

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Eleva Euro Bonds Strategies Fund - Class R (EUR) acc.

(ISIN:LU2168538499) Eleva Euro Bonds Strategies Fund (the 'Fund') is a sub-fund of Eleva UCITS Fund (the 'Company') Eleva Capital S.A.S. is the management company (the 'Management Company') to the Company.

Objectives and investment policy

- The Sub-Fund seeks to achieve the highest total return offered by the Euro denominated bond markets, while outperforming, net of fees, the reference index Bloomberg Euro Aggregate Index, over a 3 year period, through an active investment strategy.
- The Sub-Fund will mainly invest in Euro denominated bonds and other debt securities of private, public and semi-public issuers worldwide based, without any restrictions to respective sector exposures. The portfolio is managed with a total return mindset to participate in rising markets, while implementing a defensive approach, by hedging the portfolio to market risks, in declining markets.
- The Management Company will seek to achieve the investment objective through a combination of a global duration positioning along with relative value strategies. The Sub-Fund will invest principally in bonds and other debt securities of private, public and semi-public issuers worldwide based, without any restrictions to respective sector exposures.
- Bloomberg is a benchmark provider authorised by the ESMA. The Bloomberg Euro Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, euro-denominated, fixed-rated bond market, including treasuries, government-related, corporate and securitized issues.
- The Sub-Fund is actively managed with reference to the Relevant Benchmark. The Sub-Fund's holdings and the weightings of securities in the portfolio will consequently deviate from the composition of the Relevant Benchmark.
- The Sub-Fund may invest up to 30% of the asset in fixed income instruments issued by entities domiciled in non OECD countries, up to 30% of the portfolio in high yield and not rated bonds and may invest in listed and over-the-counter ("OTC") derivatives for the purposes of yield enhancement and hedging risks. Repurchase and reverse repurchase agreement transactions, total return swaps and other financial derivative instruments with similar characteristics may be used.
- Through the former FDIs, the Sub-Fund may be committed to leverage up to 500% of its Net Asset Value. This means that the Sub-Fund may have additional commitments seeking exposure, hedging or arbitrages to financial markets up to five times its Net Asset Value, in absolute value. The 500% leverage upper limit could be approached with the use of short term maturity FDIs with a low duration exposure which therefore would require larger notionals to reach the same sensitivity as longer maturity FDIs. For example, for the same contribution to duration, a leverage five times larger will be required when investing in a two years maturity bond future compared with investing in a ten years maturity bond future.
- Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money within 3 years.
- The Share Class does not intend to distribute dividends. Any income arising from the Sub-Fund's investments is reinvested and reflected in the value of this Share Class.
- Investors may redeem their shares on a daily basis.

Risk and reward profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile shown is not guaranteed and may change over time.
- As this Fund has less than five years performance data available, it is based on simulated volatility and is not a guide to the future risk and reward category of the Fund.
- The Fund is rated 4 because its simulated historical value has shown moderate volatility. However, due to the nature of its investments, it is exposed to the risks listed below.
- There can be no assurance that the Fund will be successful in achieving its objective of generating an absolute return.

The following risks may not be fully captured by the risk and reward indicator:

- **Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Sub-Fund to financial loss.
- **Derivative Risk:** Derivative values can rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

This risk is minimised by holding a diverse selection of non-derivative instruments.

- **Credit Risk:** The Sub-Fund could lose money if the issuer or guarantor of a fixed income security, or the counterparty to a derivatives contract, repurchase agreement or a loan of portfolio securities, is unable or unwilling to make timely principal and/or interest payments, or to otherwise honour its obligations. All securities are subject to varying degrees of credit risk, which may not always be wholly reflected in credit ratings. In addition, the Sub-Fund may purchase unrated securities, thus relying on the Management Company's credit analysis, possibly increasing or incurring other risks.
- **Liquidity Risk:** It exists when particular investments are difficult to purchase or sell. The Sub-Fund's investments in illiquid securities may reduce the returns of the Sub-Fund because it may be unable to sell the illiquid securities at an advantageous time or price. The Sub-Fund involves foreign securities, derivatives or securities with substantial market and/or credit risk, which tend to have the greatest exposure to liquidity risk.

A complete description of risk factors is set out in the prospectus of the Company in the 'Risk Factors Annex'.

Charges

One-off charges taken before or after you invest

Entry charge	3.00%
Exit charge	None

The percentage indicated is the maximum that can be taken out of your capital before it is invested or before the income from your investment is distributed to you .

Ongoing charges	0.61%
-----------------	-------

Charges taken by the fund under certain specific conditions

Performance fee	10% of the outperformance versus the Bloomberg Euro Aggregate Total Return Index Value Unhedged EUR from 1st January 2023.
-----------------	--

A performance fee may be payable in case the Sub-Fund has overperformed the Relevant Benchmark but had a negative performance.

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment

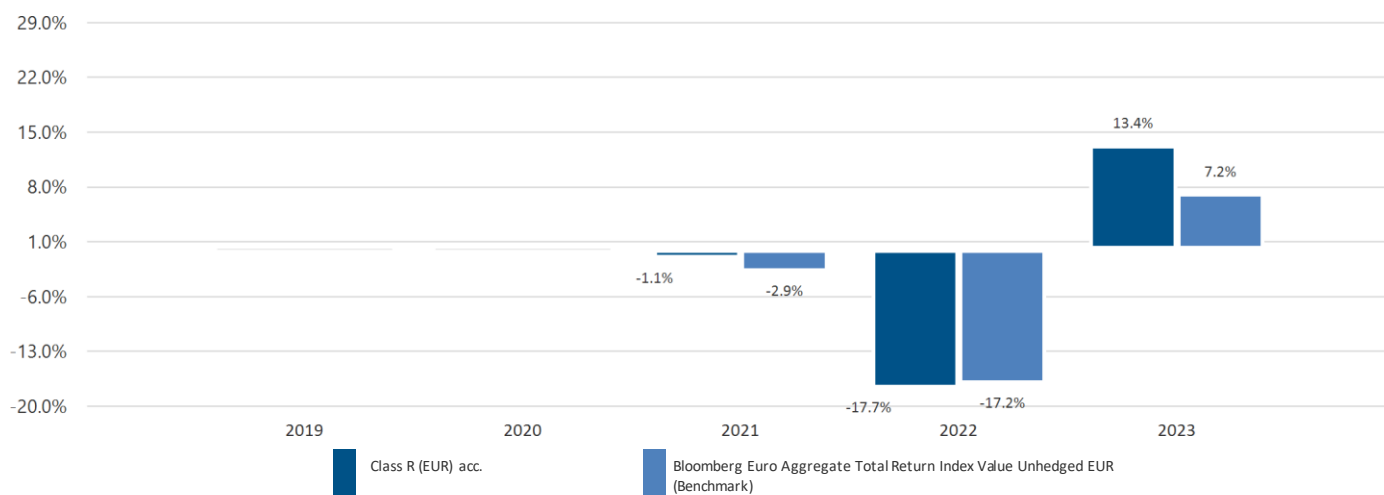

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges. The **ongoing charges figure** is based on the expenses for the year ending December 2023.

This figure may vary from year to year. It excludes:

- Performance Fees.
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another undertaking for collective investment. In the last financial year ending December 2023, the performance fee amounted to 0.58%.

For more information on charges, please see the 'Fees and Expenses' section of the Prospectus.

Past Performance

- Please note that past performance is not a reliable indicator of future results.
- The past performance is calculated in Euro
- The Fund performance does not track the benchmark performance.

- The impact of charges and fees on past performance has been included but entry charges are excluded.
- The Fund launched on 24 September 2020. This class became active on 5 October 2020.
