What is this product?

Type

The product is a Sub-Fund of Eleva UCITS Fund (the "Fund"), a société anonyme under the laws of the Grand Duchy of Luxembourg and qualifying as an open-ended société d'investissement à capital variable under part I of the Law of 2010.

Term

The Sub-Fund was incorporated for an unlimited period and its termination must be decided by the Board of Directors.

Objectives

The Sub-Fund seeks to achieve the highest total return offered by the Euro denominated bond markets, while outperforming, net of fees, the reference index Bloomberg Euro Aggregate Index, over a 3-year period, through an active investment strategy.

The Sub-Fund will mainly invest in Euro denominated bonds and other debt securities of private, public and semi-public issuers worldwide based, without any restrictions to respective sector exposures. The portfolio is managed with a total return mindset to participate in rising markets, while implementing a defensive approach, by hedging the portfolio to market risks, in declining markets.

The Management Company will seek to achieve the investment objective through a combination of a global duration positioning along with relative value strategies. The Sub-Fund will invest principally in bonds and other debt securities of private, public and semi-public issuers worldwide based, without any restrictions to respective sector exposures.

Bloomberg is a benchmark provider authorised by the ESMA. The Bloomberg Euro Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, euro-denominated, fixed-rated bond market, including treasuries, government-related, corporate and securitized issues.

The Sub-Fund is actively managed with reference to the relevant Benchmark. The Sub-Fund's holdings and the weightings of securities in the portfolio will consequently deviate from the composition of the relevant Benchmark.

The Sub-Fund may invest up to 30% of the asset in fixed income instruments issued by entities domiciled in non OECD countries, up to 30% of the portfolio in high yield and not rated bonds and may invest in listed and over-the-counter ("OTC") derivatives for the purposes of yield enhancement and hedging risks. Repurchase and reverse repurchase agreement transactions, total return swaps and other financial derivative instruments with similar characteristics may be used.

Through the former FDIs, the Sub-Fund may be committed to leverage up to 500% of its Net Asset Value. This means that the Sub-Fund may have additional commitments seeking exposure, hedging or arbitrages to financial markets up to five times its Net Asset Value, in absolute value. The 500% leverage upper limit could be approached with the use of short term maturity FDIs with a low duration exposure which therefore would require larger notionals to reach the same sensitivity as longer maturity FDIs. For example, for the same contribution to duration, a leverage five times larger will be required when investing in a two years maturity bond future compared with investing in a ten years maturity bond future.

Custodian: The Sub-Funds assets are held with HSBC Continental Europe, Luxembourg and are segregated from the assets of other sub-funds of the Company.

Further information and price availability: Further information about the Company (including the current Prospectus and most recent Annual Report) is available in English, and information about the Sub-Fund and other Share Classes (including the latest prices of shares and translated versions of this document), are available free of charge on www.elevacapital.com or by making a written request to the Management Company, 61 rue des Belles Feuilles, 75116, Paris, France or by emailing info@elevacapital.com.

Sale of shares in the Sub-Fund can be made on any business day.

The share class does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of this share class.

Intended retail investor

The Sub-Fund is suitable for investors seeking capital growth over at least a 3-year investment period and who wish to gain exposure to an actively managed portfolio of Euro denominated bonds and similar investments of the type described in the investment policy described above. The Sub-Fund may not be suitable for investors outside the target market.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years.
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Additional risks: Market liquidity Risk, Counterparty Risk, Credit Risk, Interest Rate Risk, Derivatives Risk, Emerging Market Risk, Inflation Risk, ESG Risk Factors.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If Eleva Capital S.A.S is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period : 3 years			
Investment EUR10,000		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

- We have assumed:
- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
 - EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs EUR	498 EUR	1,127 EUR
Annual cost impact (*)	5.0%	3.7% per year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.0% before costs and 1.3% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	2.0% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	202 EUR

Incidental costs taken under specific conditions		
Performance fees	The impact of the performance fee. We take these from your investment if the product outperforms its benchmark, the Bloomberg Euro Aggregate Total Return Index.	14 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 3 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product. Order Schedule: Requests to buy, exchange or sell fund shares that received in proper form by the central administration agent by 12:00 p.m. (Luxembourg time) on any fund business day are ordinarily processed the same day using valuations of that day. Settlement typically occurs within 3 business days after a request has been accepted. Disinvesting before the end of the recommended holding period may have a negative consequence on your investment.
