva Euro Bonds Strategies Fund	Relative VaR	111.70%	Monte Carlo	200%	152.33%	67.14%	Bloomberg Barclays Euro-Agg	142.42%	99%	20 days	251 days	285.42%
Eleva Absolute Return Dynamic Fund	Absolute VaR	6.97%	Historical 3 years	20%	14.31%	3.49%	N/A	5.28%	99%	20 days	242 days	227.22%

Commitment approach:

For the Sub-Fund Eleva European Selection Fund, Eleva Euroland Selection, Eleva Leaders Small & Mid-Cap Europe, Eleva Impact Sustainable Europe, Eleva European Multi Opportunities Fund, ELEVA Global Multi Opportunities Fund, ELEVA SRI European Selection and ELEVA SRI Euroland Selection, the commitment approach is used to monitor and measure the global exposure in accordance with the CSSF Circular 11/512.

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

All Sub-Fund reported in this financial report except ELEVA European Selection Fund, ELEVA SRI European Selection Fund, ELEVA Euroland Selection Fund, ELEVA SRI Euroland Selection Fund, ELEVA Leaders Small and Mid-Cap Europe Fund, ELEVA Sustainable Impact Europe Fund, ELEVA Absolute Return Europe Fund, ELEVA Absolute Dynamic, and ELEVA Global Multi Opportunities are considered as falling within the scope of Article 6 of the SFDR as they do not promote Sustainability Factors and do not maximize portfolio alignment with Sustainability Factors. The investments underlying the Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities.

ELEVA European Selection Fund, ELEVA SRI European Selection Fund, ELEVA Euroland Selection Fund, ELEVA SRI Euroland Selection Fund, ELEVA Leaders Small and Mid-Cap Europe Fund, ELEVA Absolute Return Europe Fund, ELEVA Absolute Dynamic, and ELEVA Global Multi Opportunities promote Environmental and Social characteristics, within the meaning of Article 8 of the SFDR. ELEVA Sustainable Impact Europe Fund has sustainable investment as its objective, within the meaning of Article 9 of the SFDR.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA European Selection Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ELEVA European Selection Fund

Legal entity identifier: 213800U6H9LM4F8AFZ64

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: ___%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: ___%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA European Selection Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

ELEVA European Selection Fund (the “Sub-Fund”) promoted a combination of environmental, social and governance (“ESG”) characteristics by investing in companies with good ESG practices (i.e best in universe) or companies that were on an improving path regarding ESG practices (i.e best efforts) while excluding companies that had not a minimum ESG rating (40/100).

The Sub-Fund applied the Management Company’s exclusion policy, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.
 - Sector based exclusions: companies involved in the sector (including production or distribution) of controversial weapons (0% of sales threshold), of tobacco (5% of sales threshold) and of nuclear weapons (5% of sales threshold). The Sub-fund also applied ELEVA Capital’s coal policy, available on ELEVA Capital website.
- As of 31/12/2024, the Sub-fund did not hold any position in excluded companies as defined above.
- The weighted average ESG score of the ELEVA European Selection Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe. This implied that the weighted average ESG score of the Sub-Fund may in no case be lower than the average ESG score of the initial investment universe after elimination of the 20% worst companies.
 - A minimum ESG score of 40/100 was required for each company to enter the portfolio.
 - The weight of issuers analysed and scored on ESG criteria with the ELEVA methodology had to be higher than 90% of the invested pocket (i.e. excluding cash).

As of 31/12/2024:

- The Sub-Fund showed a better overall ESG score than its reduced universe: 67/100 for the Sub-Fund against 64/100 for the reduced universe;
- No invested company had an ESG score below 40/100;
- 100% of the invested pocket (i.e. excluding cash) had been analysed and scored through the ELEVA ESG methodology.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA European Selection Fund

● *How did the sustainability indicators perform?*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund had to show, as binding ESG criteria, a better performance than its initial investment universe on the following two ESG key performance indicators: carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2) and exposure to the UN Global Compact signatories (sum of the weights of the UN Global Compact signatories). Moreover, the weighted average ESG score of the Sub-Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe.

As of 31/12/2024, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 93 for the Sub-Fund against 184 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 83% for the SubFund against 64% for the universe;
- Showed a better overall ESG score than its reduced universe: 67/100 for the Sub-Fund against 64/100 for the reduced universe.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● *...and compared to previous periods?*

As of 29/12/2023, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 94 for the Sub-Fund against 200 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 82% for the SubFund against 63% for the universe;
- Showed a better overall ESG score than its reduced universe: 65/100 for the Sub-Fund against 63/100 for the reduced universe.

As of 30/12/2022, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 91 for the Sub-Fund against 246 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 92% for the SubFund against 64% for the universe;
- Showed a better overall ESG score than its reduced universe: 65/100 for the Sub-Fund against 63/100 for the reduced universe.

2022 was the starting point for the comparison of sustainability indicators performance, as the regulation was not yet in force in previous periods.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA European Selection Fund

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As of 2024, the ELEVA European Selection Fund had committed to a minimum share of 20% of sustainable investments (ex-ante). Sustainable investments with environmental objectives might include energy efficiency, renewable energies, sustainable mobility, smart building, sustainable infrastructure, etc. and sustainable investments with social objectives might include health and wellbeing, etc. Please refer to the following question for more details.

In parallel, and although the Sub-Fund has no ex-ante commitment on this particular indicator, the weighted average revenue contribution to the UN SDGs calculated ex-post was 35% as of 31/12/2024 (excluding sovereign bonds, if any).

Lastly, and although the Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy, we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 5.7% (excluding sovereign bonds, if any). Most Taxonomy aligned investments had a positive contribution to climate change mitigation (5.6% of turnover aligned excluding sovereign bonds, if any) and climate change adaptation (0.13% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to transition to a circular economy (0.12% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent were the environmental and/or social characteristics promoted by this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.
- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA European Selection Fund

considered as a sustainable investment, a company must, in addition to the 2 previous criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 46% of the Sub-fund investments passed these criteria and have been classified as sustainable investments measured ex-post.

- — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this financial product consider principal adverse impacts on sustainability factors?”).

- — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The companies that had violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA European Selection Fund

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 2, 10 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 3, 4, 5, 6, 11, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce).

The statement below presents the principal adverse impacts on sustainability factors with respect to ELEVA European Selection, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

What was the proportion of sustainability-related investments?

As of 2024, the Sub-fund had committed to a minimum share of 20% of sustainable investments (ex-ante).

To qualify as sustainable investment (pass or fail), a company must generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

DNSH principle and good governance practices were captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100. The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

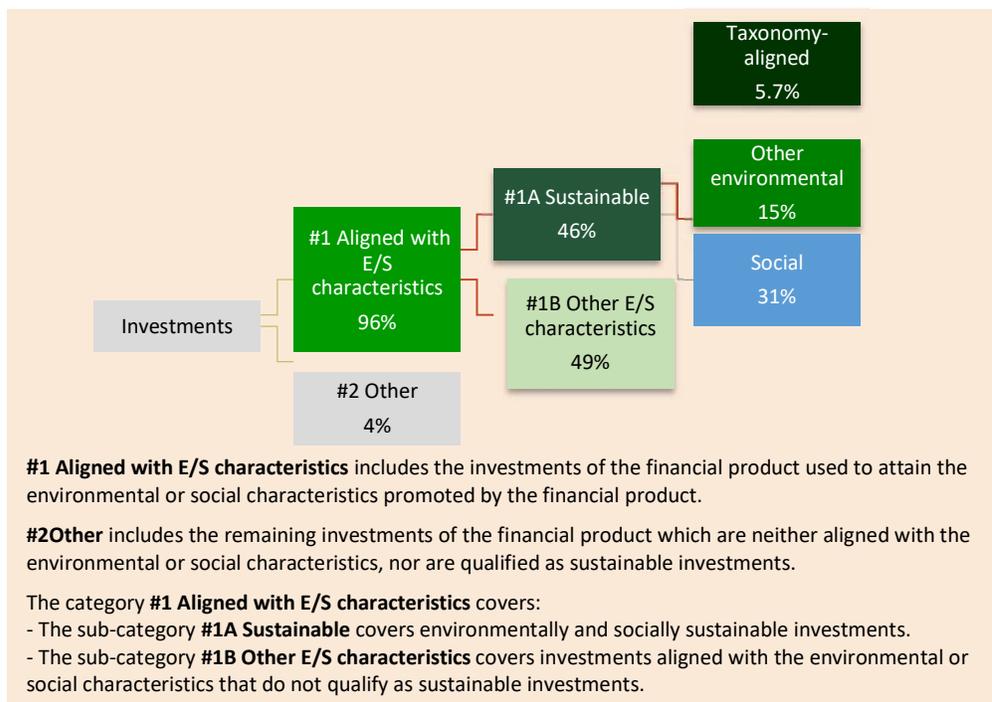

As of 31/12/2024, the ELEVA European Selection Fund had a proportion of sustainable investments of 46% measured ex-post.

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 5.7% (excluding sovereign bonds, if any). However, the category 'Taxonomy-aligned' is not linked to the total 'Sustainable' investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on

our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total ‘Sustainable’ investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital’s definition of sustainable investments is binary i.e. “pass or fail” (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

● **What was the asset allocation?**

Asset allocation describes the share of investments in specific assets.

Historical comparisons:

As of 29/12/2023, the ELEVA European Selection Fund had 97% of investments aligned with E/S characteristics, a proportion of sustainable investments of 42% of which 13% with an environmental objective that were not necessarily aligned with the EU taxonomy, and 29% with a social objective. In parallel, the weighted average Taxonomy alignment was 2.7%.

As of 30/12/2022, the ELEVA European Selection Fund had 98% of investments aligned with E/S characteristics, a proportion of sustainable investments of 36% of which 20% with an environmental objective that were not necessarily aligned with the EU taxonomy, and 16% with a social objective. We did not disclosed the weighted average Taxonomy alignment in the 2022 SFDR periodic report as we were unable to provide reliable figures.

● ***In which economic sectors were the investments made?***

The table below presents the sector exposure of the investments made by ELEVA European Selection, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

Sector	% of assets
Pharmaceuticals	11.18%
Banks	11.10%
Semiconductors & Semiconductor Equipment	5.72%
Chemicals	5.08%
Electrical Equipment	4.85%
Textiles, Apparel & Luxury Goods	4.06%
Insurance	3.98%
Capital Markets	3.80%
Hotels, Restaurants & Leisure	3.45%
Construction Materials	3.30%
Software	3.28%
Aerospace & Defense	3.04%
Electric Utilities	2.94%
Multi-Utilities	2.67%
Machinery	2.61%
Oil, Gas & Consumable Fuels*	2.37%
Automobiles	2.23%
Building Products	1.97%

Household Durables	0.35%
Life Sciences Tools & Services	0.34%
Consumer Staples Distribution & Retail	0.32%
Food Products	0.15%
IT Services	0.13%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

(*) Investments in Oil, Gas & Consumable Fuels corresponded to the fund's exposure to the fossil fuel sector.

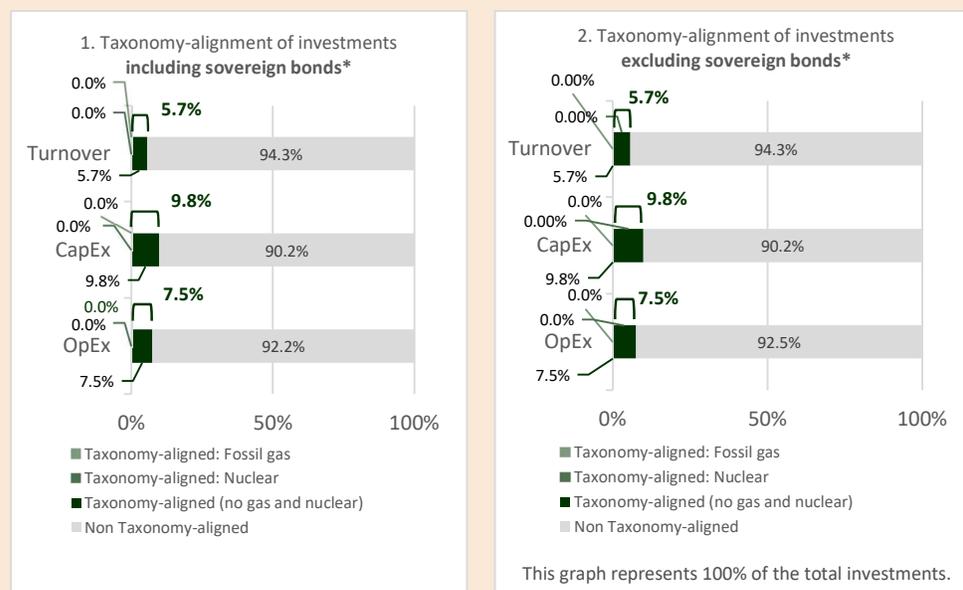

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (5.6% of turnover aligned excluding sovereign bonds, if any) and climate change adaptation (0.13% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to transition to a circular economy (0.12% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation..

● **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.5% of CapEx, and 0.1% of OpEx.
- 5.0% the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 8.4% of CapEx, and 6.6% of OpEx.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparison: as of 29/12/2023, 2.7% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Taxonomy-aligned investments in terms of Turnover, 6.4% of CapEx, and 5.5% of OpEx.

We were unable to provide reliable Environmental taxonomy alignment figures in the 2022 SFDR periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of sustainable investments with an environmental objective that are not necessarily aligned with the EU taxonomy (ex-ante).

As of 31/12/2024: 15% of all investments of the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of socially sustainable investments (ex-ante).

As of 31/12/2024: 31% of all investments of the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, 4% of the Sub-fund investments were not invested with the E/S characteristics and so included under “other”. It consisted of cash, instruments not rated on ESG criteria (e.g. IPOs or among others and UCITS). These investments are notably used for liquidity and/or technical purposes, for which environmental or social safeguards are not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

An internal process has been in place as well as systematic post-trade monitoring to ensure that 81% minimum of net assets of the Sub-fund were “eligible” as per the ESG process in place (hence investments that are aligned with the promoted environmental and social characteristics).

Moreover, individual engagements with companies invested in the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 65 companies held by the Sub-fund during the reference period from 1 January to 31 December 2024, sharing with them a total of 250 engagement areas. ELEVA Capital also participated in 55 Annual General Meetings for equity holdings held by the Sub-fund.

How did this financial product perform compared to the reference benchmark?

Not applicable

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Leaders Small & Mid-Cap Europe Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ELEVA Leaders Small & Mid-Cap Europe Fund Legal entity identifier: 213800VVEQ4W3X4EP562

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Leaders Small & Mid-Cap Europe Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

ELEVA Leaders Small & Mid-Cap Europe Fund (the “Sub-Fund”) promoted a combination of environmental, social and governance (“ESG”) characteristics by investing in companies with good ESG practices (i.e best in universe) or companies that were on an improving path regarding ESG practices (i.e best efforts) while excluding companies that had not a minimum ESG rating (40/100).

The Sub-Fund applied the Management Company’s exclusion policy, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.
 - Sector based exclusions: companies involved in the sector (including production or distribution) of controversial weapons (0% of sales threshold), of tobacco (5% of sales threshold) and of nuclear weapons (5% of sales threshold). The Sub-fund also applied ELEVA Capital’s coal policy, available on ELEVA Capital website.
- As of 31/12/2024, the Sub-fund did not hold any position in excluded companies as defined above.
- The weighted average ESG score of the ELEVA Leaders Small & Mid-Cap Europe Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe. This implied that the weighted average ESG score of the Sub-Fund may in no case be lower than the average ESG score of the initial investment universe after elimination of the 20% worst companies.
 - A minimum ESG score of 40/100 was required for each company to enter the portfolio.
 - The weight of issuers analysed and scored on ESG criteria with the ELEVA methodology had to be higher than 90% of the invested pocket (i.e. excluding cash).

As of 31/12/2024:

- The Sub-Fund showed a better overall ESG score than its reduced universe: 66/100 for the Sub-Fund against 64/100 for the reduced universe;
- No invested company had an ESG score below 40/100;
- 100% of the invested pocket (i.e. excluding cash) had been analysed and scored through the ELEVA ESG methodology.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Leaders Small & Mid-Cap Europe Fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

The Sub-Fund had to show, as binding ESG criteria, a better performance than its initial investment universe on the following two ESG key performance indicators: carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2) and weighted average of employees growth rates. Moreover, the weighted average ESG score of the Sub-Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe.

As of 31/12/2024, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 23 for the Sub-Fund against 92 for the universe;
- Presented a better average employees growth rate (rate calculated between 2022 and 2023) than its initial investment universe: 7.4% for the Sub-Fund against 5.2% for the universe;
- Showed a better overall ESG score than its reduced universe: 66/100 for the Sub-Fund against 64/100 for the reduced universe.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● *...and compared to previous periods?*

As of 29/12/2023, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 30 for the Sub-Fund against 112 for the universe;
- Presented a better average employees growth rate (rate calculated between 2021 and 2022) than its initial investment universe: 9.3% for the SubFund against 7.2% for the universe;
- Showed a better overall ESG score than its reduced universe: 66/100 for the Sub-Fund against 64/100 for the reduced universe.

As of 30/12/2022, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 58 for the Sub-Fund against 129 for the universe;
- Presented a better average employees growth rate (rate calculated between 2020 and 2021) than its initial investment universe: 7.4% for the SubFund against 6.8% for the universe;
- Showed a better overall ESG score than its reduced universe: 64/100 for the Sub-Fund against 63/100 for the reduced universe.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Leaders Small & Mid-Cap Europe Fund

2022 was the starting point for the comparison of sustainability indicators performance, as the regulation was not yet in force in previous periods.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As of 2024, the ELEVA Leaders Small & Mid-Cap Europe Fund had committed to a minimum share of 20% of sustainable investments (ex-ante). Sustainable investments with environmental objectives might include energy efficiency, renewable energies, sustainable mobility, smart building, sustainable infrastructure, etc. and sustainable investments with social objectives might include health and wellbeing, etc. Please refer to the following question for more details.

In parallel, and although the Sub-Fund has no ex-ante commitment on this particular indicator, the weighted average revenue contribution to the UN SDGs calculated ex-post was 34% as of 31/12/2024 (excluding sovereign bonds, if any).

Lastly, and although the Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy, we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 7.2% (excluding sovereign bonds, if any). Most Taxonomy aligned investments had a positive contribution to climate change mitigation (5.7% of turnover aligned excluding sovereign bonds, if any) and climate change adaptation (1.5% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent were the environmental and/or social characteristics promoted by this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Leaders Small & Mid-Cap Europe Fund

- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be considered as a sustainable investment, a company must, in addition to the 2 previous criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 42% of the Sub-fund investments passed these criteria and have been classified as sustainable investments measured ex-post.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this financial product consider principal adverse impacts on sustainability factors?”).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The companies that had violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Leaders Small & Mid-Cap Europe Fund

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 2, 10 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 3, 4, 5, 6, 11, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce).

The statement below presents the principal adverse impacts on sustainability factors with respect to ELEVA Leaders Small & Mid-Cap Europe Fund, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

What were the top investments of this financial product?

The table below presents the top investments made by ELEVA Leaders Small & Mid-Cap Europe, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January - 31 December 2024

Largest investments	Sector	% Assets	Country
Halma PLC	Electronic	2.78%	United Kingdom
Arcadis NV	Professional	2.56%	Netherlands
Euronext NV	Capital Markets	2.43%	Netherlands
Beijer Ref AB	Trading	2.36%	Sweden
AAK AB	Food Products	2.33%	Sweden
Storebrand ASA	Insurance	2.33%	Norway
CTP NV	Real Estate	2.25%	Netherlands
D ieteren SA/NV	Distributors	2.25%	Belgium
Nemetschek SE	Software	2.24%	Germany
Subsea 7 SA	Energy	2.23%	Luxembourg
Gaztransport Et Technigaz SA	Oil, Gas	2.13%	France
Terna Rete Elettrica	Electric Utilities	2.02%	Italy
Viscofan SA	Food Products	2.02%	Spain
FUCHS PETROLUB SE	Chemicals	2.00%	Germany
DKSH Holding AG	Trading	1.94%	Switzerland

What was the proportion of sustainability-related investments?

As of 2024, the Sub-fund had committed to a minimum share of 20% of sustainable investments (ex-ante).

To qualify as sustainable investment (pass or fail), a company must generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

DNSH principle and good governance practices were captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100. The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

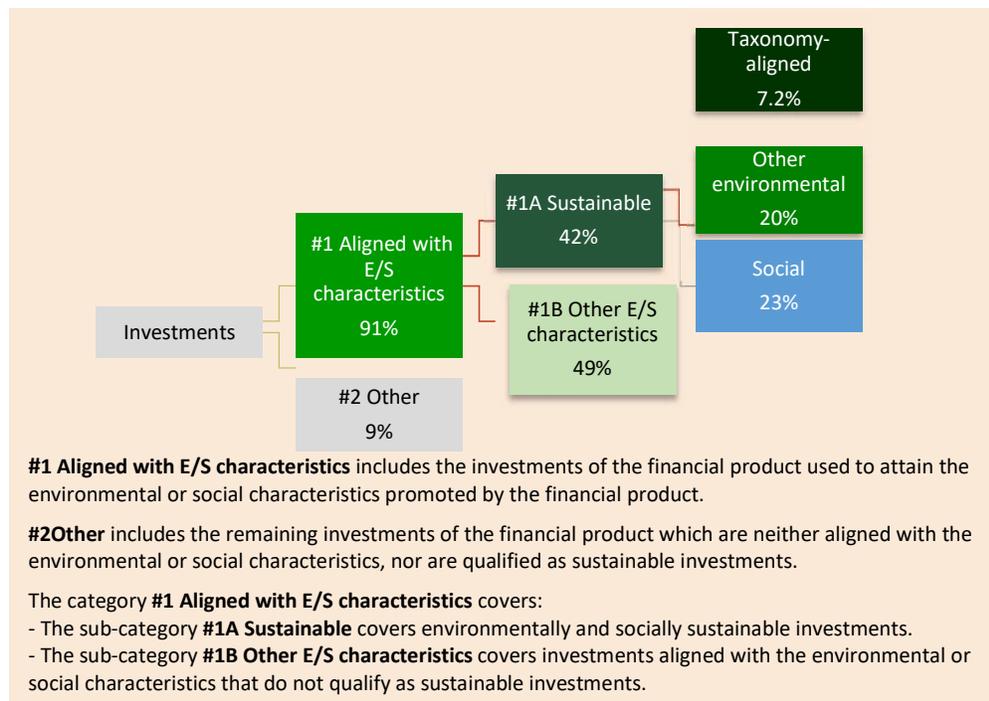

As of 31/12/2024, the ELEVA Leaders Small & Mid-Cap Europe Fund had a proportion of sustainable investments of 42% measured ex-post.

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 7.2% (excluding sovereign bonds, if any). However, the category 'Taxonomy-aligned' is not linked to the total 'Sustainable' investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total 'Sustainable' investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital's definition of sustainable investments is binary i.e. "pass or fail" (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?").

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

Historical comparisons:

As of 29/12/2023, the ELEVA Leaders Small & Mid-Cap Fund had 92% of investments aligned with E/S characteristics, a proportion of sustainable investments of 45% of which 23% with an environmental objective that were not necessarily aligned with the EU taxonomy, and 22% with a social objective. In parallel, the weighted average Taxonomy alignment was 10.1%.

As of 30/12/2022, the ELEVA Leaders Small & Mid-Cap Fund had 91% of investments aligned with E/S characteristics, a proportion of sustainable investments of 28% of which 11% with an environmental objective that were not necessarily aligned with the EU taxonomy, and 17% with a social objective. We did not disclosed the weighted average Taxonomy alignment in the 2022 SFDR periodic report as we were unable to provide reliable figures.

● ***In which economic sectors were the investments made?***

The table below presents the sector exposure of the investments made by ELEVA Leaders Small & Mid-Cap Europe, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

Sector	% of assets
Machinery	8.90%
Capital Markets	5.55%
Trading Companies & Distributors	5.50%
Food Products	4.35%
Commercial Services & Supplies	4.23%
Chemicals	4.05%
Building Products	3.71%
Software	3.41%
Semiconductors & Semiconductor Equipment	3.32%
Real Estate Management & Development	2.86%
Electronic Equipment, Instruments & Components	2.78%
Professional Services	2.69%
Energy Equipment & Services	2.56%
Diversified Telecommunication Services	2.38%
Insurance	2.33%
Leisure Products	2.33%
Distributors	2.25%

Oil, Gas & Consumable Fuels*	2.13%
Interactive Media & Services	2.10%
Electric Utilities	2.02%
Pharmaceuticals	1.84%
Construction Materials	1.78%
Health Care Equipment & Supplies	1.77%
Diversified REITs	1.64%
Health Care Providers & Services	1.64%

Personal Care Products	1.52%
Air Freight & Logistics	1.51%
IT Services	1.19%
Financial Services	1.18%
Textiles, Apparel & Luxury Goods	1.02%
Media	0.88%
Industrial REITs	0.80%
Automobiles	0.67%
Aerospace & Defense	0.61%
Broadline Retail	0.36%
Life Sciences Tools & Services	0.36%
Specialized REITs	0.35%
Specialty Retail	0.27%

(*) Investments in Oil, Gas & Consumable Fuels corresponded to the fund's exposure to the fossil fuel sector.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

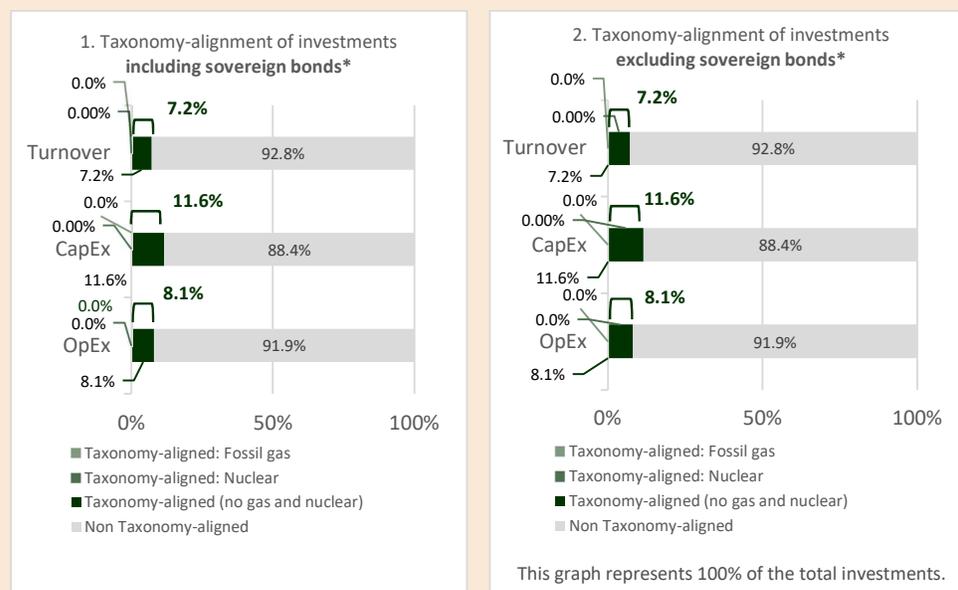

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (5.7% of turnover aligned excluding sovereign bonds, if any) and climate change adaptation (1.5% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- company data and are therefore considered compliant with Article 3 of the Taxonomy regulation. **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.3% of CapEx, and 0.0% of OpEx.
- 4.1% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 6.5% of CapEx, and 4.7% of OpEx.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparison: as of 29/12/2023, 10.1% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Taxonomy-aligned investments in terms of Turnover, 10.8% of CapEx, and 9.5% of OpEx.

We were unable to provide reliable Environmental taxonomy alignment figures in the 2022 SFDR periodic report.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of sustainable investments with an environmental objective that are not necessarily aligned with the EU taxonomy (ex-ante).

As of 31/12/2024: 20% of all investments of the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

What was the share of socially sustainable investments?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of socially sustainable investments (ex-ante).

As of 31/12/2024: 23% of all investments of the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, 9% of the Sub-fund investments were not invested with the E/S characteristics and so included under “other”. It consisted of cash, instruments not rated on ESG criteria (e.g. IPOs or among others and UCITS). These investments are notably used for liquidity and/or technical purposes, for which environmental or social safeguards are not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

An internal process has been in place as well as systematic post-trade monitoring to ensure that 72% minimum of net assets of the Sub-fund were “eligible” as per the ESG process in place (hence investments that are aligned with the promoted environmental and social characteristics).

Moreover, individual engagements with companies invested in the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 53 companies held by the Sub-fund during the reference period from 1 January to 31 December 2024, sharing with them a total of 177 engagement areas. ELEVA Capital also participated in 64 Annual General Meetings for equity holdings held by the Sub-fund.

How did this financial product perform compared to the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: ELEVA Sustainable Impact Europe Fund

Legal entity identifier: 2138001PQ9NN545H2U64

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 36%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 61%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

To what extent was the sustainable investment objective of this financial product met?

ELEVA Sustainable Impact Europe Fund (the “Sub-Fund”) systematically and simultaneously integrated binding environmental, social and governance (“ESG”) characteristics in its investment management process and intended to invest in companies generating, through the products and/or services they sell, a positive contribution on social and/or environmental issues. Indeed, the main non-financial objective of the Sub-Fund was to invest in companies qualifying as sustainable investments.

To attain its sustainable investment objective, the Sub-Fund applied binding elements:

- Strict Exclusion of companies from the initial investment universe which had significant negative impacts on specific ESG topics and matters, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.

- Negative sectors screening: companies deriving more than 5% of their revenues in the following activities: (1) Fossil fuels (including extraction, refining, trading and distribution of conventional and non-conventional oil & gas, thermal coal extraction, electricity production from oil, natural gas, coal or nuclear, activities related to nuclear power production); (2) Tobacco (production and distribution); (3) Alcohol (production and distribution); (4) Weapons (the threshold is 0% for controversial weapons, in line with Ottawa and Oslo treaties); (5) Adult entertainment; and (6) Gambling.

- As of 31/12/2024, the Sub-fund did not hold any position in excluded companies as defined above.

- The Sub-Fund had to reduce its ESG investable universe compared to its initial investment universe by at least 25%, thanks to a minimum ESG score of 60/100 derived from ELEVA Capital proprietary ESG scoring methodology.

As of 31/12/2024:

- All companies invested in the Sub-Fund had been analysed and scored through the ELEVA ESG methodology;

- All invested companies had an ESG score of at least 60/100;

- The ESG investable universe of the Sub-funds had a reduction rate of 63% compared to the initial investment universe.

- For a company to enter the portfolio and to qualify as a sustainable investment (pass or fail), it had to generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

same time not doing significant harm any environmental or social objective and following good governance practices (captured through a set of Exclusions and a minimal ESG score of 60/100). In addition, at the Sub-Fund level, the weighted average revenue contribution to the UN SDGs had to be above 40%.

As of 31/12/2024:

- All companies invested in the Sub-Fund were aligned with this definition of sustainable investment;
- 97% of all investments of the Sub-Fund were composed of sustainable investments (i.e 100% excluding cash): 36% with an environmental objective and 61% with a social objective;
- The weighted average revenue contribution to the UN SDGs was 64%, well above the 40% target.
- Among sustainable investments with an environmental objective, some companies addressed the environmental objectives set out in Article 9 of Regulation (EU) 2020/852.

For instance, as of 31/12/2024:

- The climate change mitigation objective was addressed by the investee company BELIMO HOLDING AG, through energy efficient HVAC technologies which help reduce consumption and curb emissions.
- The transition to a circular economy objective was addressed by the investee company BEFESA SA, through its solutions of recycling of materials and the reintroduction of recycled metals into the market.

Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

- Beyond the EU Taxonomy, sustainable investments with a social objective included for instance as of 31/12/2024:
 - The Health & wellbeing objective was addressed by the investee company NOVO NORDISK A/S, through the sale of diabetes, obesity drugs, and biopharmaceuticals; or AMPLIFON SpA through the sale of accessible hearing devices which help address the increasing hearing loss issue.
 - The Social inclusion objective, notably Access to education, was addressed by the investee company RELX PLC, through its analytics and information-based solutions for scientific, technical, medical, legal, insurance sectors.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● *How did the sustainability indicators perform?*

The sustainability indicators used by the Sub-Fund were (i) ESG scoring, (ii) two ESG key performance indicators – carbon intensity (in tons of CO₂ equivalent/million euros of sales, covering Scope 1+2), and exposure to the UN Global Compact signatories – and (iii) positive contribution to social and/or environmental issues.

(i) ESG Scoring: To be selected, each company had to have a minimum ESG score of 60/100, and a minimum Governance score of 50/100. These minimum ESG and Governance scores play the role of "do no significant harm" test.

As of 31/12/2024:

- All companies invested in the Sub-Fund had been analysed and scored through ELEVA ESG methodology;
- All invested companies had an ESG score of at least 60/100;
- All invested companies had a Governance score of at least 50/100;
- The average ESG score of the Sub-fund was 70/100, against 60/100 for its initial investment universe.

(ii) ESG KPIs: the Sub-Fund had to show a better performance than its initial investment universe on the following two ESG key performance indicators: weighted average of companies' carbon intensity (in tons of CO₂ equivalent/million euros of sales, covering Scope 1+2) and exposure to UN Global Compact signatories (sum of the weights of the UN Global Compact signatories).

As of 31/12/2024, the Sub-fund:

- Had a better performance than its initial investment universe on average carbon intensity (in tons of CO₂ equivalent/million euros of sales): 69 for the fund against 94 for the universe;
- Had a higher exposure to the UN Global Compact signatories (sum of the weights of the UN Global Compact signatories): 86% for the fund against 56% for the universe.

(iii) Positive contribution: the positive contribution of each company was measured through the proportion of revenues of products and/or services which positively contribute to one or more of the United Nations Sustainable Development Goals (the “UN SDGs”). To be selected and qualified as a sustainable investment each company had to generate at least 20% of its revenues with those types of products and services (pass or fail). In addition, at the Sub-Fund level, the weighted average revenue contribution to the UN Sustainable Development Goals, had to be above 40%.

As of 31/12/2024:

- All companies invested in the Sub-Fund were aligned with the definition of sustainable investment;

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

- 97% of all investments of the Sub-Fund were composed of sustainable investments (i.e 100% excluding cash): 36% with an environmental objective and 61% with a social objective;

- The weighted average revenue contribution to the UN SDGs was 64%.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● *...and compared to previous periods?*

As of 29/12/2023:

- The average ESG score of the Sub-fund was 71/100, against 61/100 for its initial investment universe.

- The Sub-fund had a better performance than its initial investment universe on average carbon intensity (in tons of CO2 equivalent/million euros of sales, covering Scope 1+2): 98 for the fund vs 108 for the universe;

- The Sub-fund had a higher exposure to the UN Global Compact signatories (sum of the weights of the UN Global Compact signatories): 85% for the fund against 53% for the universe.

- 97% of all investments of the Sub-Fund were composed of sustainable investments (i.e 100% excluding cash): 48% with an environmental objective and 49% with a social objective;

- The weighted average revenue contribution to the UN SDGs was 71%.

As of 30/12/2022:

- The average ESG score of the Sub-fund was 70/100, against 61/100 for its initial investment universe.

- The Sub-fund had a better performance than its initial investment universe on average carbon intensity (in tons of CO2 equivalent/million euros of sales, covering Scope 1+2): 111 for the fund vs 115 for the universe;

- The Sub-fund had a higher exposure to the UN Global Compact signatories (sum of the weights of the UN Global Compact signatories): 80% for the fund against 51% for the universe.

- 97% of all investments of the Sub-Fund were composed of sustainable investments (i.e 100% excluding cash): 45% with an environmental objective and 52% with a social objective;

- The weighted average revenue contribution to the UN SDGs was 70%.

2022 was the starting point for the comparison of sustainability indicators performance, as the regulation was not yet in force in previous periods.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent was the sustainable investment objective of this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.
- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be considered as a sustainable investment, a company must, in addition to the 2 previous criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 97% of the Sub-fund investments passed these criteria and have been classified as sustainable investments measured ex-post.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this financial product consider principal adverse impacts on sustainability factors?”).

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

In line with the criteria required for the Belgian label “Towards Sustainability”, which the Sub-fund holds, the companies that have violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

As of 31/12/2024, none of the companies invested by the Sub-fund were in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 3, 4, 10 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 2, 5, 6, 11, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce). The quantitative reporting on principal adverse impacts will be available in the annual ESG report of the subfund.

The statement below presents the principal adverse impacts on sustainability factors with respect to ELEVA Sustainable Impact Europe, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

ELEVA Sustainable Impact Europe

What were the top investments of this financial product?

The table below presents the top investments made by ELEVA Sustainable Impact Europe, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January - 31 December 2024

Largest investments	Sector	% Assets	Country
ASML Holding NV	Semiconductors	5.46%	Netherlands
RELX PLC	Professional Services	4.84%	United Kingdom
SAP SE	Software	4.74%	Germany
DSM-Firmenich AG	Chemicals	4.32%	Switzerland
Munich Re	Insurance	4.28%	Germany
Allianz SE	Insurance	4.23%	Germany
Novo Nordisk A/S	Pharmaceuticals	4.08%	Denmark
Novozymes A/S	Chemicals	3.41%	Denmark
Wolters Kluwer NV	Professional Services	3.22%	Netherlands
Koninklijke KPN NV	Diversified	3.03%	Netherlands
Schneider Electric SE	Electrical Equipment	3.02%	France
Cie de Saint-Gobain	Building Products	2.83%	France
Air Liquide SA	Chemicals	2.67%	France
L Oreal SA	Personal Care Products	2.61%	France
Bureau Veritas SA	Professional Services	2.56%	France

What was the proportion of sustainability-related investments?

The Sub-Fund predominantly invested its net assets in the equity of corporate issuers with their registered office in Europe, which the Management Company considered having a positive contribution on social and/or environmental issues. To evaluate this contribution, the Management Company used a proprietary methodology built around the UN SDGs which measures companies' revenues contributions to those Goals.

For a company to enter the portfolio and to qualify as a sustainable investment (pass or fail), it had to generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100). The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

As of 31/12/2024, the asset allocation of ELEVA Sustainable Impact Europe was the following:

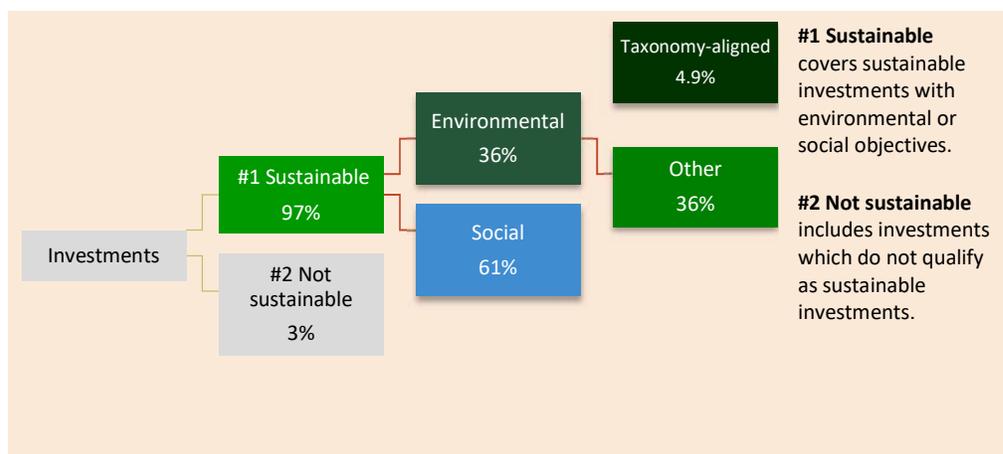

#1 Sustainable: 97% of all investments of the Sub-Fund were composed of sustainable investments (i.e 100% excluding cash): 36% with an environmental objective (not necessarily Taxonomy-aligned) and 61% with a social objective.

#2 Not Sustainable: 3% of all investments of the Sub-Fund were composed of cash.

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 4.9% (excluding sovereign bonds, if any). However, the category ‘Taxonomy-aligned’ is not linked to the total ‘Sustainable’ investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total ‘Sustainable’ investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital’s definition of sustainable investments is binary i.e. “pass or fail” (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

Historical comparisons:

As of 29/12/2023, the ELEVA Sustainable Impact Europe Fund had 97% of all investments composed of sustainable investments (i.e. 100% excluding cash) of which 48% with an environmental objective that were not aligned necessarily with the EU taxonomy, and 49% with a social objective. In parallel, the weighted average Taxonomy alignment was 13.2%.

As of 30/12/2022, the ELEVA Sustainable Impact Europe Fund had 97% of all investments composed of sustainable investments (i.e. 100% excluding cash) of which 45% with an environmental objective that were not necessarily aligned with the EU taxonomy, and 52% with a social objective. We did not disclosed the weighted average Taxonomy alignment in the 2022 SFDR periodic report as we were unable to provide reliable figures.

● *In which economic sectors were the investments made?*

The table below presents the sector exposure of the investments made by ELEVA Sustainable Impact Europe, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

Sector	% of assets
Professional Services	10.63%
Chemicals	10.40%
Insurance	8.50%
Semiconductors & Semiconductor Equipment	7.65%
Software	7.43%
Health Care Equipment & Supplies	6.31%
Electrical Equipment	5.74%
Banks	5.58%
Building Products	4.90%
Commercial Services & Supplies	4.89%
Pharmaceuticals	4.84%
Diversified Telecommunication Services	3.03%
Personal Care Products	2.61%
Electric Utilities	2.46%
Health Care Providers & Services	2.39%
IT Services	1.93%
Trading Companies & Distributors	1.58%
Machinery	1.36%
Life Sciences Tools & Services	1.36%
Independent Power and Renewabl	1.33%
Real Estate Management & Development	1.18%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

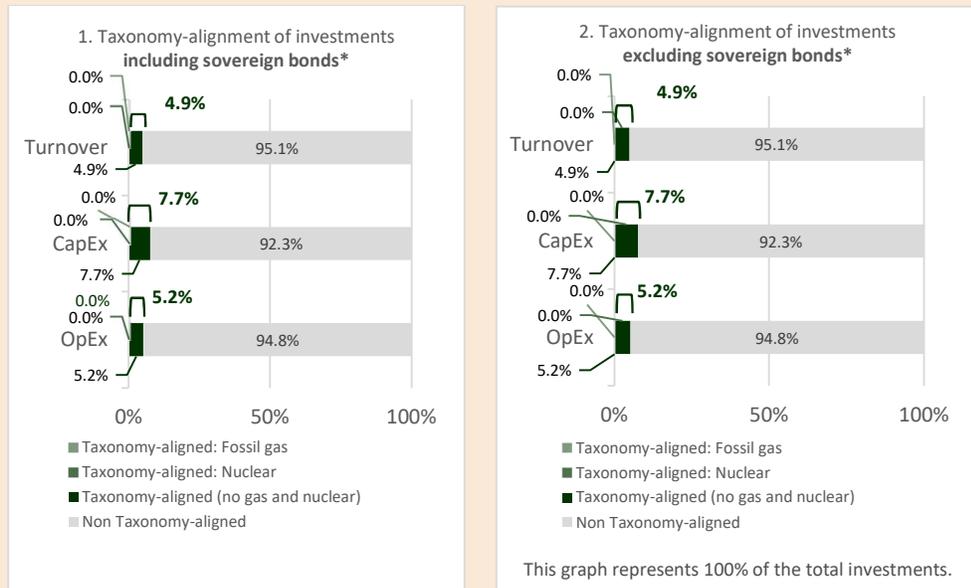

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (4.9% of turnover aligned excluding sovereign bonds, if any) and transition to a circular economy (0.09% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to climate change adaptation (<0.01% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

● **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.2% of CapEx, and 0.0% of OpEx.
- 4.2% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 6.4% of CapEx, and 4.9% of OpEx.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparison: as of 29/12/2023, 13.2% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Taxonomy-aligned investments in terms of Turnover, 13.1% of CapEx, and 12.9% of OpEx.

We were unable to provide reliable Environmental taxonomy alignment figures in the 2022 SFDR periodic report.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As of 2024, the Sub-Fund had committed to a minimum proportion of 30% of sustainable investments with an environmental objective that are not necessarily aligned with the EU taxonomy (ex-ante).

As of 31/12/2024: 36% of all investments of the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Sustainable Impact Europe

What was the share of socially sustainable investments?

As of 2024, the Sub-Fund had committed to a minimum proportion of 30% of socially sustainable investments (ex-ante).

As of 31/12/2024: 61% of all investments of the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, the Sub-Fund invested 3% of its Net Asset Value in cash. As a reminder, investments in cash are usually made for technical purposes. The Sub-Fund did not consider any minimum environmental or social safeguards on these investments” #2 Not Sustainable”.

What actions have been taken to attain the sustainable investment objective during the reference period?

An internal process is in place to only select companies qualified as sustainable investments, as well as systematic ex-post monitoring for:

- 30% minimum of sustainable investments with an environmental objective;
- 30% minimum of sustainable investments with a social objective;
- 80% minimum of sustainable investments (with an environmental or social objective);
- weighted average revenue contribution to the SDGs of at least 40%.

Moreover, individual engagements with companies invested in the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 31 companies held by the Sub-fund during the reference period from 1 January to 31 December 2024, sharing with them a total of 100 engagement areas. ELEVA Capital also participated in 37 Annual General Meetings for equity holdings held by the Sub-fund.

ELEVA Absolute Return Europe Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: ELEVA Absolute Return Europe Fund

Legal entity identifier: 213800FQB3SJZEYKX79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Europe Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

ELEVA Absolute Return Europe Fund (the “Sub-Fund”) promoted a combination of environmental, social and governance (“ESG”) characteristics by investing, on a long basis in companies with good ESG practices (i.e best in universe) or companies that were on an improving path regarding ESG practices (i.e best efforts) while excluding companies that had not a minimum ESG rating (40/100). At the same time, the Sub-Fund does not short any company with excellent ESG practices (i.e with an ESG score >80/100).

Investments in equities and equity related products (e.g. single name FDIs) on both long and short side as well as corporate bonds on a long basis apply the Management Company’s exclusion policy, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.

- Sector based exclusions: companies involved in the sector (including production or distribution) of controversial weapons (0% of sales threshold), of tobacco (5% of sales threshold) and of nuclear weapons (5% of sales threshold). The Sub-fund also applied ELEVA Capital’s coal policy, available on ELEVA Capital website.

- As of 31/12/2024, the Sub-fund did not maintain any long or short position which were not in line with the above-mentioned exclusions.

- The long invested pocket of the ELEVA Absolute Return Europe Fund must have a weighted average ESG score superior to the average ESG score of its initial investment universe.

- A minimum ESG score of 40/100 was required for each company to enter the portfolio on a long basis. This 40/100 threshold also applies to sovereign issuers. At the same time, the Sub-Fund does not short any company with excellent ESG practices (i.e. with an ESG score >80/100).

- The number of issuers analysed and scored on ESG criteria had to be higher than 90% of the long invested pocket (i.e. excluding cash).

As of 31/12/2024:

- The long invested pocket of the Sub-Fund showed a better overall ESG score than its initial universe: 66/100 for the Sub-Fund against 61/100 for the universe;

- No invested company/sovereign issuer of the long book had an ESG score below 40/100;

- In the short book, no company had an ESG score >80/100;

- 100% of the long invested pocket (in number) had been analysed and scored on ESG criteria.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Europe Fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

The long invested pocket (excluding sovereign bonds) of the Sub-Fund had to show, as binding ESG criteria, a better performance than its initial investment universe on the following two ESG key performance indicators: carbon footprint (in tons of CO₂ equivalent/million euros invested, covering Scope 1+2) and exposure to the UN Global Compact signatories (sum of the weights of the UN Global Compact signatories). Moreover, the long invested pocket of the Sub-Fund had to have a weighted average ESG score superior to the average ESG score of its initial investment universe.

As of 31/12/2024, the long invested pocket of the Sub-Fund (excluding sovereign bonds):

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO₂ equivalent/million euros invested, covering Scope 1+2): 93 for the Sub-Fund against 184 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 84% for the SubFund against 64% for the universe.

As of 31/12/2024, the long invested pocket of the Sub-Fund showed a better overall ESG score than its initial universe: 66/100 for the Sub-Fund against 61/100 for the universe.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● *...and compared to previous periods?*

As of 29/12/2023, the long invested pocket of the Sub-Fund (excluding sovereign bonds):

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO₂ equivalent/million euros invested, covering Scope 1+2): 89 for the Sub-Fund against 200 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 83% for the SubFund against 63% for the universe.

As of 29/12/2023, the long invested pocket of the Sub-Fund showed a better overall ESG score than its initial universe: 65/100 for the Sub-Fund against 60/100 for the universe.

As of 30/12/2022, the long invested pocket of the Sub-Fund (excluding sovereign bonds):

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO₂ equivalent/million euros invested, covering Scope 1+2): 65 for the Sub-Fund against 246 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 91% for the SubFund against 64% for the universe.

As of 30/12/2022, the long invested pocket of the Sub-Fund showed a better overall ESG score than its initial universe: 65/100 for the Sub-Fund against 60/100 for the universe.

2022 was the starting point for the comparison of sustainability indicators performance, as the regulation was not yet in force in previous periods.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Europe Fund

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The ELEVA Absolute Return Europe Fund has not committed to a minimum share of sustainable investments (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment (ex-post). Sustainable investments with environmental objectives might include energy efficiency, renewable energies, sustainable mobility, smart building, sustainable infrastructure, etc. and sustainable investments with social objectives might include health and wellbeing, etc. Please refer to the following question for more details.

In parallel, and although the Sub-Fund has no ex-ante commitment on this particular indicator, the weighted average revenue contribution to the UN SDGs calculated ex-post was 19% of the long invested pocket (excluding sovereign bonds, if any) as of 31/12/2024.

Lastly, and although the Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy, we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund's long invested pocket: 5.8% (excluding sovereign bonds, if any). Most Taxonomy aligned investments had a positive contribution to climate change mitigation (5.8% of turnover aligned in the long invested pocket, excluding sovereign bonds if any) and climate change adaptation (0.14% of turnover aligned in the long invested pocket, excluding sovereign bonds if any), and to a lesser extent to transition to a circular economy (0.08% of turnover aligned in the long invested pocket, excluding sovereign bonds if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent were the environmental and/or social characteristics promoted by this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.
- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be

ELEVA UCITS Fund

ELEVA Absolute Return Europe Fund

considered as a sustainable investment, a company must, in addition to the 2 previous criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 41% of the Sub-fundinvestments passed these criteria and have been classified as sustainable investments measured ex-post.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this financial product consider principal adverse impacts on sustainability factors?”).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The companies that had violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Europe Fund

How did this financial product consider principal adverse impacts on sustainability factors?

For long equity and listed corporate bond issuers, the Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 2, 10 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 3, 4, 5, 6, 11, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce).

For private corporate bond issuers, the PAI indicators were taken into consideration in a qualitative way when the data is available.

For long Sovereign issuers, the two Sovereign PAI indicators (GHG Intensity of investee countries and Number of investee countries subject to social violations) were taken into consideration in a qualitative way when the data is available.

The statement below presents the principal adverse impacts on sustainability factors with respect to the long book of ELEVA Absolute Return Europe, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average. The PAI consideration for the Sovereign issuers was added to the Prospectus in 2024 so the historical comparison with 2023 performance is not presented for the two PAIs applicable to investments in sovereigns and supranationals.

What were the top investments of this financial product?

The table below presents the top investments made by ELEVA Absolute Return Europe fund in its long book, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January - 31 December 2024

Largest investments	Sector	% Assets	Country
Novo Nordisk A/S	Pharmaceuticals	4.17%	Denmark
ASML Holding NV	Semiconductors	3.91%	Netherlands
SAP SE	Software	2.84%	Germany
Intesa Sanpaolo SpA	Banks	2.19%	Italy
NatWest Group PLC	Banks	2.10%	United Kingdom
3i Group PLC	Capital Markets	2.10%	United Kingdom
E.ON SE	Multi-Utilities	2.01%	Germany
UCB SA	Pharmaceuticals	1.95%	Belgium
AXA SA	Insurance	1.91%	France
Flutter Entertainment	Hotels, Restaurants	1.80%	Ireland
Rolls-Royce Holdings	Aerospace & Defense	1.79%	United Kingdom
DSM-Firmenich AG	Chemicals	1.76%	Switzerland
Barclays PLC	Banks	1.74%	United Kingdom
Hermes International	Textiles, Apparel	1.71%	France
Publicis Groupe SA	Media	1.68%	France

What was the proportion of sustainability-related investments?

The Sub-fund has not committed to a minimum share of sustainable investments (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment (ex-post).

To qualify as sustainable investment (pass or fail), a company must generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

DNSH principle and good governance practices were captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100. The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

As of 31/12/2024, the ELEVA Absolute Return Europe fund had a proportion of sustainable investments of 41% measured ex-post.

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund's long invested pocket:

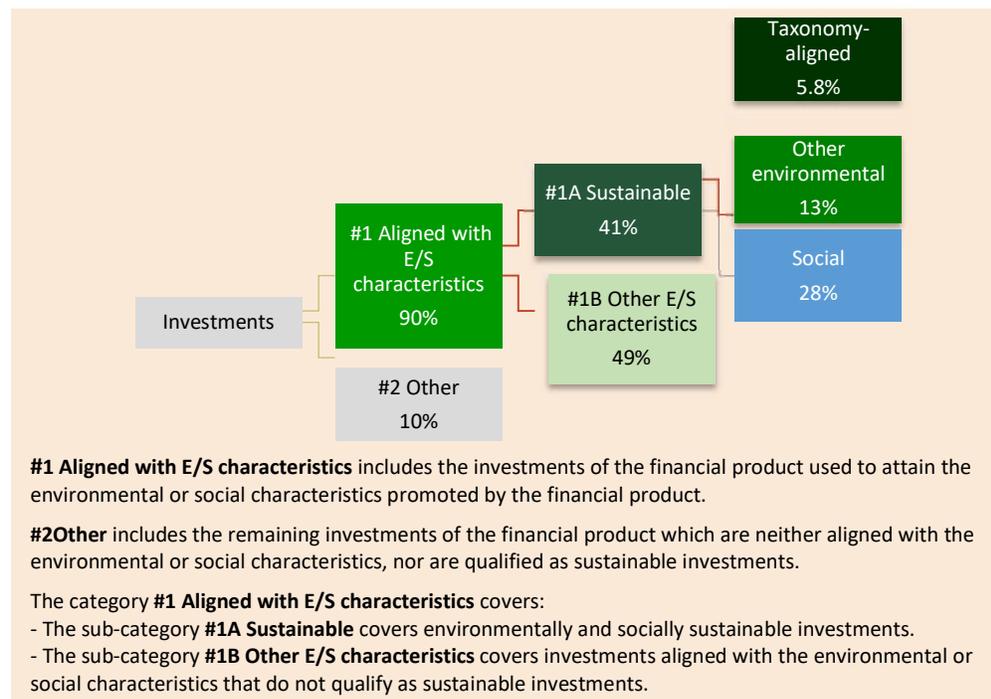

5.8% (excluding sovereign bonds, if any). However, the category ‘Taxonomy-aligned’ is not linked to the total ‘Sustainable’ investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total ‘Sustainable’ investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital’s definition of sustainable investments is binary i.e. “pass or fail” (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

Asset allocation

describes the share of investments in specific assets.

● **What was the asset allocation?**

The #1 Aligned with E/S characteristics: the Sub-Fund invested as of 31/12/2024 90% of its net asset that have been determined as “eligible” as per the ESG process in place (hence in investments that are aligned with the promoted environmental and social characteristics). It is a figure calculated as the sum of corporate and sovereign issuers plus long and short corporate and sovereign single name FDI’s underlying divided by the net asset value of the Sub-Fund. **#2 Other:** As a result, 10% of the Sub-fund investments were not invested with the E/S characteristics. It consisted of cash, instruments not rated on ESG criteria (e.g. IPOs or among others, Index FDI’s and UCITS).

Historical comparisons: we are unable to provide comparable figures due to methodological adjustments implemented in 2024 in order to better align with the CSSF and market expectations.

● ***In which economic sectors were the investments made?***

The table below presents the sector exposure of the investments made by ELEVA Absolute Return Europe fund in its long book, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

Sector	% of assets
Banks	9.83%
Pharmaceuticals	9.43%
Semiconductors & Semiconductor Equipment	4.67%
Chemicals	4.14%
Capital Markets	3.67%
Textiles, Apparel & Luxury Goods	3.52%
Electrical Equipment	3.50%
Insurance	3.41%
Hotels, Restaurants & Leisure	3.25%
Software	2.91%
Multi-Utilities	2.84%
Construction Materials	2.82%
Electric Utilities	2.55%
Aerospace & Defense	2.53%
Machinery	2.36%
Oil, Gas & Consumable Fuels*	2.20%
Health Care Equipment & Supplies	2.12%
Automobiles	2.06%
Personal Care Products	1.93%
Building Products	1.69%
Sovereign Bonds	1.64%
Media	1.56%
Beverages	1.54%
Construction & Engineering	1.51%
Specialty Retail	1.36%
Air Freight & Logistics	1.20%
Paper & Forest Products	0.80%
Broadline Retail	0.78%
Industrial Conglomerates	0.73%
Financial Services	0.63%
Health Care Providers & Services	0.62%
Professional Services	0.53%
Consumer Staples Distribution & Retail	0.53%
Containers & Packaging	0.49%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Industrial REITs	0.47%
Passenger Airlines	0.45%
Household Durables	0.36%
Life Sciences Tools & Services	0.27%
Communications Equipment	0.16%
IT Services	0.11%
Food Products	0.11%

(*) Investments in Oil, Gas & Consumable Fuels corresponded to the fund’s exposure to the fossil fuel sector.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

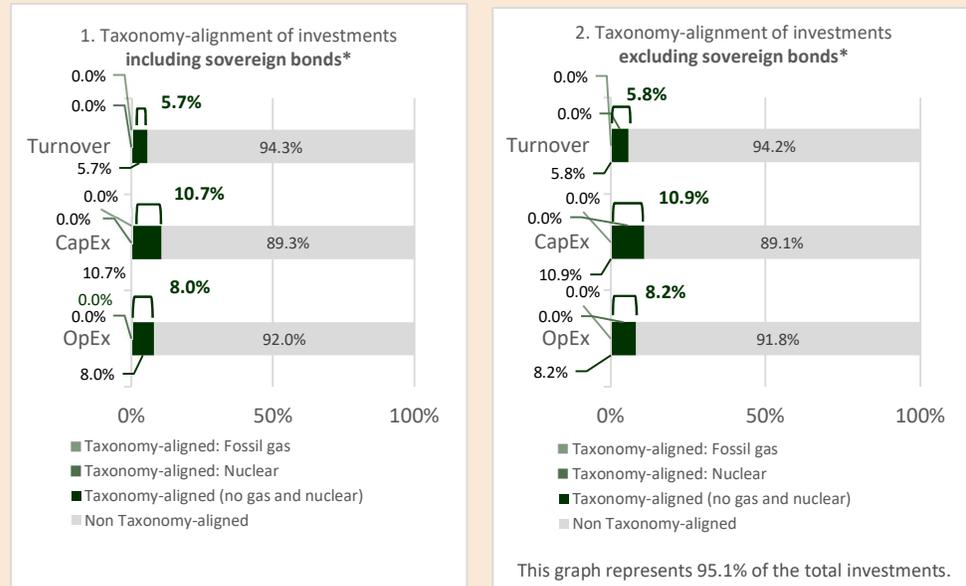

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (5.8% of turnover aligned in the long invested pocket, excluding sovereign bonds if any) and climate change adaptation (0.14% of turnover aligned in the long invested pocket, excluding sovereign bonds if any), and to a lesser extent to transition to a circular economy (0.08% of turnover aligned in the long invested pocket, excluding sovereign bonds if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

● **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the long investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.5% of CapEx, and 0.1% of OpEx.
- 5.1% of the long investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 9.1% of CapEx, and 7.2% of OpEx.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparison: as of 29/12/2023, 2.8% of the long investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Taxonomy-aligned investments in terms of Turnover, 6.5% of CapEx, and 5.2% of OpEx.

We were unable to provide reliable Environmental taxonomy alignment figures in the 2022 SFDR periodic report.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund has not committed to a minimum proportion of sustainable investments with an environmental objective that are not necessarily aligned with EU taxonomy (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment with an environmental objective not necessarily aligned with the EU Taxonomy (ex-post).

As of 31/12/2024: 13% of the investments made by the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

What was the share of socially sustainable investments?

The Sub-Fund has not committed to a minimum proportion of socially sustainable investments (ex-ante) but included in its portfolio investments qualified as socially sustainable according to ELEVA Capital's definition of sustainable investment (ex-post).

As of 31/12/2024: 28% of the investments made by the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, 10% of the Sub-fund investments were not invested with the E/S characteristics and so included under "other". It consisted of cash, instruments not rated on ESG criteria (e.g. IPOs or among others, Index FDI's and UCITS). These investments are notably used for liquidity and/or technical purposes, for which environmental or social safeguards are not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

An internal process has been in place as well as systematic post-trade monitoring to ensure that 75% minimum of net assets of the Sub-fund were “eligible” as per the ESG process in place (hence investments that are aligned with the promoted environmental and social characteristics).

Moreover, individual engagements with companies invested in the long book of the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 68 companies held by the Sub-fund during the reference period from 1 January to 31 December 2024, sharing with them a total of 263 engagement areas. ELEVA Capital also participated in 55 Annual General Meetings for equity holdings held by the Sub-fund.

How did this financial product perform compared to the reference benchmark?

Not applicable

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Dynamic Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ELEVA Absolute Return Dynamic Fund

Legal entity identifier: 2138009ZT5E4YF3VHK86

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Dynamic Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

ELEVA Absolute Return Dynamic Fund (the “Sub-Fund”) promoted a combination of environmental, social and governance (“ESG”) characteristics by investing, on a long basis in companies with good ESG practices (i.e best in universe) or companies that were on an improving path regarding ESG practices (i.e best efforts) while excluding companies that had not a minimum ESG rating. At the same time, the Sub-Fund does not short any company with excellent ESG practices (i.e with an ESG score >80/100).

Investments in equities and equity related products (e.g. single name FDIs) on both long and short side as well as corporate bonds on a long basis apply the Management Company’s exclusion policy, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.

- Sector based exclusions: companies involved in the sector (including production or distribution) of controversial weapons (0% of sales threshold), of tobacco (5% of sales threshold) and of nuclear weapons (5% of sales threshold). The Sub-fund also applied ELEVA Capital’s coal policy, available on ELEVA Capital website.

- As of 31/12/2024, the Sub-fund did not maintain any long or short position which were not in line with the above-mentioned exclusions.

- The long invested pocket of the ELEVA Absolute Return Dynamic Fund must have a weighted average ESG score superior to the average ESG score of its initial investment universe.

- A minimum ESG score of 40/100 was required for each company to enter the portfolio on a long basis. This 40/100 threshold also applies to sovereign issuers. An adjusted minimum ESG score of 30/100 applies to companies incorporated in non-OECD countries. At the same time, the SubFund does not short any company with excellent ESG practices (i.e. with an ESG score >80/100).

- The number of issuers analysed and scored on ESG criteria had to be higher than 90% of the long invested pocket (i.e. excluding cash).

As of 31/12/2024:

- The long invested pocket of the Sub-Fund showed a better overall ESG score than its initial universe: 65/100 for the Sub-Fund against 55/100 for the universe;

- No invested company/sovereign issuer of the long book had an ESG score below 40/100 and no company incorporated in a non-OECD country had an ESG score below 30/100;

- In the short book, no company had an ESG score >80/100;

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Dynamic Fund

- 100% of the long invested pocket (in number) had been analysed and scored on ESG criteria.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The long invested pocket (excluding sovereign bonds) of the Sub-Fund had to show, as binding ESG criteria, a better performance than its initial investment universe on the following two ESG key performance indicators: carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2) and exposure to the UN Global Compact signatories (sum of the weights of the UN Global Compact signatories). Moreover, the long invested pocket of the Sub-Fund had to have a weighted average ESG score superior to the average ESG score of its initial investment universe.

As of 31/12/2024, the long invested pocket of the Sub-Fund (excluding sovereign bonds):

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 79 for the Sub-Fund against 259 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 80% for the SubFund against 39% for the universe.

As of 31/12/2024, the long invested pocket of the Sub-Fund showed a better overall ESG score than its initial universe: 65/100 for the Sub-Fund against 55/100 for the universe.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● ***...and compared to previous periods?***

In view of the very short application period (the ELEVA Absolute Return Dynamic Fund was launched in mid-December 2023), sustainability indicators were not reported for year 2023.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The ELEVA Absolute Return Dynamic Fund has not committed to a minimum share of sustainable investments (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment (ex-post). Sustainable investments with environmental objectives might include energy efficiency, renewable energies, sustainable mobility, smart building, sustainable infrastructure, etc. and sustainable investments with social objectives might include health and wellbeing, etc. Please refer to the following question for more details.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Dynamic Fund

In parallel, and although the Sub-Fund has no ex-ante commitment on this particular indicator, the weighted average revenue contribution to the UN SDGs calculated ex-post was 28% of the long invested pocket (excluding sovereign bonds, if any) as of 31/12/2024.

Lastly, and although the Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy, we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund's long invested pocket: 6.4% (excluding sovereign bonds, if any). Most Taxonomy aligned investments had a positive contribution to climate change mitigation (6.3% of turnover aligned in the long invested pocket, excluding sovereign bonds if any) and climate change adaptation (0.15% of turnover aligned in the long invested pocket, excluding sovereign bonds if any), and to a lesser extent to transition to a circular economy (0.08% of turnover aligned in the long invested pocket, excluding sovereign bonds if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent were the environmental and/or social characteristics promoted by this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.
- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be considered as a sustainable investment, a company must, in addition to the 2 previous criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 46% of the Sub-fund investments passed these criteria and have been classified as sustainable investments measured ex-post.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Dynamic Fund

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this financial product consider principal adverse impacts on sustainability factors?”).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The companies that had violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Absolute Return Dynamic Fund

How did this financial product consider principal adverse impacts on sustainability factors?

For long equity and listed corporate bond issuers, the Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 2, 10 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 3, 4, 5, 6, 11, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce).

For long non-European corporate issuers and private corporate bond issuers, the PAI indicators were taken into consideration in a qualitative way when the data is available.

For long Sovereign issuers, the two Sovereign PAI indicators (GHG Intensity of investee countries and Number of investee countries subject to social violations) were taken into consideration in a qualitative way when the data is available.

The statement below presents the principal adverse impacts on sustainability factors with respect to the long book of ELEVA Absolute Return Dynamic, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average. In view of the very short application period (the ELEVA Absolute Return Dynamic Fund was launched in mid-December 2023), the historical comparison with 2023 performance is not presented.

What were the top investments of this financial product?

The table below presents the top investments made by ELEVA Absolute Return Dynamic fund in its long book, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January - 31 December 2024

Largest investments	Sector	% Assets	Country
Novo Nordisk A/S	Pharmaceuticals	3.83%	Denmark
ASML Holding NV	Semiconductors	3.67%	Netherlands
Siemens AG	Industrial	3.17%	Germany
SAP SE	Software	2.76%	Germany
NatWest Group PLC	Banks	2.42%	United Kingdom
Microsoft Corp	Software	2.40%	United States
Intesa Sanpaolo SpA	Banks	2.39%	Italy
3i Group PLC	Capital Markets	2.11%	United Kingdom
DSM-Firmenich AG	Chemicals	2.07%	Switzerland
Schneider Electric SE	Electrical Equipment	2.04%	France
Flutter Entertainment	Hotels, Restaurants	1.87%	Ireland
Rolls-Royce Holdings	Aerospace & Defense	1.85%	United Kingdom
Barclays PLC	Banks	1.85%	United Kingdom
Compass Group PLC	Hotels, Restaurants	1.73%	United Kingdom
Ferrovial SE	Construction	1.71%	Netherlands

What was the proportion of sustainability-related investments?

The Sub-fund has not committed to a minimum share of sustainable investments (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment (ex-post).

To qualify as sustainable investment (pass or fail), a company must generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

DNSH principle and good governance practices were captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100. The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

As of 31/12/2024, the ELEVA Absolute Return Dynamic fund had a proportion of sustainable investments of 46% measured ex-post.

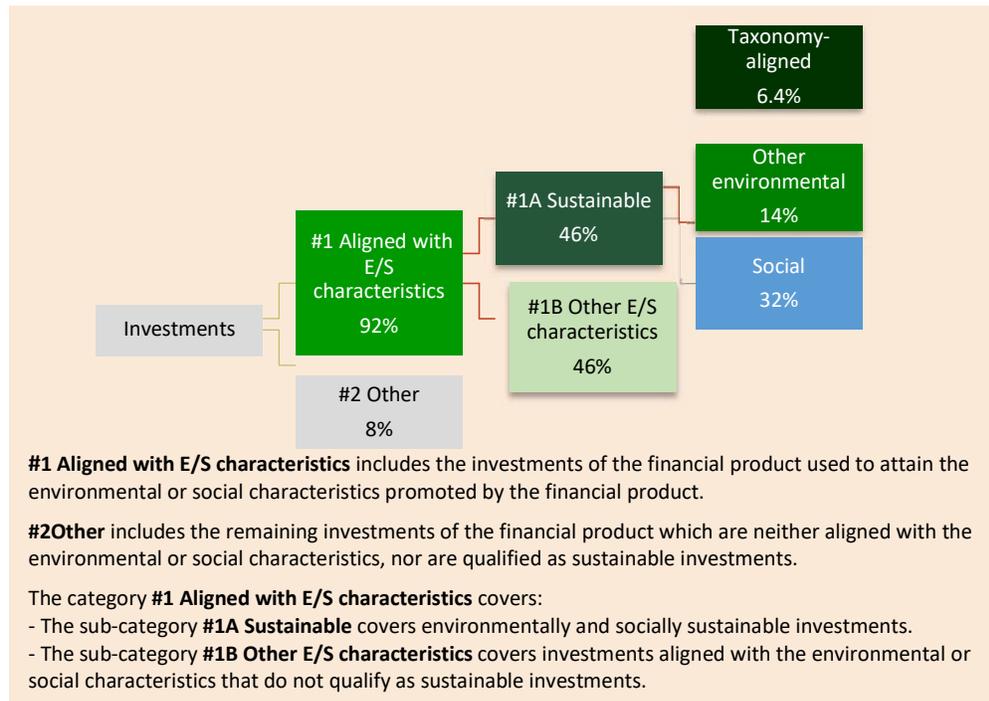

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund's long invested pocket: 6.4% (excluding sovereign bonds, if any). However, the category 'Taxonomy-aligned' is not linked to the total 'Sustainable' investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total 'Sustainable' investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital's definition of sustainable investments is binary i.e. "pass or fail" (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?").

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

The #1 Aligned with E/S characteristics: the Sub-Fund invested as of 31/12/2024 92% of its net asset that have been determined as “eligible” as per the ESG process in place (hence in investments that are aligned with the promoted environmental and social characteristics). It is a figure calculated as as the sum of corporate and sovereign issuers plus long and short corporate and sovereign single name FDIs underlying divided by the net asset value of the Sub-Fund.

#2 Other: As a result, 8% of the Sub-fund investments were not invested with the E/S characteristics. It consisted of cash and instruments not rated on ESG criteria (e.g. IPOs or among others, Index FDIs and UCITS).

Historical comparison: we are unable to provide comparable figures due to methodological adjustments implemented in 2024 in order to better align with the CSSF and market expectations.

● ***In which economic sectors were the investments made?***

The table below presents the sector exposure of the investments made by ELEVA Absolute Return Dynamic fund in its long book long, covering the reference period from 1 January to 31 December 2023 2024 and calculated as a quarterly average.

Sector	% of assets
Sovereign Bonds	9.22%
Banks	8.89%
Pharmaceuticals	7.37%
Software	4.31%
Semiconductors & Semiconductor Equipment	3.95%
Chemicals	3.55%
Capital Markets	3.39%
Electrical Equipment	3.31%
Insurance	3.15%
Textiles, Apparel & Luxury Goods	3.07%
Hotels, Restaurants & Leisure	2.66%
Health Care Equipment & Supplies	2.47%
Construction Materials	2.43%
Industrial Conglomerates	2.33%
Aerospace & Defense	2.15%
Multi-Utilities	2.08%
Machinery	2.08%
Electric Utilities	1.95%
Broadline Retail	1.85%
Automobiles	1.82%
Building Products	1.60%
Beverages	1.37%
Specialty Retail	1.34%
Oil, Gas & Consumable Fuels*	1.32%
Construction & Engineering	1.27%

Interactive Media & Services	0.61%
Health Care Providers & Services	0.58%
Financial Services	0.55%
Professional Services	0.50%
Consumer Staples Distribution & Retail	0.50%

Containers & Packaging	0.46%
Industrial REITs	0.42%
Passenger Airlines	0.30%
Life Sciences Tools & Services	0.27%
Household Durables	0.19%
Commercial Services & Supplies	0.14%
IT Services	0.11%
Food Products	0.09%

(*) Investments in Oil, Gas & Consumable Fuels corresponded to the fund's exposure to the fossil fuel sector.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

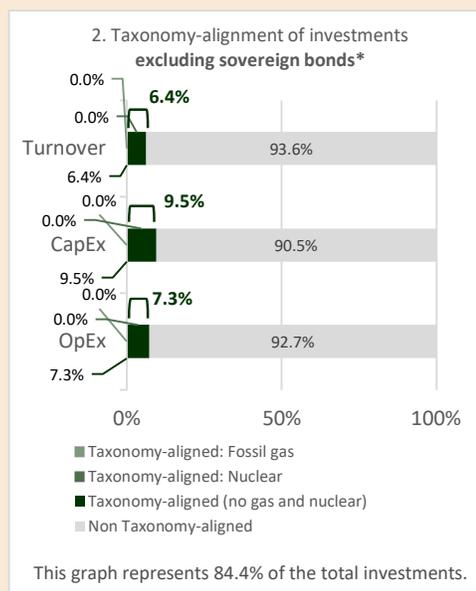

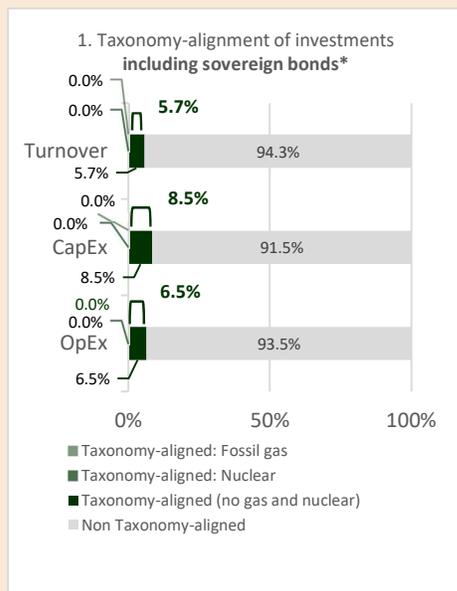

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- ✘ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (6.3% of turnover aligned in the long invested pocket, excluding sovereign bonds if any) and climate change adaptation (0.15% of turnover aligned in the long invested pocket, excluding sovereign bonds if any), and to a lesser extent to transition to a circular economy (0.08% of turnover aligned in the long invested pocket, excluding sovereign bonds if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

● **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the long investments (excluding sovereigns, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.4% of CapEx, and 0.1% of OpEx.
- 5.8% of the long investments (excluding sovereigns, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 7.9% of CapEx, and 6.5% of OpEx.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparison: as of 29/12/2023, 2.6% of the long investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Taxonomy-aligned investments in terms of Turnover, 6.3% of CapEx, and 5.3% of OpEx.

The historical comparison with 2022 performance is not presented since the Sub-Fund was launched in mid-December 2023.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund has not committed to a minimum proportion of sustainable investments with an environmental objective that are not necessarily aligned with EU taxonomy (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment with an environmental objective not necessarily aligned with the EU Taxonomy (ex-post).

As of 31/12/2024: 14% of the investments made by the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

What was the share of socially sustainable investments?

The Sub-Fund has not committed to a minimum proportion of socially sustainable investments (ex-ante) but included in its portfolio investments qualified as socially sustainable according to ELEVA Capital's definition of sustainable investment (ex-post).

As of 31/12/2024: 32% of the investments made by the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, 8% of the Sub-fund investments were not invested with the E/S characteristics and so included under "other". It consisted of cash used for liquidity and/or technical purposes and instruments not rated on ESG criteria (e.g. IPOs (initial public offering) or among others, Index FDIs and UCITS), for which environmental or social safeguards are not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

An internal process has been in place as well as systematic post-trade monitoring to ensure that 75% minimum of net assets of the Sub-fund were "eligible" as per the ESG process in place (hence investments that are aligned with the promoted environmental and social characteristics).

Moreover, individual engagements with companies invested in the long book of the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 81 companies held by the Sub-fund during the reference period from 1 January to 31 December 2024, sharing with them a total of 302 engagement areas. ELEVA Capital also participated in 44 Annual General Meetings for equity holdings held by the Sub-fund.

How did this financial product perform compared to the reference benchmark?

Not applicable

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Euroland Selection Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: ELEVA Euroland Selection Fund

Legal entity identifier: 213800HCY6WWO4AGCE36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 52% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Euroland Selection Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

ELEVA Euroland Selection Fund (the “Sub-Fund”) promoted a combination of environmental, social and governance (“ESG”) characteristics by investing in companies with good ESG practices (i.e best in universe) or companies that were on an improving path regarding ESG practices (i.e best efforts) while excluding companies that had not a minimum ESG rating (40/100).

The Sub-Fund applied the Management Company’s exclusion policy, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.
 - Sector based exclusions: companies involved in the sector (including production or distribution) of controversial weapons (0% of sales threshold), of tobacco (5% of sales threshold) and of nuclear weapons (5% of sales threshold). The Sub-fund also applied ELEVA Capital’s coal policy, available on ELEVA Capital website.
- As of 31/12/2024, the Sub-fund did not hold any position in excluded companies as defined above.
- The weighted average ESG score of the ELEVA Euroland Selection Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe. This implied that the weighted average ESG score of the Sub-Fund may in no case be lower than the average ESG score of the initial investment universe after elimination of the 20% worst companies.
 - A minimum ESG score of 40/100 was required for each company to enter the portfolio.
 - The weight of issuers analysed and scored on ESG criteria with the ELEVA methodology had to be higher than 90% of the invested pocket (i.e. excluding cash).

As of 31/12/2024:

- The Sub-Fund showed a better overall ESG score than its reduced universe: 68/100 for the Sub-Fund against 64/100 for the reduced universe;
- No invested company had an ESG score below 40/100;
- 100% of the invested pocket (i.e. excluding cash) had been analysed and scored through the ELEVA ESG methodology.

ELEVA UCITS Fund

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Euroland Selection Fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

The Sub-Fund had to show, as binding ESG criteria, a better performance than its initial investment universe on the following two ESG key performance indicators: carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2) and exposure to the UN Global Compact signatories (sum of the weights of the UN Global Compact signatories). Moreover, the weighted average ESG score of the Sub-Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe.

As of 31/12/2024, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 122 for the Sub-Fund against 184 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 94% for the SubFund against 64% for the universe;
- Showed a better overall ESG score than its reduced universe: 68/100 for the Sub-Fund against 64/100 for the reduced universe.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● *...and compared to previous periods?*

As of 29/12/2023, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 105 for the Sub-Fund against 200 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 81% for the SubFund against 63% for the universe;
- Showed a better overall ESG score than its reduced universe: 65/100 for the Sub-Fund against 63/100 for the reduced universe.

As of 30/12/2022, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO2 equivalent/million euros invested, covering Scope 1+2): 105 for the Sub-Fund against 246 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 95% for the SubFund against 64% for the universe;
- Showed a better overall ESG score than its reduced universe: 65/100 for the Sub-Fund against 63/100 for the reduced universe.

2022 was the starting point for the comparison of sustainability indicators performance, as the regulation was not yet in force in previous periods.

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Euroland Selection Fund

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As of 2024, the ELEVA Euroland Selection Fund had committed to a minimum share of 20% of sustainable investments (ex-ante). Sustainable investments with environmental objectives might include energy efficiency, renewable energies, sustainable mobility, smart building, sustainable infrastructure, etc. and sustainable investments with social objectives might include health and wellbeing, etc. Please refer to the following question for more details.

In parallel, and although the Sub-Fund has no ex-ante commitment on this particular indicator, the weighted average revenue contribution to the UN SDGs calculated ex-post was 36% as of 31/12/2024 (excluding sovereign bonds, if any).

Lastly, and although the Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy, we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 6.8% (excluding sovereign bonds, if any). Most Taxonomy aligned investments had a positive contribution to climate change mitigation (6.7% of turnover aligned excluding sovereign bonds, if any) and transition to a circular economy (0.18% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to climate change adaptation (0.16% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent were the environmental and/or social characteristics promoted by this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.
- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be considered as a sustainable investment, a company must, in addition to the 2 previous

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Euroland Selection Fund

criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 52% of the Sub-fund investments passed these criteria and have been classified as sustainable investments measured ex-post.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this financial product consider principal adverse impacts on sustainability factors?”).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The companies that had violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Euroland Selection Fund

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 2, 10 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 3, 4, 5, 6, 11, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce).

The statement below presents the principal adverse impacts on sustainability factors with respect to ELEVA Euroland Selection, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

What were the top investments of this financial product?

The table below presents the top investments made by ELEVA Euroland Selection, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January - 31 December 2024

Largest investments	Sector	% Assets	Country
ASML Holding NV	Semiconductors	7.80%	Netherlands
SAP SE	Software	5.31%	Germany
Schneider Electric SE	Electrical Equipment	4.06%	France
Hermes International	Textiles, Apparel	3.33%	France
AXA SA	Insurance	2.81%	France
Intesa Sanpaolo SpA	Banks	2.76%	Italy
Sanofi	Pharmaceuticals	2.66%	France
LVMH Moët Hennessy	Textiles, Apparel	2.47%	France
Publicis Groupe SA	Media	2.35%	France
Inditex SA	Specialty Retail	2.32%	Spain
E.ON SE	Multi-Utilities	2.26%	Germany
UCB SA	Pharmaceuticals	2.19%	Belgium
DSM-Firmenich AG	Chemicals	2.19%	Switzerland
Ferrovial SE	Construction	2.13%	Netherlands
HeidelbergCement AG	Construction Materials	2.07%	Germany

What was the proportion of sustainability-related investments?

As of 2024, the Sub-fund had committed to a minimum share of 20% of sustainable investments (ex-ante).

To qualify as sustainable investment (pass or fail), a company must generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

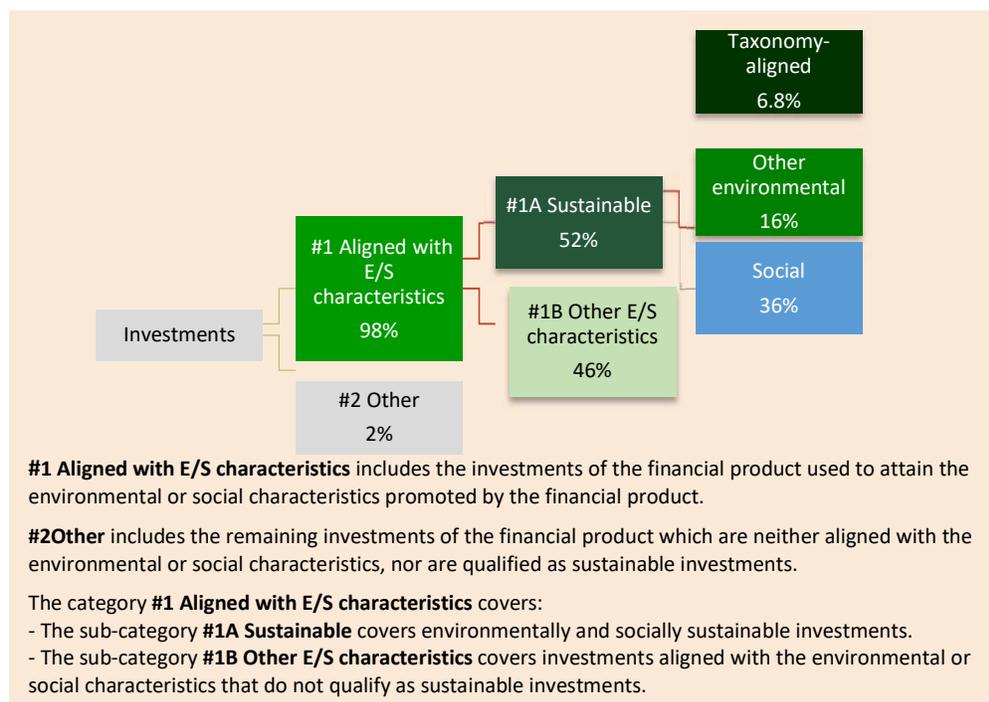

DNSH principle and good governance practices were captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100. The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

As of 31/12/2024, the ELEVA Euroland Selection Fund had a proportion of sustainable investments of 52% measured ex-post.

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 6.8% (excluding sovereign bonds, if any). However, the category ‘Taxonomy-aligned’ is not linked to the total ‘Sustainable’ investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total ‘Sustainable’ investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital’s definition of sustainable investments is binary i.e. “pass or fail” (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

Historical comparisons:

As of 29/12/2023, the ELEVA Euroland Selection Fund had 97% of investments aligned with E/S characteristics, a proportion of sustainable investments of 42% of which 13% with an environmental objective that were not necessarily aligned with the EU taxonomy, and 29% with a social objective. In parallel, the weighted average Taxonomy alignment was 3.9%.

As of 30/12/2022, the ELEVA Euroland Selection Fund had 98% of investments aligned with E/S characteristics, a proportion of sustainable investments of 33% of which 20% with an environmental objective that were not necessarily aligned with the EU taxonomy, and 13% with a social objective. We did not disclose the weighted average Taxonomy alignment in the 2022 SFDR periodic report as we were unable to provide reliable figures.

● ***In which economic sectors were the investments made?***

The table below presents the sector exposure of the investments made by ELEVA Euroland Selection, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

Sector	% of assets
Banks	11.11%
Semiconductors & Semiconductor Equipment	8.83%
Textiles, Apparel & Luxury Goods	6.43%
Electrical Equipment	6.38%
Pharmaceuticals	5.82%
Software	5.74%
Automobiles	4.85%
Insurance	4.78%
Chemicals	3.95%
Construction Materials	3.86%
Multi-Utilities	3.13%
Electric Utilities	2.74%
Specialty Retail	2.69%
Media	2.35%
Capital Markets	2.19%
Construction & Engineering	2.13%
Beverages	2.01%
Industrial Conglomerates	1.90%
Personal Care Products	1.77%
Oil, Gas & Consumable Fuels*	1.71%
Machinery	1.63%
Health Care Providers & Services	1.31%
Paper & Forest Products	1.16%
Air Freight & Logistics	1.11%
Professional Services	0.97%
Trading Companies & Distributors	0.96%
Health Care Equipment & Supplies	0.96%
Hotels, Restaurants & Leisure	0.94%
Financial Services	0.82%
Building Products	0.77%
Passenger Airlines	0.68%
Containers & Packaging	0.60%
Aerospace & Defense	0.47%
Consumer Staples Distribution & Retail	0.40%
Industrial REITs	0.40%
IT Services	0.21%
Food Products	0.10%

(*) Investments in Oil, Gas & Consumable Fuels corresponded to the fund's exposure to the fossil fuel sector.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

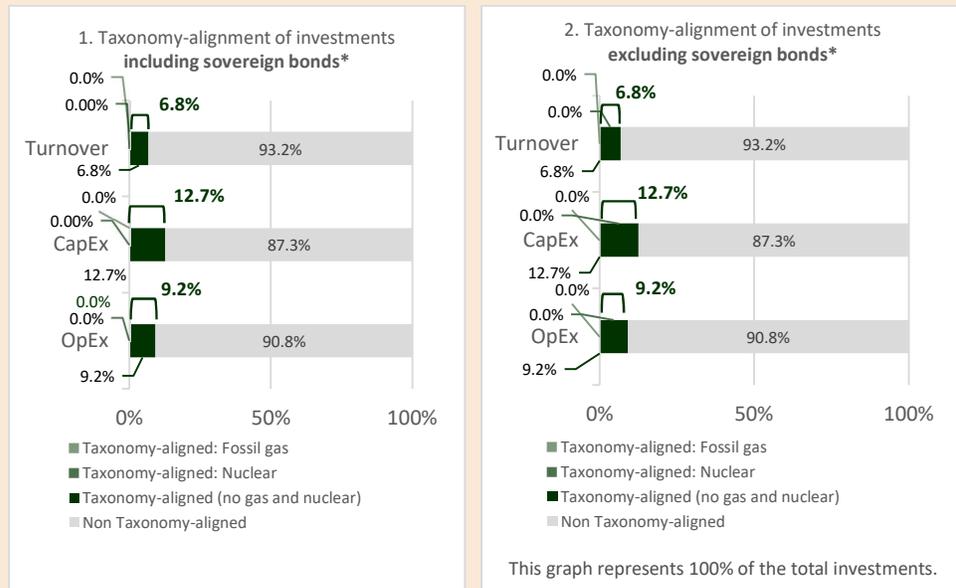

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (6.7% of turnover aligned excluding sovereign bonds, if any) and transition to a circular economy (0.18% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to climate change adaptation (0.16% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

● **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.7% of CapEx, and 0.1% of OpEx.
- 6.0% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 9.7% of CapEx, and 8.0% of OpEx.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparison: as of 29/12/2023, 3.9% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Taxonomy-aligned investments in terms of Turnover, 8.7% of CapEx, and 7.6% of OpEx.

We were unable to provide reliable Environmental taxonomy alignment figures in the 2022 SFDR periodic report.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of sustainable investments with an environmental objective that are not necessarily aligned with the EU taxonomy (ex-ante).

As of 31/12/2024: 16% of all investments of the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

What was the share of socially sustainable investments?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of socially sustainable investments (ex-ante).

As of 31/12/2024: 36% of all investments of the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, 2% of the Sub-fund investments were not invested with the E/S characteristics and so included under “other”. It consisted of cash, instruments not rated on ESG criteria (e.g. IPOs or among others and UCITS). These investments are notably used for liquidity and/or technical purposes, for which environmental or social safeguards are not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

An internal process has been in place as well as systematic post-trade monitoring to ensure that 81% minimum of net assets of the Sub-fund were “eligible” as per the ESG process in place (hence investments that are aligned with the promoted environmental and social characteristics).

Moreover, individual engagements with companies invested in the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 57 companies held by the Sub-fund during the reference period from 1 January to 31 December 2024, sharing with them a total of 202 engagement areas. ELEVA Capital also participated in 45 Annual General Meetings for equity holdings held by the Sub-fund.

How did this financial product perform compared to the reference benchmark?

Not applicable

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Global Multi Opportunities Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ELEVA Global Multi Opportunities Fund

Legal entity identifier: 213800JT1R1Q3JT1UV57

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Global Multi Opportunities Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

ELEVA Global Multi Opportunities Fund (the “Sub-Fund”) promoted a combination of environmental, social and governance (“ESG”) characteristics by investing in companies, sovereign, quasi-sovereign and supra-national issuers with good ESG practices (i.e. best in universe) or that were on an improving path regarding ESG practices (i.e. best efforts).

Investments in equities and equity related products (e.g. single name FDIs) on both long and short side as well as corporate bonds on a long basis apply the Management Company’s exclusion policy, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.

- Sector based exclusions: companies involved in the sector (including production or distribution) of controversial weapons (0% of sales threshold), of tobacco (5% of sales threshold) and of nuclear weapons (5% of sales threshold). The Sub-fund also applied ELEVA Capital’s coal policy, available on ELEVA Capital website.

- As of 31/12/2024, the Sub-fund did not maintain any long or short position which were not in line with the above-mentioned exclusions.

- The long invested pocket of the ELEVA Global Multi Opportunities Fund must have a weighted average ESG score superior to the average ESG score of its initial investment universe.

- A minimum ESG score of 40/100 was required for each company to enter the portfolio on a long basis. This 40/100 threshold also applies to sovereign issuers. An adjusted minimum ESG score of 30/100 applies to companies incorporated in non-OECD countries. At the same time, the SubFund does not short any company with excellent ESG practices (i.e. with an ESG score >80/100).

- The weight of issuers analysed and scored on ESG criteria had to be higher than 90% of the long invested pocket (i.e. excluding cash).

As of 31/12/2024:

- The long invested pocket of the Sub-Fund showed a better overall ESG score than its initial universe: 61/100 for the Sub-Fund against 54/100 for the universe;

- No invested company/sovereign issuer of the long book had an ESG score below 40/100 and no company incorporated in a non-OECD country had an ESG score below 30/100;

- In the short book, no company had an ESG score >80/100;

- 100% of the long invested pocket (in weight) had been analysed and scored on ESG criteria.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Global Multi Opportunities Fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The long invested pocket (excluding sovereign bonds) of the Sub-Fund had to show, as binding ESG criteria, a better performance than its initial investment universe on the following two ESG key performance indicators: carbon footprint (in tons of CO₂ equivalent/million euros invested, covering Scope 1+2) and exposure to the UN Global Compact signatories (sum of the weights of the UN Global Compact signatories). Moreover, the long invested pocket of the Sub-Fund had to have a weighted average ESG score superior to the average ESG score of its initial investment universe.

As of 31/12/2024, the long invested pocket of the Sub-Fund (excluding sovereign bonds):

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO₂ equivalent/million euros invested, covering Scope 1+2): 54 for the Sub-Fund against 329 for the universe;
- Presented a better exposure to the UN Global Compact signatories than its initial investment universe: 67% for the SubFund against 33% for the universe.

As of 31/12/2024, the long invested pocket of the Sub-Fund showed a better overall ESG score than its initial universe: 61/100 for the Sub-Fund against 54/100 for the universe.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● ***...and compared to previous periods?***

Not applicable as the Sub-Fund was categorised under SFDR Article 8 in January 2024 – this is the first reporting iteration.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The ELEVA Global Multi Opportunities Fund has not committed to a minimum share of sustainable investments (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment (ex-post). Sustainable investments with environmental objectives might include energy efficiency, renewable energies, sustainable mobility, smart building, sustainable infrastructure, etc. and sustainable investments with social objectives might include health and wellbeing, etc. Please refer to the following question for more details.

In parallel, and although the Sub-Fund has no ex-ante commitment on this particular indicator, the weighted average revenue contribution to the UN SDGs calculated ex-post was 12% of the long invested pocket (excluding sovereign bonds, if any) as of 31/12/2024.

Lastly, and although the Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy, we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund's long

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Global Multi Opportunities Fund

invested pocket: 4.4% (excluding sovereign bonds, if any). Most Taxonomy aligned investments had a positive contribution to climate change mitigation (4.0% of turnover aligned in the long invested pocket, excluding sovereign bonds if any) and pollution prevention and control (0.02% of turnover aligned in the long invested pocket, excluding sovereign bonds if any), and to a lesser extent to climate change adaptation, sustainable use and protection of water and marine resources, and transition to a circular economy. The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent were the environmental and/or social characteristics promoted by this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.
- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be considered as a sustainable investment, a company must, in addition to the 2 previous criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 12% of the Sub-fund investments passed these criteria and have been classified as sustainable investments measured ex-post.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Global Multi Opportunities Fund

financial product consider principal adverse impacts on sustainability factors?”).

- — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The companies that had violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA Global Multi Opportunities Fund

How did this financial product consider principal adverse impacts on sustainability factors?

For long equity and listed corporate bond issuers, the Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 2, 10 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 3, 4, 5, 6, 11, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce).

For long non-European corporate issuers and private corporate bond issuers, the PAI indicators were taken into consideration in a qualitative way when the data is available.

For long Sovereign issuers, the two Sovereign PAI indicators (GHG Intensity of investee countries and Number of investee countries subject to social violations) were taken into consideration in a qualitative way when the data is available.

The statement below presents the principal adverse impacts on sustainability factors with respect to the long book of ELEVA Global Multi Opportunities, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average. The historical comparison with 2023 performance is not presented since the Sub-Fund was categorised under SFDR Article 8 in January 2024 – this is the first reporting iteration.

What were the top investments of this financial product?

The table below presents the top investments made by ELEVA Global Multi Opportunities fund in its long book, covering the reference period from 1 January to 31 December 2024 and calculated as a quarterly average.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January - 31 December 2024

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	4.62%	United States
Novo Nordisk A/S	Pharmaceuticals	4.56%	Denmark
ASML Holding NV	Semiconductors	4.02%	Netherlands
Amazon.com Inc	Broadline Retail	2.83%	United States
UniCredit SpA	Banks	2.18%	Italy
Galderma Group AG	Pharmaceuticals	2.12%	Switzerland
3i Group PLC	Capital Markets	1.82%	United Kingdom
PDD Holdings Inc	Broadline Retail	1.73%	Cayman Islands
NVIDIA Corp	Semiconductors	1.73%	United States
TSMC	Semiconductors	1.63%	Taiwan
Eli Lilly & Co	Pharmaceuticals	1.57%	United States
Sandoz Group AG	Pharmaceuticals	1.44%	Switzerland
Progressive	Insurance	1.37%	United States
Hermes International	Textiles, Apparel	1.33%	France
Prada SpA	Textiles, Apparel	1.31%	Italy

What was the proportion of sustainability-related investments?

The Sub-fund has not committed to a minimum share of sustainable investments (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment (ex-post).

To qualify as sustainable investment (pass or fail), a company must generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

DNSH principle and good governance practices were captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100. The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

As of 31/12/2024, the ELEVA Global Multi Opportunities fund had a proportion of sustainable investments of 12% measured ex-post.

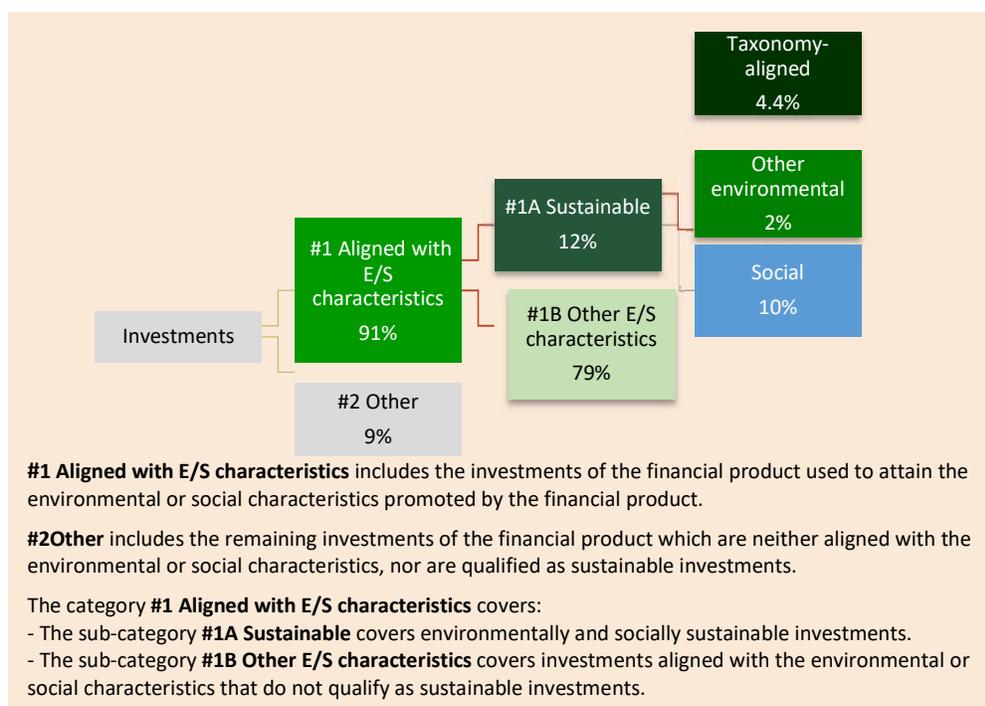

Asset allocation describes the share of investments in specific assets.

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund's long invested pocket: 4.4% (excluding sovereign bonds, if any). However, the category 'Taxonomy-aligned' is not linked to the total 'Sustainable' investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total 'Sustainable' investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital's definition of sustainable investments is binary i.e. "pass or fail" (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?").

● **What was the asset allocation?**

The #1 Aligned with E/S characteristics: the Sub-Fund invested as of 31/12/2024 91% of its net asset that have been determined as “eligible” as per the ESG process in place (hence in investments that are aligned with the promoted environmental and social characteristics). It is a figure calculated as as the sum of corporate and sovereign issuers plus long and short corporate and sovereign single name FDIs underlying divided by the net asset value of the Sub-Fund.

#2 Other: As a result, 9% of the Sub-fund investments were not invested with the E/S characteristics. It consisted of cash and instruments not rated on ESG criteria (e.g. IPOs or among others, Index FDIs and UCITS).

Historical comparisons are not applicable as the Sub-Fund was categorised under SFDR Article 8 in January 2024 – this is the first reporting iteration.

● **In which economic sectors were the investments made?**

The table below presents the sector exposure of the investments made by ELEVA Global Multi Opportunities fund in its long book long, covering the reference period from 1 January to 31 December 2023 2024 and calculated as a quarterly average.

Sector	% of assets
Semiconductors & Semiconductor Equipment	10.33%
Pharmaceuticals	7.88%

Financial Services	0.21%
Passenger Airlines	0.13%
Professional Services	0.11%
Consumer Staples Distribution & Retail	0.06%

(*)

Investments in Oil, Gas & Consumable Fuels corresponded to the fund's exposure to the fossil fuel sector.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

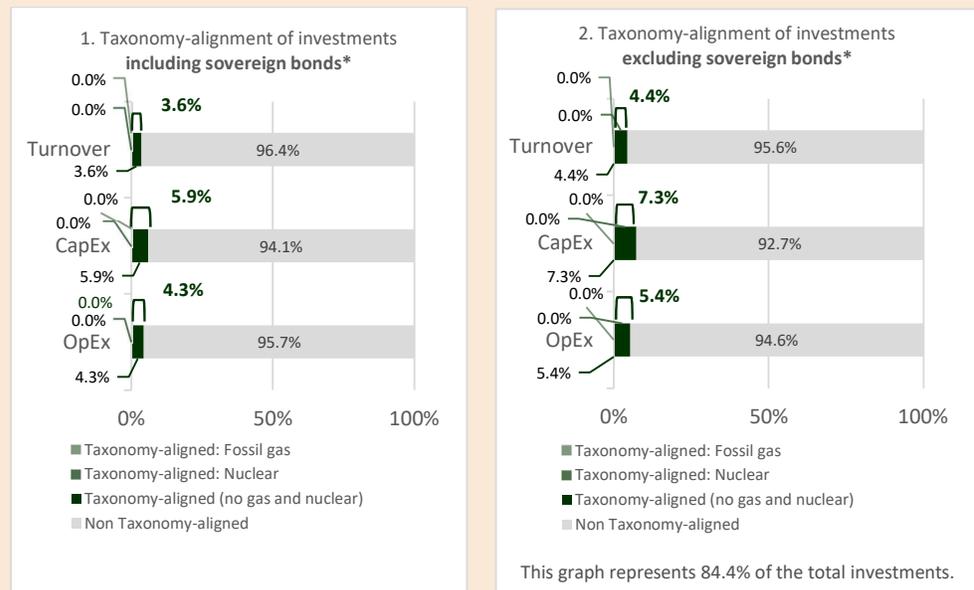

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (4.0% of turnover aligned in the long invested pocket, excluding sovereign bonds if any) and pollution prevention and control (0.02% of turnover

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

aligned in the long invested pocket, excluding sovereign bonds if any), and to a lesser extent to climate change adaptation, sustainable use and protection of water and marine resources, and transition to a circular economy. The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

● **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the long investments (excluding sovereigns, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.4% of CapEx, and 0.5% of OpEx.
- 3.2% of the long investments (excluding sovereigns, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 4.0% of CapEx, and 3.8% of OpEx.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparisons are not applicable as the Sub-Fund was categorised under SFDR Article 8 in January 2024 – this is the first reporting iteration.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund has not committed to a minimum proportion of sustainable investments with an environmental objective that are not necessarily aligned with EU taxonomy (ex-ante) but included in its portfolio investments qualified as sustainable according to ELEVA Capital's definition of sustainable investment with an environmental objective not necessarily aligned with the EU Taxonomy (ex-post).

As of 31/12/2024: 2% of the investments made by the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

What was the share of socially sustainable investments?

The Sub-Fund has not committed to a minimum proportion of socially sustainable investments (ex-ante) but included in its portfolio investments qualified as socially sustainable according to ELEVA Capital's definition of sustainable investment (ex-post).

As of 31/12/2024: 10% of the investments made by the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, 9% of the Sub-fund investments were not invested with the E/S characteristics and so included under “other”. It consisted of cash used for liquidity and/or technical purposes and instruments not rated on ESG criteria (e.g. IPOs (initial public offering) or among others, Index FDIs and UCITS), for which environmental or social safeguards are not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

An internal process has been in place as well as systematic post-trade monitoring to ensure that 51% minimum of net assets of the Sub-fund were “eligible” as per the ESG process in place (hence investments that are aligned with the promoted environmental and social characteristics).

Moreover, individual engagements with companies invested in the long book of the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 93 companies held by the Sub-fund during the reference period from 1 January to 31 December 2024, sharing with them a total of 302 engagement areas. ELEVA Capital also participated in 51 Annual General Meetings for equity holdings held by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI Euroland Selection Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: ELEVA SRI Euroland Selection Fund

Legal entity identifier: 21380096DN71L5JQQG07

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI Euroland Selection Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

ELEVA SRI Euroland Selection Fund (the “Sub-Fund”) promoted a combination of environmental, social and governance (“ESG”) characteristics by investing in companies with good ESG practices (i.e best in universe) or companies that were on an improving path regarding ESG practices (i.e best efforts) while excluding companies that had not a minimum ESG rating (40/100).

The Sub-Fund applied the Management Company’s exclusion policy, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.
- Sector based exclusions: companies involved in the sector (including production or distribution) of controversial weapons (0% of sales threshold), of tobacco (5% of sales threshold) and of nuclear weapons (5% of sales threshold). The Sub-fund also applied ELEVA Capital’s coal policy, available on ELEVA Capital website.

In addition to the Management Company’s exclusion policy, the Sub-Fund applies the exclusion standard from the French SRI label (v3) related to Oil & Gas (developers; and 5% threshold for unconventional), as well as power generation (threshold expressed in gCO₂eq/kWh). For more information, please refer to the ESG Policy, available on ELEVA Capital website.

- As of 31/12/2024, the Sub-fund did not hold any position in excluded companies as defined above.

- The weighted average ESG score of the ELEVA SRI Euroland Selection Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe. This implied that the weighted average ESG score of the Sub-Fund may in no case be lower than the average ESG score of the initial investment universe after elimination of the 30% worst companies in market capitalization weight.
- A minimum ESG score of 40/100 was required for each company to enter the portfolio.
- The weight of issuers analysed and scored on ESG criteria with the ELEVA methodology had to be higher than 90% of the invested pocket (i.e. excluding cash).

As of 31/12/2024:

- The Sub-Fund showed a better overall ESG score than its reduced universe: 69/100 for the Sub-Fund against 68/100 for the reduced universe;

- No invested company had an ESG score below 40/100;

- 100% of the invested pocket (i.e. excluding cash) had been analysed and scored through the ELEVA ESG methodology.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI Euroland Selection Fund

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Fund had to show, as binding ESG criteria, a better performance than its initial investment universe (in market capitalisation weight) on the following two ESG key performance indicators: carbon footprint (in tons of CO₂ equivalent/million euros invested, covering Scope1+2+3) and exposure to companies without processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (sum of the weights).. Moreover, the weighted average ESG score of the Sub-Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe.

As of 31/12/2024, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO₂ equivalent/million euros invested, Scope 1+2+3): 275 for the Sub-Fund against 681 for the universe;
- Presented a better exposure to companies without processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises than its initial investment universe: 95% for the SubFund against 84% for the universe;
- Showed a better overall ESG score than its reduced universe: 69/100 for the Sub-Fund against 68/100 for the reduced universe.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● **...and compared to previous periods?**

Not applicable as the Sub-Fund was launched on 1 August 2024 – this is the first reporting iteration.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

As of 2024, the ELEVA SRI Euroland Selection Fund had committed to a minimum share of 20% of sustainable investments (ex-ante). Sustainable investments with environmental objectives might include energy efficiency, renewable energies, sustainable mobility, smart building, sustainable infrastructure, etc. and sustainable investments with social objectives might include health and wellbeing, etc. Please refer to the following question for more details.

In parallel, and although the Sub-Fund has no ex-ante commitment on this particular indicator, the weighted average revenue contribution to the UN SDGs calculated ex-post was 38% as of 31/12/2024 (excluding sovereign bonds, if any).

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI Euroland Selection Fund

Lastly, and although the Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy, we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 7.5% (excluding sovereign bonds, if any). Most Taxonomy aligned investments had a positive contribution to climate change mitigation (7.4% of turnover aligned excluding sovereign bonds, if any) and transition to a circular economy (0.20% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to climate change adaptation (0.13% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent were the environmental and/or social characteristics promoted by this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.
- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be considered as a sustainable investment, a company must, in addition to the 2 previous criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 56% of the Sub-fund investments passed these criteria and have been classified as sustainable investments measured ex-post.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI Euroland Selection Fund

- — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this financial product consider principal adverse impacts on sustainability factors?”).

- — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The companies that had violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI Euroland Selection Fund

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 2, 10, 11 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 3, 4, 5, 6, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce).

The statement below presents the principal adverse impacts on sustainability factors with respect to ELEVA SRI Euroland Selection, covering the period from the launch of the Sub-Fund on 1 August 2024 to 31 December 2024 and calculated as an average of the third and fourth quarters. The historical comparison with 2023 performance is not presented since the Sub-Fund was launched in August 2024.

AXA SA	Insurance	3.47%	France
Iberdrola SA	Electric Utilities	3.20%	Spain
Intesa Sanpaolo SpA	Banks	3.12%	Italy
Inditex SA	Specialty Retail	2.98%	Spain
UCB SA	Pharmaceuticals	2.83%	Belgium
Prysmian SpA	Electrical Equipment	2.73%	Italy
Fresenius SE & Co	Health Care Providers	2.54%	Germany
Publicis Groupe SA	Media	2.54%	France
RELX PLC	Professional Services	2.29%	United Kingdom
Ferrovial SE	Construction	2.27%	Netherlands

What was the proportion of sustainability-related investments?

As of 2024, the Sub-fund had committed to a minimum share of 20% of sustainable investments (ex-ante).

To qualify as sustainable investment (pass or fail), a company must generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

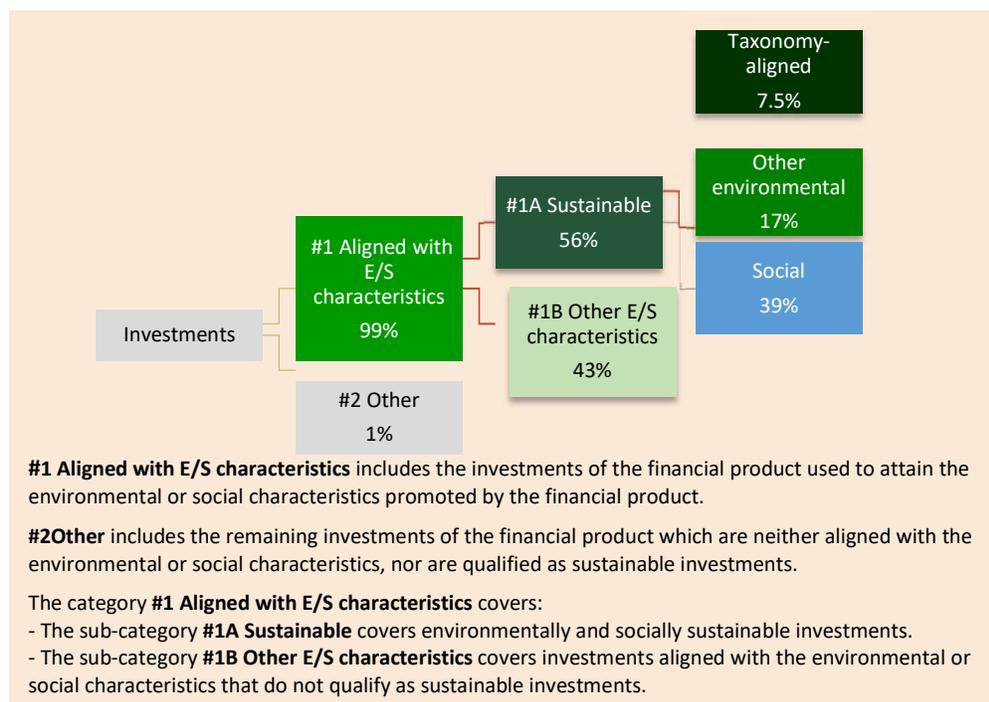

DNSH principle and good governance practices were captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100. The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

As of 31/12/2024, the ELEVA SRI Euroland Selection Fund had a proportion of sustainable investments of 56% measured ex-post.

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 7.5% (excluding sovereign bonds, if any). However, the category ‘Taxonomy-aligned’ is not linked to the total ‘Sustainable’ investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total ‘Sustainable’ investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital’s definition of sustainable investments is binary i.e. “pass or fail” (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

Historical comparisons are not applicable as the Sub-Fund was launched on 1 August 2024 – this is the first reporting iteration.

● ***In which economic sectors were the investments made?***

The table below presents the sector exposure of the investments made by ELEVA SRI Euroland Selection, covering the reference period from the launch of the Sub-Fund on 1 August 2024 to 31 December 2024 and calculated as an average of the third and fourth quarters.

Sector	% of assets
Banks	10.62%
Electrical Equipment	8.62%
Semiconductors & Semiconductor Equipment	7.94%
Pharmaceuticals	6.99%
Insurance	6.83%
Textiles, Apparel & Luxury Goods	6.69%
Software	6.29%
Automobiles	4.99%
Multi-Utilities	3.86%
Specialty Retail	3.41%
Electric Utilities	3.20%
Capital Markets	2.85%
Health Care Providers & Services	2.54%
Media	2.54%
Professional Services	2.29%
Construction & Engineering	2.27%
Chemicals	2.14%
Construction Materials	1.93%
Beverages	1.79%
Industrial Conglomerates	1.67%
Building Products	1.53%
Air Freight & Logistics	1.15%
Machinery	1.12%
Containers & Packaging	1.04%
Personal Care Products	0.81%
Industrial REITs	0.68%
Hotels, Restaurants & Leisure	0.65%
Food Products	0.44%
Health Care Equipment & Supplies	0.38%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

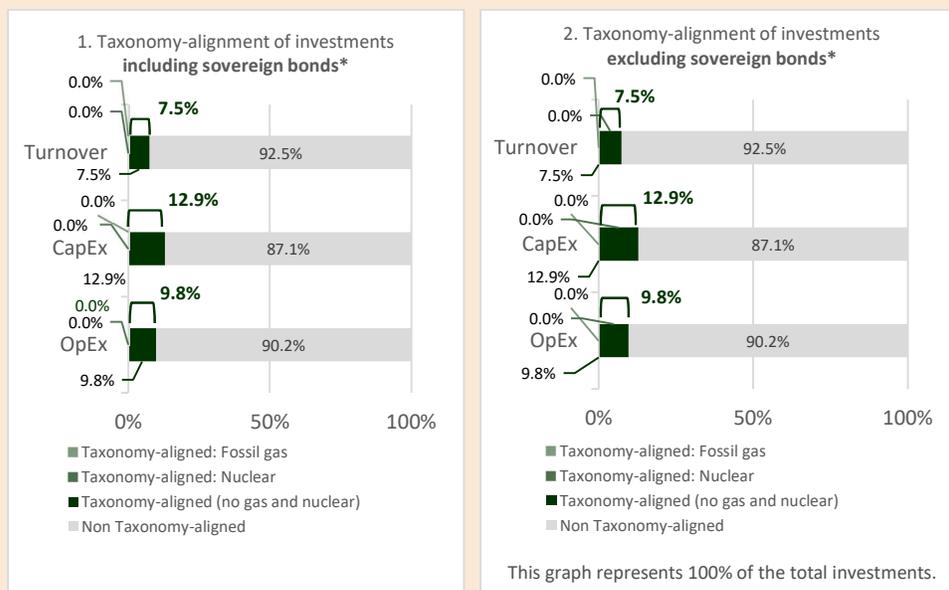

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (7.4% of turnover aligned excluding sovereign bonds, if any) and transition to a circular economy (0.20% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to climate change adaptation(0.13% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

● **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.4% of CapEx, and 0.0% of OpEx.
- 6.6% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 10.4% of CapEx, and 8.5% of OpEx.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparisons are not applicable as the Sub-Fund was launched on 1 August 2024 – this is the first reporting iteration.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of sustainable investments with an environmental objective that are not necessarily aligned with the EU taxonomy (ex-ante).

As of 31/12/2024: 17% of all investments of the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

What was the share of socially sustainable investments?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of socially sustainable investments (ex-ante).

As of 31/12/2024: 39% of all investments of the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, 1% of the Sub-fund investments were not invested with the E/S characteristics and so included under “other”. It consisted of cash, instruments not rated on ESG criteria (e.g. IPOs or among others and UCITS). These investments are notably used for liquidity and/or technical purposes, for which environmental or social safeguards are not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

An internal process has been in place as well as systematic post-trade monitoring to ensure that 81% minimum of net assets of the Sub-fund were “eligible” as per the ESG process in place (hence investments that are aligned with the promoted environmental and social characteristics).

Moreover, individual engagements with companies invested in the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 44 companies held by the Sub-fund during the reference period from the launch of the Sub-Fund on 1 August 2024 to 31 December 2024, sharing with them a total of 159 engagement areas. The Sub-Fund did not participate in any Annual General Meetings as there was no meeting held (the Sub-Fund was launched after the end of the 2024 proxy season).

How did this financial product perform compared to the reference benchmark?

Not applicable

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI European Selection Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ELEVA SRI European Selection Fund

Legal entity identifier: 2138001N3AUIJEQ98G42

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments <ul style="list-style-type: none"><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

More information on ELEVA Capital’s definition of Sustainable investments in accordance with article 2.17 of the SFDR regulation is available in the ESG Policy. Please refer to the section “What was the proportion of sustainability-related investments?” of this periodic reporting for clarifications about the distinction of treatment between ‘Taxonomy-aligned’ Sustainable investments and the other Sustainable investments sub-categories. Statistics on the share of Taxonomy-aligned investments are presented in the section “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI European Selection Fund

To what extent were the environmental and/or social characteristics promoted by this financial product met?

ELEVA SRI European Selection Fund (the “Sub-Fund”) promoted a combination of environmental, social and governance (“ESG”) characteristics by investing in companies with good ESG practices (i.e best in universe) or companies that were on an improving path regarding ESG practices (i.e best efforts) while excluding companies that had not a minimum ESG rating (40/100).

The Sub-Fund applied the Management Company’s exclusion policy, i.e.:

- Norm based exclusions: companies having violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or one of the OECD Guidelines For Multinational Enterprises.
- Sector based exclusions: companies involved in the sector (including production or distribution) of controversial weapons (0% of sales threshold), of tobacco (5% of sales threshold) and of nuclear weapons (5% of sales threshold). The Sub-fund also applied ELEVA Capital’s coal policy, available on ELEVA Capital website.

In addition to the Management Company’s exclusion policy, the Sub-Fund applies the exclusion standard from the French SRI label (v3) related to Oil & Gas (developers; and 5% threshold for unconventional), as well as power generation (threshold expressed in gCO₂eq/kWh). For more information, please refer to the ESG Policy, available on ELEVA Capital website.

- As of 31/12/2024, the Sub-fund did not hold any position in excluded companies as defined above.

- The weighted average ESG score of the ELEVA SRI European Selection Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe. This implied that the weighted average ESG score of the Sub-Fund may in no case be lower than the average ESG score of the initial investment universe after elimination of the 30% worst companies in market capitalization weight.
- A minimum ESG score of 40/100 was required for each company to enter the portfolio.
- The weight of issuers analysed and scored on ESG criteria with the ELEVA methodology had to be higher than 90% of the invested pocket (i.e. excluding cash).

As of 31/12/2024:

- The Sub-Fund showed a better overall ESG score than its reduced universe: 68.0/100 for the Sub-Fund against 67.7/100 for the reduced universe;
- No invested company had an ESG score below 40/100;
- 100% of the invested pocket (i.e. excluding cash) had been analysed and scored through the ELEVA ESG methodology.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI European Selection Fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The Sub-Fund had to show, as binding ESG criteria, a better performance than its initial investment universe (in market capitalisation weight) on the following two ESG key performance indicators: carbon footprint (in tons of CO₂ equivalent/million euros invested, covering Scope 1+2+3) and exposure to companies without processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (sum of the weights). Moreover, the weighted average ESG score of the Sub-Fund had to be significantly higher (i.e. better) than the average ESG score of its initial investment universe.

As of 31/12/2024, the Sub-Fund:

- Had a better performance than its initial investment universe on its carbon footprint (in tons of CO₂ equivalent/million euros invested, Scope1+2+3): 238 for the Sub-Fund against 681 for the universe;
- Presented a better exposure to companies without processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises than its initial investment universe: 86% for the SubFund against 84% for the universe;
- Showed a better overall ESG score than its reduced universe: 68.0/100 for the Sub-Fund against 67.7/100 for the reduced universe.

The sustainability indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party.

● ***...and compared to previous periods?***

Not applicable as the Sub-Fund was launched on 1 August 2024 – this is the first reporting iteration.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As of 2024, the ELEVA SRI European Selection Fund had committed to a minimum share of 20% of sustainable investments (ex-ante). Sustainable investments with environmental objectives might include energy efficiency, renewable energies, sustainable mobility, smart building, sustainable infrastructure, etc. and sustainable investments with social objectives might include health and wellbeing, etc. Please refer to the following question for more details.

In parallel, and although the Sub-Fund has no ex-ante commitment on this particular indicator, the weighted average revenue contribution to the UN SDGs calculated ex-post was 39% as of 31/12/2024 (excluding sovereign bonds, if any).

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI European Selection Fund

Lastly, and although the Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy, we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 6.6% (excluding sovereign bonds, if any). Most Taxonomy aligned investments had a positive contribution to climate change mitigation (6.5% of turnover aligned excluding sovereign bonds, if any) and transition to a circular economy (0.15% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to climate change adaptation (0.12% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Several criteria have been applied to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- Exclusion (please refer to the question « To what extent were the environmental and/or social characteristics promoted by this financial product met? »)
- Minimum ESG score of 60/100, and a minimal Governance score of 50/100, which screens out companies with bad ESG practices, poor Governance, and/or significant controversies. As explained in the question “How did this financial product consider principal adverse impacts on sustainability factors?”, the ESG score captures many indicators for adverse impacts.
- Positive contribution through the proportion of revenues: the positive contribution of each company is measured by calculating the proportion of revenue generated with products or services that contribute positively to one or more UN SDGs. To be considered as a sustainable investment, a company must, in addition to the 2 previous criteria, generate at least 20% of its revenue from this type of products or services. This is a net turnover threshold; thus, we deduct from this percentage the portion of turnover possibly achieved with products having potentially residual negative impacts (i.e. if not already excluded through the exclusion criteria). This indicator is expressed as a percentage and corresponds directly to the percentage of net sales, calculated as mentioned above.

If an investee company met these criteria, it was considered a sustainable investment in its entirety. As of 31/12/2024, 54% of the Sub-fund investments passed these criteria and have been classified as sustainable investments measured ex-post.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI European Selection Fund

- — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account, at the product level, including for sustainable investments, through the set of exclusion, through the criteria analysed in the ESG analysis and through the binding ESG KPIs (please refer to the question “How did this financial product consider principal adverse impacts on sustainability factors?”).

- — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The companies that had violated ILO (International Labour Organisation) Conventions, or one of the UN guiding principles on Business and Human Rights, or one of the UN Global Compact principles, or of the OECD Guidelines for Multinational Enterprises were excluded in this Sub-Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

ELEVA UCITS Fund

Société d'Investissement à Capital Variable

Appendix 4 – Sustainable Finance Disclosure Regulation (“SFDR”) (unaudited)

ELEVA SRI European Selection Fund

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund took into consideration the 14 principal adverse impact indicators and 2 optional ones (investments in companies without carbon emission reduction initiatives and investment in companies without workplace accident prevention policies).

- PAI 2, 10, 11 and 14 were taken into consideration in a quantitative way, with maximum exposure or thresholds in place (through Strict Exclusions or through the binding ESG key performance indicators described above)
- PAI 1, 3, 4, 5, 6, 13 and the 2 optional ones were taken into consideration in a qualitative way, mainly through the criteria analysed through ESG analysis.
- PAI 7, 8, 9, 12 were only taken into consideration when the data was available (available data for these PAI is scarce).

The statement below presents the principal adverse impacts on sustainability factors with respect to ELEVA SRI European Selection, covering the period from the launch of the Sub-Fund on 1 August 2024 to 31 December 2024 and calculated as an average of the third and fourth quarters. The historical comparison with 2023 performance is not presented since the Sub-Fund was launched in August 2024.

What were the top investments of this financial product?

The table below presents the top investments made by ELEVA SRI European Selection, covering the reference period from the launch of the Sub-Fund on 1 August 2024 to 31 December 2024 and calculated as an average of the third and fourth quarters.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 August - 31 December 2024

Largest investments	Sector	% Assets	Country
Novo Nordisk A/S	Pharmaceuticals	4.26%	Denmark
ASML Holding NV	Semiconductors	3.92%	Netherlands
Schneider Electric SE	Electrical Equipment	3.80%	France
SAP SE	Software	3.01%	Germany
AXA SA	Insurance	2.84%	France
NatWest Group PLC	Banks	2.83%	United Kingdom
Sanofi	Pharmaceuticals	2.78%	France
London Stock Exchange Group	Capital Markets	2.62%	United Kingdom
3i Group PLC	Capital Markets	2.53%	United Kingdom
UCB SA	Pharmaceuticals	2.50%	Belgium
Intesa Sanpaolo SpA	Banks	2.46%	Italy
Hermes International	Textiles, Apparel	2.28%	France
Publicis Groupe SA	Media	2.27%	France
Assa Abloy AB	Building Products	2.25%	Sweden
National Grid PLC	Multi-Utilities	2.20%	United Kingdom

What was the proportion of sustainability-related investments?

As of 2024, the Sub-fund had committed to a minimum share of 20% of sustainable investments (ex-ante).

To qualify as sustainable investment (pass or fail), a company must generate at least 20% of its revenues with products and services contributing to one or more United Nations Sustainable Development Goals (UN SDGs) while at the same time not doing significant harm any environmental or social objective and following good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

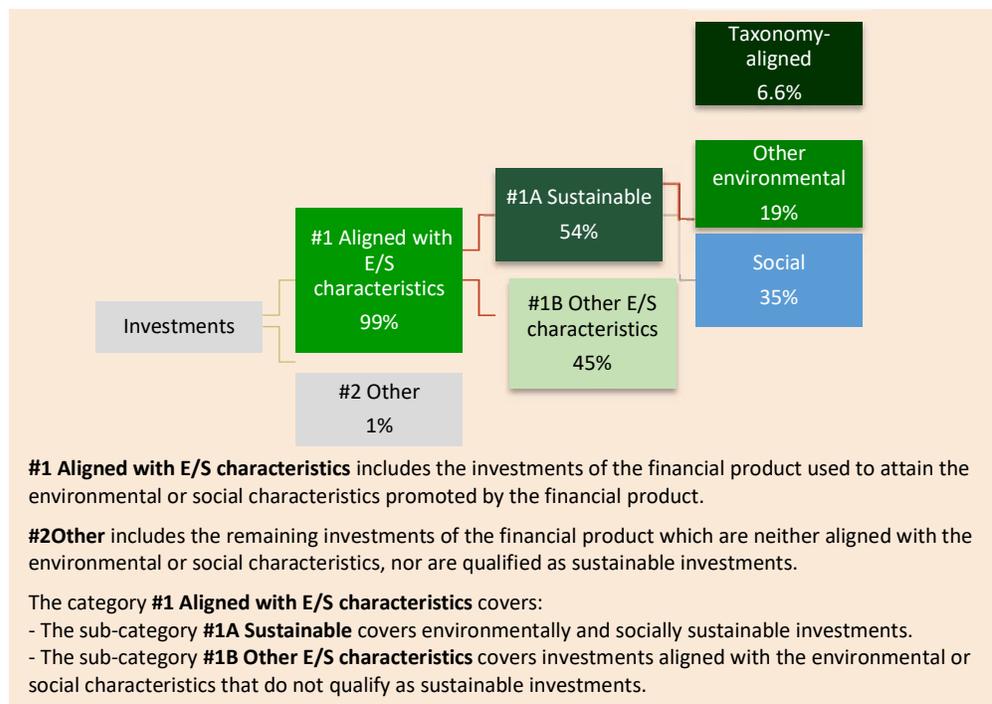

DNSH principle and good governance practices were captured through a set of Exclusions, a minimal ESG score of 60/100, and a minimal Governance score of 50/100. The ESG analysis methodology and details on exclusions are disclosed in our ESG Policy, available in the Responsible Approach section of our website.

As of 31/12/2024, the ELEVA SRI European Selection Fund had a proportion of sustainable investments of 54% measured ex-post.

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy but we voluntarily disclose the ex-post weighted average taxonomy-aligned revenue of the Sub-Fund: 6.6% (excluding sovereign bonds, if any). However, the category ‘Taxonomy-aligned’ is not linked to the total ‘Sustainable’ investments (i.e. #1A) in the graph below and is disclosed separately from the two other Sustainable investments sub-categories for two reasons: (1) based on our understanding of the SFDR regulation, the sum of Sustainable investments sub-categories must be equal to the total ‘Sustainable’ investments (i.e. #1A); and (2) in line with the SFDR regulation, ELEVA Capital’s definition of sustainable investments is binary i.e. “pass or fail” (as described above and in our ESG Policy) and sustainable investments can either be Environmental or Social but not both, whereas the SFDR regulation prescribes that taxonomy-aligned investments shall be calculated as a weighted average. Considering the lack of regulatory development or clarification on this matter, we decided to keep this stance in 2024. However, we will re-consider this approach in the next periodic reporting depending on upcoming regulatory developments and clarifications. More statistics on the share of Taxonomy-aligned investments are presented below (cf. question “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

Historical comparisons are not applicable as the Sub-Fund was launched on 1 August 2024 – this is the first reporting iteration.

● ***In which economic sectors were the investments made?***

The table below presents the sector exposure of the investments made by ELEVA SRI European Selection, covering the reference period from the launch of the Sub-Fund on 1 August 2024 to 31 December 2024 and calculated as an average of the third and fourth quarters.

Sector	% of assets
Pharmaceuticals	12.02%
Banks	9.71%
Insurance	6.21%
Electrical Equipment	6.18%
Capital Markets	5.15%
Semiconductors & Semiconductor Equipment	5.02%
Textiles, Apparel & Luxury Goods	4.25%
Hotels, Restaurants & Leisure	4.19%
Chemicals	3.95%
Building Products	3.77%
Multi-Utilities	3.74%
Software	3.64%
Electric Utilities	3.15%
Media	2.27%
Specialty Retail	2.26%
Automobiles	2.25%
Air Freight & Logistics	2.13%
Machinery	2.13%
Construction & Engineering	2.06%
Construction Materials	1.96%
Professional Services	1.59%
Beverages	1.50%
Industrial REITs	1.30%
Health Care Providers & Services	1.26%
Health Care Equipment & Supplies	1.21%
Industrial Conglomerates	1.19%
Personal Care Products	0.92%
Life Sciences Tools & Services	0.88%
Aerospace & Defense	0.80%
Broadline Retail	0.69%
Food Products	0.46%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

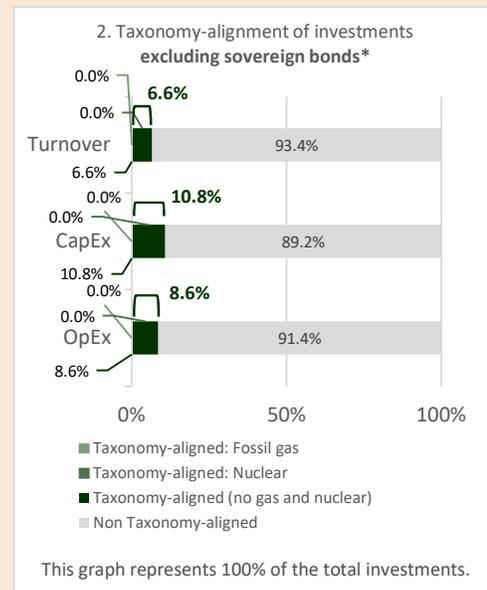

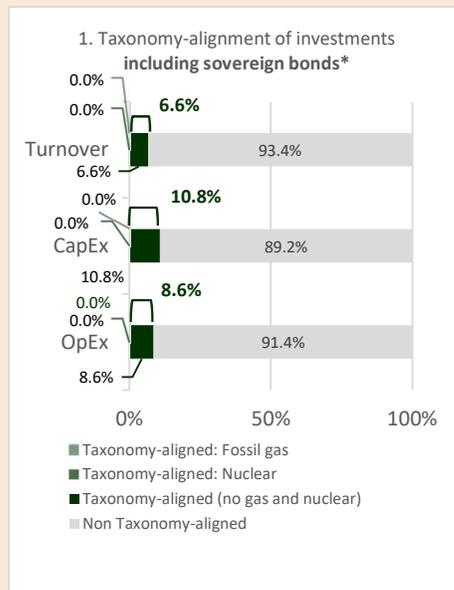

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective aligned with the EU taxonomy (ex-ante). However, the proportion of sustainable investments aligned with the Taxonomy can be measured ex-post.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Most Taxonomy aligned investments had a positive contribution to climate change mitigation (6.5% of turnover aligned excluding sovereign bonds, if any) and transition to a circular economy (0.15% of turnover aligned excluding sovereign bonds, if any), and to a lesser extent to climate change adaptation (0.12% of turnover aligned excluding sovereign bonds, if any). The Taxonomy indicators presented above have not been subject to an assurance provided by auditors or a review by a third-party, but they are only based on reported company data and are therefore considered compliant with Article 3 of the Taxonomy regulation.

● **What was the share of investments made in transitional and enabling activities?**

As of 31/12/2024:

- 0.0% of the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Transitional Taxonomy-aligned investments in terms of Turnover, 0.4% of CapEx, and 0.0% of OpEx.
- 5.9% the investments (excluding sovereign bonds, if any) made by the Sub-Fund were composed of Enabling Taxonomy-aligned investments in terms of Turnover, 9.5% of CapEx, and 7.6% of OpEx.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Historical comparisons are not applicable as the Sub-Fund was launched on 1 August 2024 – this is the first reporting iteration.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of sustainable investments with an environmental objective that are not necessarily aligned with the EU taxonomy (ex-ante).

As of 31/12/2024: 19% of all investments of the Sub-Fund were composed of sustainable investments with an environmental objective measured ex-post.

What was the share of socially sustainable investments?

As of 2024, the Sub-Fund had committed to a minimum proportion of 5% of socially sustainable investments (ex-ante).

As of 31/12/2024: 35% of all investments of the Sub-Fund were composed of sustainable investments with a social objective measured ex-post.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As of 31/12/2024, 1% of the Sub-fund investments were not invested with the E/S characteristics and so included under “other”. It consisted of cash, instruments not rated on ESG criteria (e.g. IPOs or among others and UCITS). These investments are notably used for liquidity and/or technical purposes, for which environmental or social safeguards are not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

An internal process has been in place as well as systematic post-trade monitoring to ensure that 81% minimum of net assets of the Sub-fund were “eligible” as per the ESG process in place (hence investments that are aligned with the promoted environmental and social characteristics).

Moreover, individual engagements with companies invested in the sub-fund were conducted to share key findings of ESG analysis and topics on which they could improve.

ELEVA Capital engaged with 47 companies held by the Sub-fund during the reference period from the launch of the Sub-Fund on 1 August 2024 to 31 December 2024, sharing with them a total of 174 engagement areas. The Sub-Fund did not participate in any Annual General Meetings as there was no meeting held (the Sub-Fund was launched after the end of the 2024 proxy season).

How did this financial product perform compared to the reference benchmark?

Not applicable

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
