What is this product?

Type

The product is a Sub-Fund of Eleva UCITS Fund (the "Fund"), a société anonyme under the laws of the Grand Duchy of Luxembourg and qualifying as an open-ended société d'investissement à capital variable under part I of the Law of 2010.

Term

The Sub-Fund was incorporated for an unlimited period and its termination must be decided by the Board of Directors.

Objectives

The Sub-Fund seeks to achieve a positive absolute return over the medium term through capital growth by investing primarily in listed European equities and equity-related securities on both a long and short (through FDI) basis, with at least 50% of European equities. The Sub-Fund may, on an ancillary basis, invest in and/or be exposed to other asset classes and in particular bonds.

The Sub-Fund promotes a combination of environmental, social and governance characteristics and is a product falling under Article 8 of SFDR. The Management Company will seek to achieve the investment objective through a directional long/short investment strategy:

Long invested pocket: The Management Company will seek to invest in companies which it considers having attractive growth prospects over a three to five year period not reflected in its current trading price or which have low valuation multiples that have the potential to revert to the mean over time. The Management Company will seek to focus on four particular types of companies: i) family or foundation-owned companies managed with a patrimonial approach; ii) companies in mature industries which the Management Company considers to have differentiated or innovative business models; iii) companies where the Management Company considers there to be a disconnect between the credit and the equity market perception of the fundamentals of that company; and iv) companies the Management Company considers to be undergoing material change, including through restructuring, consolidation, the appointment of new management or the restructuring of the balance sheet.

Short invested pocket: the Management Company will seek to focus on three particular types of opportunities: i) companies where the Management Company considers there to be a disconnect between the credit and the equity market perception of the fundamentals of that company; ii) companies that the Management Company considers overvalued and at a negative inflexion point; and iii) companies that the Management Company considers to belong to long term challenged industries.

The Sub-Fund has a maximum exposure to emerging markets of 50% of the net assets. The Eleva Absolute Return Dynamic Fund will not invest in Russian or Turkish equities or equity related securities.

The investments in Chinese equities (and equity related securities) and bonds combined will not exceed 20% of the net assets. The Sub-Fund will in any event not be exposed to more than 10% of its net assets in CNY.

The Sub-Fund may subscribe and hold Shares issued by one or more other Sub-Funds, which in total amounts to a maximum of 10% of its Net Asset Value.

The Sub-Fund is actively managed with no reference to a benchmark.

In managing the Sub-Fund, the Management Company will invest in FDIs, futures on equities, equity indices and bonds, forward contracts, options on equities and equity indices, CFDs on equities and equity indices, equity index forwards, funded TRS and unfunded TRS on European equities or other underlying investments or securities related to the Sub-Fund investment policy as well as equity indices.

The Sub-Fund may enter into securities lending transactions with the exclusion of total return swaps.

Custodian: The Sub-Fund's assets are held with HSBC Continental Europe, Luxembourg and are segregated from the assets of other sub-funds of the Company.

Further information and price availability: Further information about the Company (including the current Prospectus and most recent Annual Report) is available in English, and information about the Sub-Fund and other Share Classes (including the latest prices of shares and translated versions of this document), are available free of charge on www.elevacapital.com or by making a written request to the Management Company, 61 rue des Belles Feuilles, 75116, Paris, France or by emailing info@elevacapital.com.

Sale of shares in the Sub-Fund can be made on any business day.

The share class does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of this share class.

Intended retail investor

The Sub-Fund is suitable for absolute return-minded investors seeking capital growth over at least a 5-year investment period who wish to gain exposure to investments of the type described in the investment policy described above. The Sub-Fund may not be suitable for investors outside the target market. Investors should be prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Additional risks: Market liquidity Risk, Counterparty Risk, Derivatives Risk, Directional Long/Short Strategy, Economic Dislocation Risk, Synthetic Short Sales Risk, ESG Risk Factors.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If Eleva Capital S.A.S is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period : 5 years			
Investment EUR10,000		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	4,450 EUR	4,610 EUR
	Average return each year	-55.5%	-14.3%
Unfavourable	What you might get back after costs	9,160 EUR	9,930 EUR

Favourable`	What you might get back after costs	11,530 EUR	13,050 EUR
	Average return each year	15.3%	5.5%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 03/2015 and 03/2020.

The moderate scenario occurred for an investment between 04/2017 and 04/2022.

The favourable scenario occurred for an investment between 12/2018 and 12/2023.

What happens if Eleva Capital S.A.S is unable to pay out?

The assets and liabilities of this product are segregated from those of Eleva Capital S.A.S. There is no cross- liability between these entities, and the product would not be liable if Eleva Capital S.A.S. or any delegated service provider were to fail or default. This product does not participate in an investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

- We have assumed:
- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
 - EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs EUR	718 EUR	2,654 EUR
Annual cost impact (*)	7.2%	5.1% per year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.5% before costs and 3.4% after costs.

Composition of Costs

How long should I hold it and can I take money out early?

Recommended holding period: 5 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product. Order Schedule: Requests to buy, exchange or sell fund shares that received in proper form by the central administration agent by 12:00 p.m. (Luxembourg time) on any fund business day are ordinarily processed the same day using valuations of that day. Settlement typically occurs within 3 business days after a request has been accepted. Disinvesting before the end of the recommended holding period may have a negative consequence on your investment.
