Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ELEVA Global Multi Opportunities Fund -Class I (EUR) acc.-LU2603203352

(ISIN:LU2603203352) Eleva Global Multi Opportunities Fund (the 'Fund') is a sub-fund of Eleva UCITS Fund (the 'Company') Eleva Capital S.A.S. is the management company (the 'Management Company') to the Company.

Objectives and Investment Policy

• The Sub-Fund is a multi-asset sub-fund which seeks to achieve a positive absolute return over the medium term, mainly through active and flexible management of: (i) equities and equity related securities of corporate issuers worldwide, and (ii) bonds, currencies and other debt securities of private, public and semi-public issuers worldwide based, without any restrictions to respective sector exposures. The maximum global exposure to currencies other than the EUR is 100%. There is no specific constraints in term of assets allocation between the equity pocket and the debt pocket, it may vary from 0% to 100 % for each pocket. The Sub-Fund has a maximum exposure to emerging markets of 50% of the net assets. The investments in Chinese equities (and equity related securities) and bonds combined will not exceed 20% of the net assets. The Sub-Fund will in any event not be exposed to more than 10% of its net assets in CNY.

• The Sub-Fund promotes a combination of ESG characteristics, integrates binding ESG criteria in its investment strategy and falls under Article 8 of SFDR. The main non-financial objective of the Sub-Fund is to invest in companies, sovereign, quasi-sovereign and supra-national issuers with good ESG practices (i.e. best in universe) or that are on an improving path regarding ESG practices (i.e. best efforts) while excluding companies that would not have a minimum absolute ESG score. From a broad universe made of all companies (all market capitalisations, all sectors) worldwide, the Sub-Fund focuses on companies meeting the following financial criterion: minimum market cap is set at 1 billion USD unless that company has a strong balance sheet and a sufficient revenue growth. This defines the so-called initial investment universe (in order to compare the Sub-Fund with its investment universe on ESG criteria).

• The Sub-Fund may, on an ancillary basis, invest in and/or be exposed to other asset classes and in particular bonds issued by non-listed issuers.

The methodology used for ESG selectivity is the following: the weighted average ESG score of the Sub-Fund's long pocket has to be higher (i.e. better) than the average ESG score of its initial investment universe.

•Equity pocket of the Sub-Fund: the Management Company will seek to invest in companies which it considers having attractive growth prospects over a 3-to-5-year period, not reflected in its current trading price or which have low valuation multiples that have the potential to revert to the mean over time.

• Debt pocket of the Sub-Fund: it will be managed with a total return mindset to participate in rising markets, while implementing a defensive approach, by hedging the portfolio to market risks, in declining markets. The Sub-Fund may invest up to 50% in High Yield and non-rated bonds.

• The Sub-Fund may use FDIs (financial derivatives instruments) such as futures on equities, equity indices, interest rates, single name bonds and baskets of bonds for hedging purposes or gaining exposure; options on equities, equity indices, interest rates, futures, single name bonds and baskets of bonds for hedging purposes or gaining exposure; CFDs on equities and equity indices (which can be used for hedging or exposure purposes); credit default swaps on single name bonds, baskets of bonds and bond indices which can be used for hedging or exposure purposes; swaps (including swaptions) on interest rate and inflation. The Sub-Fund may enter into securities lending transactions with the exclusion of total return swaps.

• The Sub-Fund is actively managed with no reference to a benchmark.

• The Share Class does not intend to distribute dividends. Any income arising from the Sub-Funds investments is reinvested and reflected in the value of this Share Class.

• Sale of shares in the Sub-Fund can be made on any business day.

• Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and Reward Profile

Typically lower rewards ← → Typically higher rewards

Lower Risk — Higher Risk

1	2	3	4	**5**	6	7

• The lowest category does not mean a risk free investment.

• The risk and reward profile shown is not guaranteed and may change over time.

• As this Fund has less than five years performance data available, it is based on simulated volatility and is not a guide to the future risk and reward category of the Fund.

• This Fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average.

The following risks may not be fully captured by the risk and reward indicator:

• **Equity Risk:** The risk that investments depreciate because of stock market dynamics.

• **Credit Risk:** The Sub-Fund could lose money if the issuer or guarantor of a fixed income security, or the counterparty to a derivatives contract, repurchase agreement or a loan of portfolio securities, is unable or unwilling to make timely principal and/or interest payments, or to otherwise honour its obligations. All securities are subject to varying degrees of credit risk, which may not always be wholly reflected in credit ratings. In addition, the Sub-Fund may purchase unrated securities, thus relying on the Management Company's credit analysis, possibly increasing or incurring other risks.

• **Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Sub-Fund to financial loss.

• **Liquidity Risk:** It exists when particular investments are difficult to purchase or sell. The Sub-Fund's investments in illiquid securities may reduce the returns of the Sub-Fund because it may be unable to sell the illiquid securities at an advantageous time or price. The Sub-Fund involves foreign securities, derivatives or securities with substantial market and/or credit risk, which tend to have the greatest exposure to liquidity risk.

• **Currency Risk:** As the Fund invests in securities denominated in a number of different currencies, movements in exchange rates may, when not hedged, cause the value of the investments to increase or decrease.

• **Derivative Risk:** Derivative values can rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment. This risk is minimised by holding a diverse selection of non-derivative instruments.

• **Market Risk:** The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility.

• **ESG Risk Factors:**

- The lack of ESG criteria standards can make comparability between different portfolios using these criteria difficult.
- The ESG investment approaches available in the market can be subject to different interpretations.
- The performance of Sub-Funds employing ESG criteria may differ.
- Evolving ESG risks calculations makes ESG risk measurements difficult.

A complete description of risk factors is set out in the prospectus of the Company in the **'Risk Factors Annex'** .

Charges for this fund

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	N/A
The percentage indicated is the maximum that can be taken out of your capital before it is invested or before the income from your investment is distributed to you .	
Ongoing charges	1.10%
Charges taken from the fund under certain specific conditions	
Performance fee	15% of the outperformance versus the High Water Mark.

A performance fee may be payable in case the Sub-Fund has overperformed the Relevant Benchmark but had a negative performance.

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The **ongoing charges figure** is based on the expenses for the year ending December 2025.

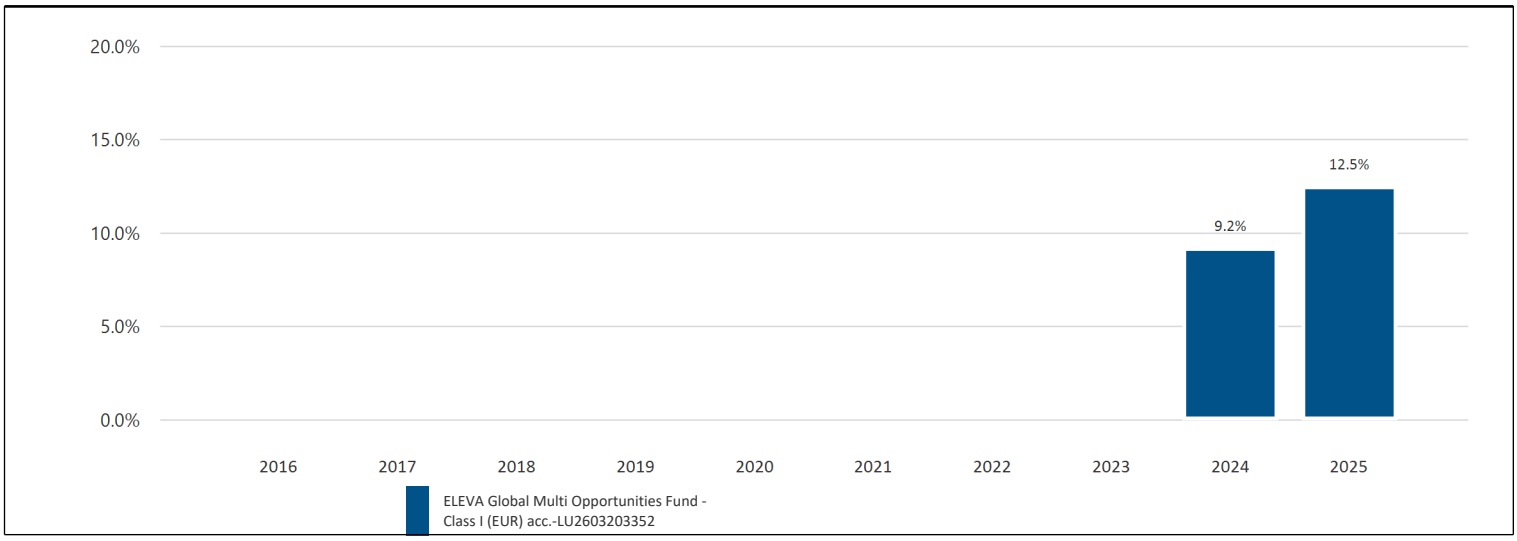

This figure may vary from year to year. It excludes:

- Performance Fees.
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another undertaking for collective investment.

In the last financial year ending December 2025, the performance fee amounted to 1.85%.

For more information on charges, please see the **'Fees and Expenses'** section of the Prospectus.

Past Performance

- Please note that past performance is not a reliable indicator of future results.
- The past performance is calculated in Euro
- The Fund performance does not track the benchmark performance.
- The impact of charges and fees on past performance has been included but entry charges are excluded.
- The Fund launched on 5 July 2023. This class became active on 5 July 2023.
